all programs result in improved outcomes RAND researchers identified 43 summer programs with positive outcomes that met the top three tiers of ESSA s evidence standards These programs were identified through an initial literature search of 3 671 citations and a full text review of 1 360 documents and address academic learning learning at home social and emotional well being and employment and career outcomes The authors summarize the evidence and provide detailed information on each of the 43 programs focusing on the evidence linking summer programs with outcomes and classifying the programs according to the top three evidence tiers strong moderate or promising evidence consistent with ESSA and subsequent federal regulatory guidance

Mechanical Metallurgy George Ellwood Dieter,David Bacon,1988-01-01 Air Force System Safety Handbook - Costs, Objectives, Policy and Process, Risk Assessment, Flight Mishaps, Analysis Techniques, Contractors, Nuclear and Explosive Hazards, Biomedical Safety U. S. Military,U. S. Air Force,Air Force Safety Agency,Department of Defense,2017-04-25 The Air Force System Safety Handbook was prepared as a resource document for program office system safety managers and system safety engineers It is not designed to answer every question on the topic of system safety nor is it a cookbook that guarantees success The handbook provides considerable insight to the general principles objectives and requirements of applying system safety concepts to the Air Force system acquisition and logistical support processes Programs vary greatly in their scope and complexity requiring a tailored system safety effort Assigned to this difficult task are military and government personnel with varied education and experience backgrounds These system safety practitioners need a comprehensive understanding of the system safety process and the complexities of applying it to a given program This handbook will assist in providing much of the necessary information but additional more detailed guidance will be required from the program office and their higher headquarters system safety experts The ultimate objective of any organization within the Air Force is maximizing combat capability One element in this maximizing process is protecting and conserving combat weapon systems and their support equipment Preventing mishaps and reducing system losses is one important aspect of conserving these resources System safety contributes to mishap prevention by minimizing system risks due to hazards consistent with other cost schedule and design requirements The fundamental objective of system safety is to identify eliminate or control and document system hazards
