Ambulatory Peritoneal Dialysis M.M. Avram, C. Giordano, 2012-12-06 The Fourth International Congress of Peritoneal Dialysis was held in Venice Italy June 29 to July 2 1987 By this time peritoneal dialysis had emerged as a treatment for a substantial fraction of patients with end stage renal disease and countless numbers of patients with acute renal failure This treatment is now practiced worldwide and is the life sustaining treatment for about 40 000 patients with chronic renal failure representing 15 to 20% of dialysis therapy in about 1000 centers It is not surprising therefore that the number of health

professionals engaged in the investigation and the application of the treatment has also grown exponentially. The First International Symposium on Peritoneal Dialysis organized by Dr A Treviño Becerra in Chapala Mexico in 1978 brought together a group of pioneers when continuous ambulatory peritoneal dialysis was in its infancy. In 1981 Dr G M Gahl chaired the Second Symposium in West Berlin when the technique and professional interest were growing considerably. By 1984 when Dr I F Winchester and I organized the Third Symposium the presented papers exceeded 100 and there were about 1000 attendees. At that time it was deemed appropriate to form a more organized group and the International Society for Peritoneal Dialysis was founded. One of the first actions of the Society was to choose from among several applicants Dr
