Conflicts and Conspiracies May 10 2024 A study of Brazil during a critical formative period which illuminates the causes of her special historical development within Latin America. Professor Maxwell analyzes the shifting relationships between Portugal, England and Brazil during the second half of the 18th Century. Through his study, Professor Maxwell is concerned with the social, economic and political significance of the events he describes. An important part of this work is a study of the Minas Conspiracy of 1788-89.

IBM Platform Computing Solutions for High Performance and Technical Computing Workloads Feb 07 2024 This IBM® Redbooks® publication is a refresh of IBM Technical Computing Clouds, SG24-8144, Enhance Inbound and Outbound Marketing with a Trusted Single View of the Customer, SG24-8173, and IBM Platform Computing Integration Solutions, SG24-8081, with a focus on High Performance and Technical Computing on IBM Power Systems™. This book describes synergies across the IBM product portfolio by using case scenarios and showing solutions such as IBM

Spectrum™ Scale (formerly GPFSTM). This book also reflects and documents the IBM Platform Computing Cloud Services as part of IBM Platform Symphony® for analytics workloads and IBM Platform LSF® (with new features, such as a Hadoop connector, a MapReduce accelerator, and dynamic cluster) for job scheduling. Both products are used to help customers schedule and analyze large amounts of data for business productivity and competitive advantages. This book is targeted at technical professionals (consultants, technical support staff, IT Architects, and IT Specialists) that are responsible for delivering cost-effective cloud services and big data solutions on IBM Power Systems to uncover insights among client data so that they can take actions to optimize business results, product development, and scientific discoveries.

Chemical Solution Synthesis for Materials Design and Thin Film Device Applications Nov 04 2023
Chemical Solution Synthesis for Materials Design and Thin Film Device Applications presents current research on wet chemical techniques for thin-film based devices. Sections cover the quality of thin films, types of common films used in devices, various thermodynamic properties, thin film patterning, device configuration and applications. As a whole, these topics create a roadmap for developing new materials and incorporating the results in device fabrication. This book is suitable for graduate, undergraduate, doctoral students, and researchers looking for quick guidance on material synthesis and device fabrication through wet chemical routes. Provides the different wet chemical routes for materials synthesis, along with the most relevant thin film structured materials for device applications. Discusses patterning and solution processing of inorganic thin films, along with solvent-based processing techniques. Includes an overview of key processes and methods in thin film synthesis, processing and device fabrication, such as nucleation, lithography and solution processing.

Financial Management Apr 28 2023 A discipline is a fusion of financial theory (with its origins in

economics) and financial analysis (which is linked to accounting). Explores the underlying theories of corporate finance and examines the application of these theories in the Southern African context.

The SAGE Encyclopedia of War: Social Science Perspectives Aug 09 2021 Traditional explorations of war look through the lens of history and military science, focusing on big events, big battles, and big generals. By contrast, The SAGE Encyclopedia of War: Social Science Perspective views war through the lens of the social sciences, looking at the causes, processes and effects of war and drawing from a vast group of fields such as communication and mass media, economics, political science and law, psychology and sociology. Key features include: More than 650 entries organized in an A-to-Z format, authored and signed by key academics in the field Entries conclude with cross-references and further readings, aiding the researcher further in their research journeys An alternative Reader's Guide table of contents groups articles by disciplinary areas and by broad themes A helpful Resource Guide directing researchers to classic books, journals and electronic resources for more in-depth study This important and distinctive work will be a key reference for all researchers in the fields of political science, international relations and sociology.

Science, Technology and Medicine in the Making of Lisbon (1840–1940) Mar 28 2023 This volumes presents the first urban history of science, technology, and medicine in Lisbon, 1840-1940. It reveals how science, technology and medicine permeated even the most unlikely aspects of the urban landscape in an environment that was simultaneously a port city, scientific capital and imperial metropolis.

IBM Software Defined Infrastructure for Big Data Analytics Workloads Sep 02 2023 This IBM® Redbooks® publication documents how IBM Platform Computing, with its IBM Platform Symphony® MapReduce framework, IBM Spectrum Scale (based Upon IBM GPFS™), IBM

Platform LSF®, the Advanced Service Controller for Platform Symphony are work together as an infrastructure to manage not just Hadoop-related offerings, but many popular industry offerings such as Apache Spark, Storm, MongoDB, Cassandra, and so on. It describes the different ways to run Hadoop in a big data environment, and demonstrates how IBM Platform Computing solutions, such as Platform Symphony and Platform LSF with its MapReduce Accelerator, can help performance and agility to run Hadoop on distributed workload managers offered by IBM. This information is for technical professionals (consultants, technical support staff, IT architects, and IT specialists) who are responsible for delivering cost-effective cloud services and big data solutions on IBM Power Systems™ to help uncover insights among client's data so they can optimize product development and business results.

