

“Cracking the Code of Life: The race to decode human DNA” Video Questions  
 (A video on the Human Genome Project)  
 NOVA – © 2001

“When you look at the mirror, you don’t see DNA or RNA. You see proteins and the action of proteins. We are the product of our proteins and their activity.” Craig Venter, “Cracking the Code of Life” Video

- 1) How much of a banana’s DNA is similar to ours? 50% OF THE GENES
- 2) 4 and some billion years ago – 1<sup>st</sup> speck of life on warm surface of a BUBBLE
- 3) Raw DNA looks like what in raw form? Eric Lander – geneticist found that it looks like LONG STRANDS OF MOLECULES; these double helices of DNA ARE LIKE LITTLE THREADS OF COTTON WHEN PUT ALL TOGETHER.
- 4) Human beings only have TWICE as many genes as the fruit fly.
- 5) DNA is organized similar to steps in a ladder
- 6) Each step is made of base pairs: cytosine-guanine and adenine-thymine.
- 7) DNA is 3 billion steps long in form of a double helix.
- 8) Size of DNA – 10 angstroms = 1 billionth of a meter.
- 9) Each step in the ladder can give information about what will be passed to your children.
- 10) Every human baby born is 99.9 % identical to every other human baby in the world.
- 11) Since 1990, scientists have been involved in the Human Genome Project to understand the tiniest differences in our genes that makes us healthy or sick.
- 12) Only about 1% of the GENES are active and this is why scientists needed a map to find these genes.
- 13) Revolutionized technology – 10,000 letters every second.
- 14) Boeing 777 – about 100,000 parts.
- 15) Genome project, is similar to getting a parts list, but that’s all you have. It’s important to have, but that doesn’t mean you know how to put it together.
- 16) Allison and Tim had a son Hayden – something was not right – something clearly wrong by time he was 1 year old. Laughed all the time. Never crawled or ate with his hands. Started regressing. Started missing developmental milestones. Slowly getting worse – Tay Sachs Disease.
- 17) Tay Sachs begins with just 1error in a letter/base of the DNA molecule.
- 18) Genes create proteins, and the protein that is supposed to dissolve fat in brain, which when it is not produced, the fat builds up in the brain and begins to destroy the baby’s brain.
- 19) Hayden has gone blind, can’t eat solid food, has seizures as much as 10 times a day. Only one outcome. Most die by age 5-7 years.
- 20) Tim’s identical twin brother, Charlie, and wife Blythe, who have 2 girls, including little Cameron, who startled easily just like Hayden always did. Cameron had Tay Sachs also.
- 21) Tay Sachs is a very rare condition and it usually occurs in specific groups, like Ashkenazi Jews. And even then, the baby must inherit the bad gene from both parents.
- 22) Hayden Lord died a few months before his 3rd birthday.
- 23) The promise of the human genome project – an early warning system for parents, doctors, etc. about genetic diseases. Geneticists can spot these catastrophes while they’re still insignificant dots on the gene.
- 24) Craig Venter, a government scientist thought that he could find the human genome much faster than the other science team in 1990.
- 25) Craig Venter wanted to use the new machine that could identify Cs and Ts and As and Gs.
- 26) This machine worked as a robot chopped human genes into tiny pieces. A laser bounces light off of each tiny bit of DNA and the color that it sees represents individual letters in the genetic code

