

Amoeba Sisters Video SELECT Recap: Excretory System and the Nephron

1. What are two major functions that the excretory system will perform?

2. Other than the kidneys, what other organs are part of the excretory system? Name at least two.

3. What is a nephron?

4. The urinary system can be considered part of the excretory system. On the image below of the urinary system, please label the kidneys, ureters, bladder, and testes.

Now it's time to explore the structures and events occurring in the nephron, which you already defined in #3.

5. On the diagram at right, please label the glomerulus, Bowman's capsule, and proximal tubule. Please check here after adding labels: _____

6. Blood pressure forces fluid from the blood in the glomerulus into the Bowman's capsule where it will be the filtrate. Name at least six things that can be found in the filtrate.

Proximal Tubule

7. From the proximal tubule, name at least 5 things in the video that will travel to the interstitial fluid and be reabsorbed (meaning: it will remain in body)?

8. Name two items that will be secreted? (thus, moving into the nephron)

Excretory System Answer Key

Roland N. Pittman

Excretory System Answer Key

Biology for AP ® Courses Julianne Zedalis, John Eggebrecht, 2017-10-16 Biology for AP courses covers the scope and sequence requirements of a typical two semester Advanced Placement biology course The text provides comprehensive coverage of foundational research and core biology concepts through an evolutionary lens Biology for AP Courses was designed to meet and exceed the requirements of the College Board s AP Biology framework while allowing significant flexibility for instructors Each section of the book includes an introduction based on the AP curriculum and includes rich features that engage students in scientific practice and AP test preparation it also highlights careers and research opportunities in biological sciences

Anatomy and Physiology of Animals J. Ruth Lawson, 2011-09-11 This book is designed to meet the needs of students studying for Veterinary Nursing and related fields It may also be useful for anyone interested in learning about animal anatomy and physiology It is intended for use by students with little previous biological knowledge The book has been divided into 16 chapters covering fundamental concepts like organic chemistry body organization the cell and then the systems of the body Within each chapter are lists of Websites that provide additional information including animations

Encyclopedia of Animal Cognition and Behavior Jennifer Vonk, Todd Shackelford, 2022-04-01 This encyclopedia representing one of the most multi disciplinary areas of research is a comprehensive examination of the key areas in animal cognition and behavior It will serve as a complementary resource to the handbooks and journals that have emerged in the last decade on this topic and will be a useful resource for student and researcher alike With comprehensive coverage of this field key concepts will be explored These include social cognition prey and predator detection habitat selection mating and parenting development genetics physiology memory learning and perception Attention is also given to animal human co evolution and interaction and animal welfare All entries are under the purview of acknowledged experts in the field

Anatomy and Physiology J. Gordon Betts, Peter DeSaix, Jody E. Johnson, Oksana Korol, Dean H. Kruse, Brandon Poe, James A. Wise, Mark Womble, Kelly A. Young, 2013-04-25

Concepts of Biology Samantha Fowler, Rebecca Roush, James Wise, 2023-05-12 Black white print Concepts of Biology is designed for the typical introductory biology course for nonmajors covering standard scope and sequence requirements The text includes interesting applications and conveys the major themes of biology with content that is meaningful and easy to understand The book is designed to demonstrate biology concepts and to promote scientific literacy

The Human Body: Digestive, Circulatory, Reproductive, & Excretory Systems, **Circulatory, Digestive & Reproductive Systems: Skin, Liver & Lungs Gr. 5-8** Susan Lang, 2015-09-01 This is the chapter slice The Excretory System Skin Liver Lungs from the full lesson plan Circulatory Digestive Reproductive Systems How can you tell the difference between an artery and a vein Our resource tells you how Learn the major organs of four body systems and how they work to keep us alive and healthy We begin with