Its Excellency the Mathemafia: An Educated Approach to the American School of Fake Mathematics
Jun 30 2023 The author's biographical note is supposed to make it pretty clear why he was led to write this book in a language almost completely foreign to his everyday world. This book is the offspring of two different states of mind; initially, in the spring of 2020, the purpose was to overcome the boresome loneliness of the confinement imposed by the widespread pandemic; and thus an argumentative essay was constructed, titled — in a rather technical style: The exact triangulation of the semicircle in the 20th century USA — and eventually uploaded, as a critical paper, on the Academia.edu internet platform. Then suddenly, last autumn, the surprising news that a pirated edition of this article was being sold in Central Europe (in Germany and Switzerland, at least) in e-book format, seemingly an auspicious omen, rang a bell: the main project was feasible. The main project, now the purpose of this book, is to document global citizenship about a well-hidden case of corporate wrongdoing. Really, never in the history of science, not even in the time of the Pythagoreans twenty-five centuries ago, has a

corporation of scientists ever gone so far in covering up a scientific feat owing to mere and vulgar sectarianism as the various guilds of mathematicians, principally the International Mathematical Union, over the last four decades. On a certain page of this book, the reader will find, written in just two lines of text in elementary symbolic notation, a mathematical proof dating from the late 1970s which the international scientific communities in the field and not only had been looking for since 1665... and was then buried alive. To definitely and openly prove that proof wrong or, if impossible, to definitely, competently and honestly recognize its perfect exactness is the challenge left here to the IMU as the champion of all mathematical societies in the world: in a word, to this august, long-stealthy Mathemafia.

The Foreign Companies in Brazil Yearbook May 18 2022

South African national bibliography Oct 11 2021 Classified list with author and title index.

Global Challenges of Climate Change, Vol.1 Oct 23 2022 This two-volume book offers a broad range of discussions on the immense challenge of climate change, one confronting every country on the planet and forcing them to find a path towards a sustainable future that will not have disastrous consequences in relation to our chances of survival. It also presents a snapshot of the status quo, which reflects all the decisions and measures taken to date. Analyzing the consequences of the steps that will shape our future, the two volumes also reflect on important decisions at a global level that have already been taken. In this first volume on green energy, decarbonization, and forecasting the green transition, respected international scholars analyze various technical aspects of and alternatives to the so-called “green energy transition,” as well as measures intended to help reach the ambitious goal of net zero emissions within the next thirty years. Throughout the 13 chapters, the authors forecast future scenarios for the use of alternative energy sources. Additionally, the book discusses questions

regarding the suitability of current measures and presents innovative alternatives that have remained largely overlooked. This book is a must-read for scholars, researchers and students, as well as policymakers interested in a better understanding of climate change, present scenarios, and alternative solutions and measures.

From Vernacular to World Heritage Oct 03 2023 This publication brings together the results of the project 3DPAST: Living and virtual visiting European World Heritage, co-funded by the Creative Europe EU programme. The research highlighted the exceptional character and quality of living in vernacular dwellings found in World Heritage sites. This was possible by seizing the cultural space of European vernacular heritage, located in Pico island (Portugal), Cuenca town (Spain), Pienza (Italy), Old Rauma (Finland), Transylvania (Romania), Berat & Gjirokastra (Albania), Pátmos (Greece), and Upper Svaneti (Georgia). New digital realities grant the possibility to visit and to appreciate those places, to non-travelling audiences, who lack the opportunity to experience this unique heritage in situ. Creative potential is highlighted in 3D models and digital visualisations, which associate outstanding local knowledge with the vernacular expression of World Heritage.

Global Challenges of Climate Change, Vol.2 May 30 2023 This two-volume book offers a broad range of discussions on the immense challenge of climate change, one confronting every country on the planet and forcing them to find a path towards a sustainable future that will not have disastrous consequences in relation to our chances of survival. It also presents a snapshot of the status quo, which reflects all the decisions and measures taken to date. Analyzing the consequences of the steps that will shape our future, the two volumes also reflect on important decisions at a global level that have already been taken. This second volume on risks assessment and the political and social dimension of the green energy transition is structured into 14 chapters. International renowned scholars discuss the

inherent risks that arise in consequence of the transition to the intensive use of low carbon energy sources and global warming, risks related to food and water security, as well as risks of social and political conflicts. They further examine the dependence on individual countries' industrial structures and on their socio-economic development level as challenges to climate change solutions and to the global energy policy agenda. This book is a must-read for scholars, researchers and students, as well as policymakers interested in a better understanding of climate change, present scenarios, and alternative solutions and measures.