# Nova Cracking The Code Of Life Worksheet Answers

**DNA** James D. Watson, Andrew Berry, 2009-01-21 Fifty years ago James D Watson then just twentyfour helped launch the greatest ongoing scientific quest of our time Now with unique authority and sweeping vision he gives us the first full account of the genetic revolution from Mendel s garden to the double helix to the sequencing of the human genome and beyond Watson s lively panoramic narrative begins with the fanciful speculations of the ancients as to why like begets like before skipping ahead to 1866 when an Austrian monk named Gregor Mendel first deduced the basic laws of inheritance But genetics as we recognize it today with its capacity both thrilling and sobering to manipulate the very essence of living things came into being only with the rise of molecular investigations culminating in the breakthrough discovery of the structure of DNA for which Watson shared a Nobel prize in 1962 In the DNA molecule s graceful curves was the key to a whole new science Having shown that the secret of life is chemical modern genetics has set mankind off on a journey unimaginable just a few decades ago Watson provides the general reader with clear explanations of molecular processes and emerging technologies He shows us how DNA continues to alter our understanding of human origins and of our identities as groups and as individuals And with the insight of one who has remained close to every advance in research since the double helix he reveals how genetics has unleashed a wealth of possibilities to alter the human condition from genetically modified foods to genetically modified babies and transformed itself from a domain of pure research into one of big business as well It is a sometimes topsy turvy world full of great minds and great egos driven by ambitions to improve the human condition as well as to improve investment portfolios a world vividly captured in these pages Facing a future of choices and social and ethical implications of which we dare not remain uninformed we could have no better guide than James Watson who leads us with the same bravura storytelling that made *The Double Helix* one of the most successful books on science ever published Infused with a scientist s awe at nature s marvels and a humanist s profound sympathies *DNA* is destined to become the classic telling of the defining scientific saga of our age [Your Genes, Your Choices](#) Catherine Baker, 1996 Program discusses the Human Genome Project the science behind it and the ethical legal and social issues raised by the project

**Mapping and Sequencing the Human Genome** National Research Council, Division on Earth and Life Studies, Commission on Life Sciences, Committee on Mapping and Sequencing the Human Genome, 1988-01-01 There is growing enthusiasm in the scientific community about the prospect of mapping and sequencing the human genome a monumental project that will have far reaching consequences for medicine biology technology and other fields But how will such an effort be organized and funded How will we develop the new technologies that are needed What new legal social and ethical questions will be raised *Mapping and Sequencing the Human Genome* is a blueprint for this proposed project The authors offer a highly readable explanation of the technical aspects of genetic mapping and sequencing and they recommend

specific interim and long range research goals organizational strategies and funding levels They also outline some of the legal and social questions that might arise and urge their early consideration by policymakers *AASHTO Guide for Design of Pavement Structures, 1993* American Association of State Highway and Transportation Officials,1993 Design related project level pavement management Economic evaluation of alternative pavement design strategies Reliability Pavement design procedures for new construction or reconstruction Design requirements Highway pavement structural design Low volume road design Pavement design procedures for rehabilitation of existing pavements Rehabilitation concepts Guides for field data collection Rehabilitation methods other than overlay Rehabilitation methods with overlays Mechanistic empirical design procedures *Abraham Lincoln's DNA and Other Adventures in Genetics* Philip Reilly,2000 For laypeople and professionals alike who yearn for a better understanding of genetically engineered crops DNA fingerprinting cloning or gene therapy here is a valuable addition to a small but critical literature that will frame the public discourse as it is decided how to use the burgeoning knowledge of the genome The lessons are delivered in the course of fascinating historical tales including an especially enjoyable chapter on Henri de Toulouse Lautrec with a hint of Lewis Thomas like awe and fascination with the power of genetic analysis *The Emperor of All Maladies* Siddhartha Mukherjee,2011-08-09 Winner of the Pulitzer Prize and a documentary from Ken Burns on PBS this New York Times bestseller is an extraordinary achievement The New Yorker a magnificent profoundly humane biography of cancer from its first documented appearances thousands of years ago through the epic battles in the twentieth century to cure control and conquer it to a radical new understanding of its essence Physician researcher and award winning science writer Siddhartha Mukherjee examines cancer with a cellular biologist s precision a historian s perspective and a biographer s passion The result is an astonishingly lucid and eloquent chronicle of a disease humans have lived with and perished from for more than five thousand years The story of cancer is a story of human ingenuity resilience and perseverance but also of hubris paternalism and misperception Mukherjee recounts centuries of discoveries setbacks victories and deaths told through the eyes of his predecessors and peers training their wits against an infinitely resourceful adversary that just three decades ago was thought to be easily vanquished in an all out war against cancer The book reads like a literary thriller with cancer as the protagonist Riveting urgent and surprising The Emperor of All Maladies provides a fascinating glimpse into the future of cancer treatments It is an illuminating book that provides hope and clarity to those seeking to demystify cancer *Rosalind Franklin and DNA* Anne Sayre,2000 A biography of one of the four scientists responsible for the discovery of the molecular structure of DNA the key to heredity in all living things *Pentagon 9/11* Alfred Goldberg,2007-09-05 The most comprehensive account to date of the 9 11 attack on the Pentagon and aftermath this volume includes unprecedented details on the impact on the Pentagon building and personnel and the scope of the rescue recovery and caregiving effort It features 32 pages of photographs and more than a dozen diagrams and illustrations not previously available **Psychometric Tests (the Ultimate Guide)** Richard McMunn,2010-11 **The**

