Sedgwick,2020-06-15 Contextual Transactional Analysis The Inseparability of Self and World offers a novel and comprehensive reworking of key concepts in transactional analysis offering insight into the causes of psychological distress and closing the gap between training and

clinical practice By providing a bigger picture as much sociological as psychological of what it means to be human the book makes an essential contribution to current debates about how best to account for and work with the social and cultural dimensions of client experience James M Sedgwick captures the ongoing importance of what happens around us and the distinctive kinds of psychological distress that arise from persistent and pervasive environmental disadvantage Beginning with a view of people as always situated and socialised the book highlights the many ways that the world always and everywhere constrains or enables thought and action Ranging through ideas about the kinds of contextual conditions which might make psychological distress more likely and illuminating the complex relationship between socialisation and autonomy the book suggests what the implications of these conclusions might be for clinical understanding and practice Sedgwick's insightful and compassionate work revises the theoretical framework fills a current gap in the clinical literature and points the way to greater practitioner efficacy Contextual Transactional Analysis will be an insightful addition to the literature for transactional analysts in practice and in training for professionals interested in the theory and practice of transactional analysis and anyone seeking to understand the contribution of context to psychological distress See the below link for an interview about the book with Mark Head <https://vimeo.com/488738427> [Success Through Transactional Analysis](#) Jut Meininger, 1973 USA Monograph on the transactional analysis approach to human relations problems in management covers the psychological aspects of employee motivation etc and suggests techniques for changing unsuccessful patterns of behaviour and improving managerial decision making References
