This is a book full of tips, tricks, and resources for women who are either working as business owners, or thinking of starting up their own business. Natalie shares things that work for her, and stories from other successful women entrepreneurs, as well. The Tactical Guide to Women delivers a solid plan for allowing the right women into your life, and keeping the wrong ones at a safe distance. From driverless cars to pilotless planes, many functions that have previously required human labor can now be performed using artificial intelligence. For businesses, this use of AI results in reduced labor costs and, even more important, creating a competitive advantage. How does one look at any organization and begin the work of automating it in sensible ways? This book provides the blueprint for automating critical business functions of all kinds. It outlines the skills and technologies that must be brought to bear on replicating human-like thinking and judgment in the form of algorithms. Many believe that algorithm design is the exclusive purview of computer scientists and experienced programmers. This book aims to dispel that notion. An algorithm is merely a set of rules, and anyone with the ability to envision how different components of a business can interact with other components already has the ability to work in algorithms. Though many fear that the use of automation in business means human labor will no longer be needed, the author argues that organizations will re-purpose humans into different roles under the banner of automation, not simply get rid of them. He also identifies parts of business that are best targeted for automation. This book will arm business people with the tools needed to automate companies, making them perform better, move faster, operate cheaper, and provide great lasting value to investors. How to Have Great Ideas is the essential guide for students and young professionals looking to embrace creative thinking in design, advertising and communications. It provides 53 practical strategies for unlocking innovative ideas. Strategies include improvisation techniques, changing the scenery, finding hidden links, looking to nature for inspiration, combining unusual systems, challenging set boundaries and many more. Each strategy is packed with great examples of successful contemporary and historical designs – from a designer dress made out of an old typewriter to ticket machines powered by recycled bottles in China, via the reimagining of famous brand logos and mis-use of photocopiers. Packed with practical projects to kick-start inventive thought in idea-blocked moments, this book explores creative thinking across all visual arts disciplines. Is this the year you are finally going to share your message with the world? Don't let the idea of having to write a book hold you back. It's easier than you think, and you don't even have to actually write the book yourself... Never thought about writing a book? Maybe you should consider it! Publishing a book will give you expert status, help spread your message and increase sales of your other products and services. It may even kick-start or boost your public speaking career. Writing, publishing and promoting a book has never been easier. You can do it in a week. This guide will teach you: The best kept secrets to a quick start for writing, promotion and sales Smart writing process hacks Alternatives to writing the book yourself Self-publishing The keys to launching a successful book, superfast "I just published my book. What I haven't been able to achieve in the past three years I did in just 7 days!" Chris About the authors Esther Jacobs (The Netherlands, 1970) is an international (TEDx) speaker and author. Esther has given over 1000 keynotes and is (co)author of 21 books.

Her workshops have helped over 400 entrepreneurs to write their book. The NO EXCUSES LADY helps leaders and entrepreneurs to transform their challenges into opportunities. Marie Stern (Germany, 1982) is an "Amazon Self-Publishing Ninja." She authored 7 bestselling Amazon books, even though she wasn't even good at writing in school. However, she spent many hours browsing and reading in bookstores, discovering the secret behind successful books. As a former data mining analyst, she knows how important research is and how to find structure in any process. Marie helped many non-writers have their book written and likes to share her best knowledge on how to self-publishing and sell books. Esther and Marie met at a conference, where they were giving a book writing workshop. They decided to write this book in just one day, using their own tested method. And now they're inviting you to try it, too! All students and professors need to write, and many struggle to finish their stalled dissertations, journal articles, book chapters, or grant proposals. Writing is hard work and can be difficult to wedge into a frenetic academic schedule. In this practical, light-hearted, and encouraging book, Paul Silvia explains that writing productively does not require innate skills or special traits but specific tactics and actions. Drawing examples from his own field of psychology, he shows readers how to overcome motivational roadblocks and become prolific without sacrificing evenings, weekends, and vacations. After describing strategies for writing productively, the author gives detailed advice from the trenches on how to write, submit, revise, and resubmit articles, how to improve writing quality, and how to write and publish academic work. Young readers will learn all about eating worms in this disgustingly entertaining book by completing fun, challenging lessons and activities provided in this digital instructional guide for literature. These rigorous, cross-curricular lessons and activities work in conjunction with the text to teach students how to comprehend complex literature and help them understand the significance of the story. This e-book resource is packed with tools to teach students how to analyze story elements in multiple ways, practice close reading and text-based vocabulary, determine meaning through text-dependent questions, and more. This is the perfect way to add rigor to your students' explorations of rich, complex literature. The how-to guide for your career In his previous book, Lose the Resume, Land the Job, author Gary Burnison exposed the myths and the ineffective thinking around how to land the job you really want. Now, in Advance, he takes readers through the next stage—advancing in their careers. Advance is extremely timely and topical in today's do-it-yourself career development world. Average job tenure has fallen to about four years on average and often only one or two years for younger professionals. These "career nomads" simply aren't around long enough to access career development from their employers. On the other end of the workplace spectrum, many employees find themselves stuck in one job without a promotion, without any raise