Fundamentals of Semiconductors Apr 16 2022 Excellent bridge between general solid-state physics textbook and research articles packed with providing detailed explanations of the electronic, vibrational, transport, and optical properties of semiconductors "The most striking feature of the book is its modern outlook ... provides a wonderful foundation. The most wonderful feature is its efficient style of exposition ... an excellent book." Physics Today "Presents the theoretical derivations carefully and in detail and gives thorough discussions of the experimental results it presents. This makes it an excellent textbook both for learners and for more experienced researchers wishing to check facts. I have enjoyed reading it and strongly recommend it as a text for anyone working with semiconductors ... I know of no better text ... I am sure most semiconductor physicists will find this book useful and I recommend it to them." Contemporary Physics Offers much new material: an extensive appendix about the important and by now well-established, deep center known as the DX center, additional problems and the solutions to over fifty of the problems at the end of the various chapters.

7 Fundamentals of an Operationally Excellent Management System Jan 26 2023 Developing and maintaining a disciplined management system provides any organization with a blueprint for exceptional performance and success. Indeed, for larger multinational corporations, a management

system is a critical component for sustainable growth and performance management. In this book, the authors discuss a series of fundamentals for creating an operationally excellent management system (OEMS). The book also examines the business performance impact of an OEMS across leading gas and oil organizations, such as Exxon Mobil, BP, Suncor, and Chevron. In *7 Fundamentals of an Operationally Excellent Management System*, the authors discuss each fundamental in detail and provide the supporting training and workshop materials that are essential for integrating these fundamentals into the business processes of the organization. The seven fundamentals identified by the authors provide a sequential approach for developing and executing an OEMS across any organization. Integrating sound organizational and business practices with personnel and process safety management principles, the book is an invaluable resource for organizations seeking operational discipline and excellence. Well-supported with graphics and practical examples, the book provides a simple pathway for an organization to evolve its management system into an OEMS designed to reduce workplace incidents and improve business performance on a sustainable basis. The management system principles discussed in the book are intended for the business leader who is motivated to transition his or her organization from ordinary, through best in class, to an organization of world-class stature and performance.

Implementing Data-Driven Strategies in Smart Cities Jul 20 2022 *Implementing Data-Driven Strategies in Smart Cities* is a guidebook and roadmap for practitioners seeking to operationalize data-driven urban interventions. The book opens by exploring the revolution that big data, data science, and the Internet of Things are making feasible for the city. It explores alternate topologies, typologies, and approaches to operationalize data science in cities, drawn from global examples including top-down, bottom-up, greenfield, brownfield, issue-based, and data-driven. It channels and expands on the classic

data science model for data-driven urban interventions – data capture, data quality, cleansing and curation, data analysis, visualization and modeling, and data governance, privacy, and confidentiality. Throughout, illustrative case studies demonstrate successes realized in such diverse cities as Barcelona, Cologne, Manila, Miami, New York, Nancy, Nice, São Paulo, Seoul, Singapore, Stockholm, and Zurich. Given the heavy emphasis on global case studies, this work is particularly suitable for any urban manager, policymaker, or practitioner responsible for delivering technological services for the public sector from sectors as diverse as energy, transportation, pollution, and waste management. Explores numerous specific urban interventions drawn from global case studies, helping readers understand real urban challenges and create data-driven solutions Provides a step-by-step and applied holistic guide and methodology for immediate application in the reader's own business agenda Presents cutting edge technology presentation with coverage of innovations such as the Internet of Things, robotics, 5G, edge/fog computing, blockchain, intelligent transport systems, and connected-automated mobility

Biomedical Engineering Systems and Technologies Dec 05 2023 This book constitutes the thoroughly refereed post-conference proceedings of the 5th International Joint Conference on Biomedical Engineering Systems and Technologies, BIOSTEC 2012, held in Vilamoura, Portugal, in February 2012. The 26 revised full papers presented together with one invited lecture were carefully reviewed and selected from a total of 522 submissions. The papers cover a wide range of topics and are organized in four general topical sections on biomedical electronics and devices; bioinformatics models, methods and algorithms; bio-inspired systems and signal processing; health informatics.

