Fishers, Monks and Cadres Edyta Roszko,2021-03-31 This remarkable and timely ethnography explores how fishing communities living on the fringe of the South China Sea in central Vietnam interact with state and religious authorities as well as their farmer neighbors even while handling new geopolitical challenges The focus is mainly on marginal people and their navigation between competing forces over the decades of massive change since their incorporation into the Socialist Republic of Vietnam in 1975 The sea however plays a major role in this study as does the location a once peripheral area now at the center of a global struggle for sovereignty influence and control in the South China Sea The coastal fishing communities at the heart of this study are peripheral not so much because of geographical remoteness as their presumed social awkwardness they only partially fit into the social imaginary of Vietnam s territory and nation The state thus tries to incorporate them through various cultural agendas while religious reformers seek to purify their religious practices Yet recently these communities have also come to be seen as guardians of an ancient fishing culture important in Vietnam s resistance to Chinese claims over the South China Sea The fishers have responded to their situation with a blend of conformity co option and subtle indiscipline A complex triadic relationship is at play here Within it are various shifting binaries for example secular religious fishers farmers local ritual Buddhist doctrine and so forth and different protagonists state officials religious figures fishermen and women who construct enact and deconstruct these relations in shifting alliances and changing contexts Fishers Monks and Cadres is a significant new work Its vivid portrait of local beliefs and practices makes a powerful argument for looking beyond monolithic religious traditions Its triadic analysis and subtle use of binaries offer startlingly fresh ways to view Vietnamese society and local political power The book demonstrates Vietnam is more than urban and agrarian society in the Red River Basin and Mekong Delta Finally the author builds on intensive long term research to portray a region at the forefront of geopolitical struggle offering insights that will be fascinating and revealing to a much broader readership
