Gupta,1983 *Fundamental of Research Methodology and Statistics* Yogesh Kumar Singh,2006-12 The book approaches research from a perspective different from

that taken in other educational research textbooks The goal is to show educators that the application of research principles can make them more effective in their job of promoting learning The basic point is that we do not have to stop teaching to do research research is something we can do while teaching and if we do good research we will do better teaching This book includes most of the topics treated in traditional educational research books but in a different order and with a different emphasis The important content consists of