Sustainable Vernacular Architecture Apr 09 2024 ?This book discusses applying vernacular strategies to modern architectural design to adhere to basic green principles of energy efficiency and

materials utilization. Written from an international perspective, chapters present the perspectives and experiences of architects and engineers from across the globe. Historically successful approaches are integrated with modern design concepts to create novel, sustainable, and resource conscious solutions. The scope of topics covered include natural ventilation, cooling and heating, daylight and shading devices, and green micro-climate and functional facades, making this a useful reference for a wide range of researchers and workers in the built environment. Covers the most up-to-date research developments, best practices, and innovations from countries all over the globe; Presents the latest research in vernacular architecture and sustainable building; Contains case studies and examples to enhance practical application of the technologies presented.

The Angolan Mission Observer Jun 06 2021

TradeStation Made Easy! Sep 21 2022 Customize your trading plan for greater profits using the most popular charting software The majority of professional and individual traders use somekind of trading software on which to base their strategies. Withover 100,000 users, the most popular trading software today isTradeStation, published by TradeStation Technologies. While thissoftware is favored by many, TradeStation's computer language canbe confusing, especially for the novice. TradeStation Made Easy! is the first and only book to explainexactly how to use the unique computer language behind thisbestselling software program. It is not meant as a replacement forthe TradeStation manuals, instead it will cover the essence ofprogramming in EasyLanguage and focus on a consistent set of dataand an elementary system throughout. * An easily understood guide to TradeStation that also providestips for the user in designing a personalized trading system * Endorsed by the software provider TradeStationTechnologies * Written in a straightforward manner, that is accessible evenfor those with little computer experience TradeStation Made Easy! fills a much-needed gap in thisarea and

puts the basics of EasyLanguage in perspective. With it, you'll be able to write simple and intermediate programs that will accurately express your theories and ideas about whatever market interests you.

New Contributions in Information Systems and Technologies Jun 18 2022 This book contains a selection of articles from The 2015 World Conference on Information Systems and Technologies (WorldCIST'15), held between the 1st and 3rd of April in Funchal, Madeira, Portugal, a global forum for researchers and practitioners to present and discuss recent results and innovations, current trends, professional experiences and challenges of modern Information Systems and Technologies research, technological development and applications. The main topics covered are: Information and Knowledge Management; Organizational Models and Information Systems; Intelligent and Decision Support Systems; Big Data Analytics and Applications; Software Systems, Architectures, Applications and Tools; Multimedia Systems and Applications; Computer Networks, Mobility and Pervasive Systems; Human-Computer Interaction; Health Informatics; Information Technologies in Education; Information Technologies in Radio communications.

Global Challenges of Climate Change, Vol.1 Jul 08 2021 This two-volume book offers a broad range of discussions on the immense challenge of climate change, one confronting every country on the planet and forcing them to find a path towards a sustainable future that will not have disastrous consequences in relation to our chances of survival. It also presents a snapshot of the status quo, which reflects all the decisions and measures taken to date. Analyzing the consequences of the steps that will shape our future, the two volumes also reflect on important decisions at a global level that have already been taken. In this first volume on green energy, decarbonization, and forecasting the green transition, respected international scholars analyze various technical aspects of and alternatives to the so-called "green energy transition," as well as measures intended to help reach the ambitious goal of net zero

emissions within the next thirty years. Throughout the 13 chapters, the authors forecast future scenarios for the use of alternative energy sources. Additionally, the book discusses questions regarding the suitability of current measures and presents innovative alternatives that have remained largely overlooked. This book is a must-read for scholars, researchers and students, as well as policymakers interested in a better understanding of climate change, present scenarios, and alternative solutions and measures.

Progress in Digital and Physical Manufacturing Mar 16 2022 This book contains selected papers presented at the second international Conference on Progress in Digital and Physical Manufacturing (ProDPM'21), organized by the School of Technology and Management (ESTG) of the Polytechnic Institute of Leiria (IPL), from the 27th to 29th of October 2021. It represents a significant contribution to the current advances in digital and physical manufacturing issues as it contains topical research in this field. The book is an essential reading for all of those working on digital and physical manufacturing, promoting better links between the academia and the industry. The conference papers cover a wide range of important topics like biomanufacturing, advanced rapid prototyping technologies, rapid tooling and manufacturing, micro-fabrication, 3D CAD and data acquisition, and collaborative design.

Organizational Auditing and Assurance in the Digital Age Dec 25 2022 Auditing is constantly and quickly changing due to the continuous evolution of information and communication technologies. As the auditing process is forced to adapt to these changes, issues have arisen that lead to a decrease in the auditing effectiveness and efficiency, leading to a greater dissatisfaction among users. More research is needed to provide effective management and mitigation of the risk associated to organizational transactions and to assign a more reliable and accurate character to the execution of business

transactions and processes. *Organizational Auditing and Assurance in the Digital Age* is an essential reference source that discusses challenges, identifies opportunities, and presents solutions in relation to issues in auditing, information systems auditing, and assurance services and provides best practices for ensuring accountability, accuracy, and transparency. Featuring research on topics such as forensic auditing, financial services, and corporate governance, this book is ideally designed for internal and external auditors, assurance providers, managers, risk managers, academicians, professionals, and students.