**Fabric of the Cosmos** Brian Greene, 2007-12-18 NATIONAL BESTSELLER From one of the world's leading physicists and author of the Pulitzer Prize finalist *The Elegant Universe* comes an astonishing ride through the universe *The New York Times* that makes us look at reality in a completely different way Space and time form the very fabric of the cosmos Yet they remain among the most mysterious of concepts Is space an entity Why does time have a direction Could the universe exist without space and time Can we travel to the past Greene has set himself a daunting task to explain non-intuitive mathematical concepts like String Theory the Heisenberg Uncertainty Principle and Inflationary Cosmology with analogies drawn from common experience From Newton's unchanging realm in which space and time are absolute to Einstein's fluid conception of spacetime to quantum mechanics' entangled arena where vastly distant objects can instantaneously coordinate their behavior Greene takes us all regardless of our scientific backgrounds on an irresistible and revelatory journey to the new layers of reality that modern physics has discovered lying just beneath the surface of our everyday world

**Descriptions of Medical Fungi** Sarah Kidd, Catriona Halliday, Helen Alexiou, David Ellis, 2016-04-20 *Descriptions of Medical Fungi* Third Edition Sarah Kidd Catriona Halliday Helen Alexiou and David Ellis 2016 This updated third edition which includes new and revised descriptions We have endeavoured to reconcile current morphological descriptions with more recent genetic data More than 165 fungus species are described including members of the Zygomycota Hyphomycetes Dimorphic Pathogens Yeasts and Dermatophytes 340 colour photographs Antifungal Susceptibility Profiles Microscopy Stains Techniques Specialised Culture Media References 250 pages

**Balanced Scorecard Step-by-Step** Paul R. Niven, 2002-10-15 This book explains how an organization can measure and manage performance with the Balanced Scorecard methodology It provides extensive background on performance management and the Balanced Scorecard and focuses on guiding a team through the step-by-step development and ongoing implementation of a Balanced Scorecard system Corporations public sector agencies and not-for-profit organizations have all reaped success from the Balanced Scorecard This book supplies detailed implementation advice that is readily applied to any and all of these organization types Additionally it will benefit organizations at any stage of Balanced Scorecard development Regardless of whether you are just contemplating a Balanced Scorecard require assistance in linking their current Scorecard to management processes or need a review of their past measurement efforts *Balanced Scorecard Step by Step* provides detailed advice and proven solutions

**The Structuring of Organizations** Henry Mintzberg, 2009 Synthesizes the empirical literature on organizational structuring to answer the question of how organizations structure themselves how they resolve needed coordination and division of labor Organizational structuring is defined as the sum total of the ways in which an organization divides and coordinates its labor into distinct tasks Further analysis of the research literature is needed in order to build a conceptual framework that will fill in the significant gap left by not connecting a description of structure to its context how an organization actually functions The results of the synthesis are five basic configurations the Simple Structure