blood blood vessels and the heart Next we follow the path food takes from the mouth to the large intestine and find out how food is turned into fuel Then it s on to how the liver lungs and skin all help rid our body of toxins We look inside the kidneys and intestines and finish with how a tiny sperm and egg cell can grow into a baby Reading passages student activities test prep and color mini posters all included All of our content is aligned to your State Standards and are written to Bloom s Taxonomy and STEM initiatives Circulatory, Digestive & Reproductive Systems: Heart Gr. 5-8 Susan Lang,2015-09-01 This is the chapter slice The Circulatory System Heart from the full lesson plan Circulatory Digestive Reproductive Systems How can you tell the difference between an artery and a vein Our resource tells you how Learn the major organs of four body systems and how they work to keep us alive and healthy We begin with blood blood vessels and the heart Next we follow the path food takes from the mouth to the large intestine and find out how food is turned into fuel Then it s on to how the liver lungs and skin all help rid our body of toxins We look inside the kidneys and intestines and finish with how a tiny sperm and egg cell can grow into a baby Reading passages student activities test prep and color mini posters all included All of our content is aligned to your State Standards and are written to Bloom s Taxonomy and STEM initiatives **Circulatory, Digestive & Reproductive Systems: Blood Gr. 5-8** Susan Lang,2015-09-01 This is the chapter slice The Circulatory System Blood from the full lesson plan Circulatory Digestive Reproductive Systems How can you tell the difference between an artery and a vein Our resource tells you how Learn the major organs of four body systems and how they work to keep us alive and healthy We begin with blood blood vessels and the heart Next we follow the path food takes from the mouth to the large intestine and find out how food is turned into fuel Then it s on to how the liver lungs and skin all help rid our body of toxins We look inside the kidneys and intestines and finish with how a tiny sperm and egg cell can grow into a baby Reading passages student activities test prep and color mini posters all included All of our content is aligned to your State Standards and are written to Bloom s Taxonomy and STEM initiatives *Circulatory, Digestive & Reproductive Systems: The Reproductive System Gr. 5-8* Susan Lang,2015-09-01 This is the chapter slice The Reproductive System from the full lesson plan Circulatory Digestive Reproductive Systems How can you tell the difference between an artery and a vein Our resource tells you how Learn the major organs of four body systems and how they work to keep us alive and healthy We begin with blood blood vessels and the heart Next we follow the path food takes from the mouth to the large intestine and find out how food is turned into fuel Then it s on to how the liver lungs and skin all help rid our body of toxins We look inside the kidneys and intestines and finish with how a tiny sperm and egg cell can grow into a baby Reading passages student activities test prep and color mini posters all included All of our content is aligned to your State Standards and are written to Bloom s Taxonomy and STEM initiatives Circulatory, Digestive & Reproductive Systems: Mouth to Stomach Gr. 5-8 Susan Lang,2015-09-01 This is the chapter slice The Digestive System Mouth to Stomach from the full lesson plan Circulatory Digestive Reproductive Systems How can you tell the difference between an artery and a vein Our resource tells you how

Learn the major organs of four body systems and how they work to keep us alive and healthy We begin with blood blood vessels and the heart Next we follow the path food takes from the mouth to the large intestine and find out how food is turned into fuel Then it s on to how the liver lungs and skin all help rid our body of toxins We look inside the kidneys and intestines and finish with how a tiny sperm and egg cell can grow into a baby Reading passages student activities test prep and color mini posters all included All of our content is aligned to your State Standards and are written to Bloom s Taxonomy and STEM initiatives *Circulatory, Digestive & Reproductive Systems: Blood Vessels Gr. 5-8* Susan Lang,2015-09-01 This is the chapter slice The Circulatory System Blood Vessels from the full lesson plan Circulatory Digestive Reproductive Systems How can you tell the difference between an artery and a vein Our resource tells you how Learn the major organs of four body systems and how they work to keep us alive and healthy We begin with blood blood vessels and the heart Next we follow the path food takes from the mouth to the large intestine and find out how food is turned into fuel Then it s on to how the liver lungs and skin all help rid our body of toxins We look inside the kidneys and intestines and finish with how a tiny sperm and egg cell can grow into a baby Reading passages student activities test prep and color mini posters all included All of our content is aligned to your State Standards and are written to Bloom s Taxonomy and STEM initiatives **Regulation of Tissue Oxygenation, Second Edition** Roland N. Pittman,2016-08-18 This presentation describes various aspects of the regulation of tissue oxygenation including the roles of the circulatory system respiratory system and blood the carrier of oxygen within these components of the cardiorespiratory system The respiratory system takes oxygen from the atmosphere and transports it by diffusion from the air in the alveoli to the blood flowing through the pulmonary capillaries The cardiovascular system then moves the oxygenated blood from the heart to the microcirculation of the various organs by convection where oxygen is released from hemoglobin in the red blood cells and moves to the parenchymal cells of each tissue by diffusion Oxygen that has diffused into cells is then utilized in the mitochondria to produce adenosine triphosphate ATP the energy currency of all cells The mitochondria are able to produce ATP until the oxygen tension or PO₂ on the cell surface falls to a critical level of about 4.5 mm Hg Thus in order to meet the energetic needs of cells it is important to maintain a continuous supply of oxygen to the mitochondria at or above the critical PO₂ In order to accomplish this desired outcome the cardiorespiratory system including the blood must be capable of regulation to ensure survival of all tissues under a wide range of circumstances The purpose of this presentation is to provide basic information about the operation and regulation of the cardiovascular and respiratory systems as well as the properties of the blood and parenchymal cells so that a fundamental understanding of the regulation of tissue oxygenation is achieved **Circulatory, Digestive & Reproductive Systems: Kidneys & Large Intestine Gr. 5-8** Susan Lang,2015-09-01 This is the chapter slice The Excretory System Kidneys Large Intestine from the full lesson plan Circulatory Digestive Reproductive Systems How can you tell the difference between an artery and a vein Our resource tells you how Learn the major organs of four body systems and