to speak of, and with no opportunities to learn and grow. In Advance, Burnison lays out a mosaic of "how-to" advice that applies every day and at every level—the skills and behaviors that help people navigate their careers and stand out among the crowd. He takes on a "Top 20" of career must-haves: managing for the first time, engaging in the "money conversation" with your boss, dealing with difficult bosses (without quitting), coping with coworkers (without losing your mind), making presentations (that don't put people to sleep), mastering digital communication (and avoiding emails that will get you fired), thinking globally (without leaving your office), taking an overseas assignment, meeting senior leaders for the first time (without putting your foot in your mouth), navigating political waters (without sinking your career), reading and fitting in with the culture, and more. • Wisdom on taking your career to the next level • Career development tips • Guidance on being seen and heard • Written by the CEO of one of the world's largest management consulting firms Whether you're just starting your career, high up on the ladder, or "stuck" anywhere in between, Advance gives you the know-how to get on a path to where you want to go. The How to Guide - Establishing Goals focuses on helping individuals just like you in not only identifying and establishing goals but developing a plan of action to accomplish those goals. "This is a new edition of The Scientists Guide to Writing, published in 2016. As a reminder the book provided practical advice on writing, covering topics including how to generate and maintain writing momentum, tips on structuring a scientific paper, revising a first draft, handling citations, responding to peer reviews, and managing coauthorships, among other topics. For the 2nd edition, Heard has made several changes, specifically: - expanding the chapter on writing in English for non-native speakers - adding two chapters: one on efficient and effective reading and one on selecting the right journal and how to use preprint sites. - doubled the number of exercises - various other add-ons to existing chapters, including information on reporting statistical results, handling disagreement among peer reviewers, and managing co-authorships"-- Why Create a Pega How-to Guide? With the Debunkum Beaver Pega How-to Guide series, you would have an arsenal of tools at your disposal. Whenever there is a new project, or a new feature required, all you have to do is just to pull out one of these guides. Can you visualise a situation, where all similar features have the same way of implementation, with the same sequence of steps and number of rules; and anyone who looked at the rules knew exactly how and why each rule was implemented as such; any deviations and bugs that were introduced due to carelessness would simply stand out by itself, easily identifiable and easy to fix, wouldn't this be a wonderful Pega World? Well, that is the core objective of the Debunkum Beaver Pega How-to Guide series! Introduction to Debunkum Beaver Pega How-to Guide: Creating REST Service and REST Connector (Master Beaver Version) REST stands for "Representational State Transfer", it is a software architectural style that defines a set of constraints to be used for creating Web services. In this How-to Guide, the author demonstrates how to use Pega to create REST service as well as REST connector. REST/JSON is gaining traction, both for its ease of implementation as well as for its ease of consumption. With Pega, it is now so much easier to implement both REST service and REST connector. If you want to learn advanced knowledge of REST and/or are considering taking CLSA, then you should get the Master Beaver Version, in which additional tips and tricks of using Pega are discussed, including: security, removing the "pxObjClass" in the REST response, using external tool such as Postman, and many more! This guide is a basic structure of the apprenticeship. It is a guide for the Master to keep a structure of instruction and a consistent curriculum. It is a guide for the apprentice to develop as a tattoo artist and gain credibility. I wrote this guide for the sole purpose of what I expected from my apprenticeship, and how I could make sure my apprentice are completely competent of all aspects of a tattoo parlor. I feel this guide has a sound structure for all Masters to follow. This industry is booming and as Masters, we need to set higher standards of qualifications as a must. We need to demand more before they walk through the door. If a person seeks employment and has little knowledge of the trade or a small tattoo portfolio, guide the person in the direction of an apprenticeship. I can be confident with this curriculum each and every time the apprentice should have strict criteria to follow. I was an apprentice under two different Masters. Each Master taught different attributes of our field, first two years were shop structure and basic tattooing procedures. If it wasn't for this opportunity, the other door would have never presented itself. For this I am grateful. Now my second two year apprenticeship came to me just the same as the first, as if by fate. I was at a real low point in my career and just at that point of uncertainty I was approached by a big red headed dude at the local diner. He acquired about a piece on my neck and gave his compliments to the artist. He left me his card and urged me to call him. I had nothing to lose, and two days later I made that call and made an appointment to come see him. I was not there in his shop all but twenty minutes when he just burst out with I might be looking for an apprentice! and getting approval of acceptance from his wife, I was given another opportunity. This curriculum sets a clear standard of what each apprentice should be taught. This is an instructional guide for keeping the apprentice on track. This is a review book for those lead artist interested in taking on an apprentice. I set the professional standard of curriculum for my shop. What do you use for yours? There is so much history about art, not including the amazing tattoo artists that bring the art to life. Let us set our entry level standard for apprenticeship

higher and keep this curriculum mandatory, as our own professional standard of all tattoo artist. Some Masters focus on shop function, others focus on procedures some Masters have sacred trade secrets, no matter the Masters instructional guidance now we all have a professional standard of curriculum. My hope is that all Masters share the same knowledge with each apprentice and pass down too generations to come. I wrote this guide to help me with the knowledge of what I needed to know to guide my apprentice, if this helps you be a better Master and gives your apprentice a better understanding of what is expected. It can turn a long hard road into a nice cool breeze for every apprentice. Travel the world and discover a job you love.