the Machine Bureaucracy the Professional Bureaucracy the Divisionalized Form and the Adhocracy that serve as the fundamental elements of structure in an organization Five basic parts of the contemporary organization the operating core the strategic apex the middle line the technostructure and the support staff and five theories of how it functions i.e. as a system characterized by formal authority regulated flows informal communication work constellations and ad hoc decision processes are theorized Organizations function in complex and varying ways due to differing flows including flows of authority work material information and decision processes These flows depend on the age size and environment of the organization additionally technology plays a key role because of its importance in structuring the operating core Finally design parameters are described based on the above five basic parts and five theories that are used as a means of coordination and division of labor in designing organizational structures in order to establish stable patterns of behavior CJC *No Logo* Naomi Klein, 2000-01-15 What corporations fear most are consumers who ask questions Naomi Klein offers us the arguments with which to take on the superbrands Billy Bragg from the book jacket **The Sourcebook for Teaching Science, Grades 6-12** Norman Herr, 2008-08-11 The Sourcebook for Teaching Science is a unique comprehensive resource designed to give middle and high school science teachers a wealth of information that will enhance any science curriculum Filled with innovative tools dynamic activities and practical lesson plans that are grounded in theory research and national standards the book offers both new and experienced science teachers powerful strategies and original ideas that will enhance the teaching of physics chemistry biology and the earth and space sciences *Archaeology, Anthropology, and Interstellar Communication* National Aeronautics Administration, Douglas Vakoch, 2014-09-06 Addressing a field that has been dominated by astronomers physicists engineers and computer scientists the contributors to this collection raise questions that may have been overlooked by physical scientists about the ease of establishing meaningful communication with an extraterrestrial intelligence These scholars are grappling with some of the enormous challenges that will face humanity if an information rich signal emanating from another world is detected By drawing on issues at the core of contemporary archaeology and anthropology we can be much better prepared for contact with an extraterrestrial civilization should that day ever come National Science Foundation, 2000 *Postharvest Handling* Nigel H. Banks, Wojciech J. Florkowski, Stanley E. Prussia, Robert L. Shewfelt, Bernhard Brueckner, 2009-02-21 Consideration of the interactions between decisions made at one point in the supply chain and its effects on the subsequent stages is the core concept of a systems approach Postharvest Handling is unique in its application of this systems approach to the handling of fruits and vegetables exploring multiple aspects of this important process through chapters written by experts from a variety of backgrounds Newly updated and revised this second edition includes coverage of the logistics of fresh produce from multiple perspectives postharvest handling under varying weather conditions quality control changes in consumer eating habits and other factors key to successful postharvest handling The ideal book for understanding the economic as well as physical impacts of postharvest

handling decisions Key Features Features contributions from leading experts providing a variety of perspectives Updated with 12 new chapters Focuses on application based information for practical implementation System approach is unique in the handling of fruits and vegetables

**Homo Deus** Yuval Noah Harari, 2017-02-21 Official U S edition with full color illustrations throughout NEW YORK TIMES BESTSELLER Yuval Noah Harari author of the critically acclaimed New York Times bestseller and international phenomenon Sapiens returns with an equally original compelling and provocative book turning his focus toward humanity s future and our quest to upgrade humans into gods Over the past century humankind has managed to do the impossible and rein in famine plague and war This may seem hard to accept but as Harari explains in his trademark style thorough yet riveting famine plague and war have been transformed from incomprehensible and uncontrollable forces of nature into manageable challenges For the first time ever more people die from eating too much than from eating too little more people die from old age than from infectious diseases and more people commit suicide than are killed by soldiers terrorists and criminals put together The average American is a thousand times more likely to die from binging at McDonalds than from being blown up by Al Qaeda What then will replace famine plague and war at the top of the human agenda As the self made gods of planet earth what destinies will we set ourselves and which quests will we undertake Homo Deus explores the projects dreams and nightmares that will shape the twenty first century from overcoming death to creating artificial life It asks the fundamental questions Where do we go from here And how will we protect this fragile world from our own destructive powers This is the next stage of evolution This is Homo Deus With the same insight and clarity that made Sapiens an international hit and a New York Times bestseller Harari maps out our future