how they work to keep us alive and healthy We begin with blood blood vessels and the heart Next we follow the path food takes from the mouth to the large intestine and find out how food is turned into fuel Then it s on to how the liver lungs and skin all help rid our body of toxins We look inside the kidneys and intestines and finish with how a tiny sperm and egg cell can grow into a baby Reading passages student activities test prep and color mini posters all included All of our content is aligned to your State Standards and are written to Bloom s Taxonomy and STEM initiatives

Circulatory, Digestive & Reproductive Systems: The Excretory System - Skin, Liver & Lungs - Google Slides Gr. 5-8 Susan Lang,2022-11-22 This is a Google Slides version of the The Excretory System Skin Liver Lungs chapter from the full lesson plan Circulatory Digestive Reproductive Systems Our resource breaks down each system of the human body to make it easier to understand as a whole Travel through the excretory system to learn about all the different organs that help us get rid of waste All of our content is reproducible and aligned to your State Standards and are written to Bloom s Taxonomy About GOOGLE SLIDES This resource is for Google Slides use Google Slides is free with a Google email account We recommend having Google Classroom in addition to Google Slides to optimize use of this resource This will allow you to easily give assignments to students with a click of a button This resource is comprised of interactive slides for students to complete activities right on their device It is ideal for distance learning as teachers can share the resource remotely with their students have them complete it and return where the teacher can mark it from any location What You Get An entire Google Slides presentation with reading passages comprehension questions and drag and drop activities that students can edit and send back to the teacher A start up manual including a Teacher Guide on how to use Google Slides for your classroom and an Answer Key to go along with the activities in the Google Slides document

Excretory System Lorrie Klosterman,2010 Discusses the composition and function of the excretory system within the human body

Circulatory, Digestive & Reproductive Systems: The Excretory System - Kidneys & Large Intestine - Google Slides Gr. 5-8 Susan Lang,2022-11-22 This is a Google Slides version of the The Excretory System Kidneys Large Intestine chapter from the full lesson plan Circulatory Digestive Reproductive Systems Our resource breaks down each system of the human body to make it easier to understand as a whole Build a model of a kidney to see it working in action All of our content is reproducible and aligned to your State Standards and are written to Bloom s Taxonomy About GOOGLE SLIDES This resource is for Google Slides use Google Slides is free with a Google email account We recommend having Google Classroom in addition to Google Slides to optimize use of this resource This will allow you to easily give assignments to students with a click of a button This resource is comprised of interactive slides for students to complete activities right on their device It is ideal for distance learning as teachers can share the resource remotely with their students have them complete it and return where the teacher can mark it from any location What You Get An entire Google Slides presentation with reading passages comprehension questions and drag and drop activities that students can edit and send back to the teacher A start up manual including a Teacher Guide on how to