Handbook of Research on Essential Information Approaches to Aiding Global Health in the One Health Context Jan 14 2022 Post COVID-19 pandemic, researchers have been evaluating the healthcare system for improvements that can be made. Understanding global healthcare systems' operations is essential to preventative measures to be taken for the next global health crisis. A key part to bettering healthcare is the implementation of information management and One Health. The *Handbook of Research on Essential Information Approaches to Aiding Global Health in the One Health Context* evaluates the concepts in global health and the application of essential information management in healthcare organizational strategic contexts. This text promotes understanding in how evaluation health and information management are decisive for health planning, management, and implementation of the One Health concept. Covering topics like development partnerships, global health, and the nature of pandemics, this text is essential for health administrators, policymakers, government officials, public health officials, information systems experts, data scientists, analysts, health information science and global health scholars, researchers, practitioners, doctors, students, and academicians.

New Perspectives in Information Systems and Technologies, Volume 2 Sep 09 2021 This book

contains a selection of articles from The 2014 World Conference on Information Systems and Technologies (WorldCIST'14), held between the 15th and 18th of April in Funchal, Madeira, Portugal, a global forum for researchers and practitioners to present and discuss recent results and innovations, current trends, professional experiences and challenges of modern Information Systems and Technologies research, technological development and applications. The main topics covered are: Information and Knowledge Management; Organizational Models and Information Systems; Intelligent and Decision Support Systems; Software Systems, Architectures, Applications and Tools; Computer Networks, Mobility and Pervasive Systems; Radar Technologies; Human-Computer Interaction; Health Informatics and Information Technologies in Education.

AI Innovation in Services Marketing Aug 01 2023 The emergence of artificial intelligence (AI) has ushered in a transformative wave, disrupting trends and reshaping the landscape of services marketing. As businesses grapple with the interplay between evolving consumer behaviors and the progression of AI, a critical need emerges for a guide to navigate this complex terrain. The stakes are high, and the challenges are multifaceted – from redefining customer experiences to addressing ethical considerations in the age of automation. In response to these pressing issues, *AI Innovation in Services Marketing* stands out as a source of insight, unraveling the complexity surrounding the integration of AI in services marketing. This book endeavors to equip readers with an understanding of how AI is not just a tool but a force driving profound transformation in services marketing. Through a lens focused on real-world examples and insightful case studies, it illuminates the impact of AI on productivity and customer experiences. Beyond the transformative power, the book grapples with the ethical considerations that arise in the wake of AI adoption in services marketing. It seeks to guide both academics and practitioners, offering a resource to harness AI strategically, optimize services, and

maintain a competitive edge in the global market.

Financial Management Nov 23 2022 Explores the underlying theories of finance, and examines the practical application of these theories in a southern African environment. The third edition has been restructured and includes additional chapters. Emphasis is placed on the use of computer spreadsheets for solving financial problems.

Comprehensive Dissertation Index Feb 12 2022

VERSUS: Heritage for Tomorrow Nov 11 2021 Vernacular architecture represents a great resource that has considerable potential to define principles for sustainable design and contemporary architecture. This publication is the result of an overall aim to produce a valuable tool for analysis regarding vernacular heritage through different assessments, in order to define principles to consider for sustainable development. This was possible through a comprehensive reflection on the principles established and the strategies to recognise in different world contexts. The present publication was the result of an in-depth approach by 46 authors from 12 countries, concerned with the analysis and critical assessment of vernacular heritage and its sustainable perspective. The book presents 8 chapters addressing operational definitions and synopses advances, regarding the main areas of vernacular heritage contribution to sustainable architecture. It also presents 15 chapters and 53 case studies of vernacular and contemporary approaches in all the 5 continents, regarding urban, architectural, technical and constructive strategies and solutions. **VERSUS, HERITAGE FOR TOMORROW: Vernacular Knowledge for Sustainable Architecture** is the result of a common effort undertaken by the partners ESG | Escola Superior Gallaecia, Portugal, as Project leader; CRAterre | École Nationale Supérieure d'Architecture de Grenoble, France; DIDA | Università degli Studi di Firenze, Italy; DICAAR | Università degli Studi di Cagliari, Italy; and UPV | Universitat Politècnica de València,

Spain. This is the final outcome of VerSus, an European project developed from 2012 to 2014, in the framework of the Culture 2007-2013 programme.

Signal Jan 31 2021

Beyond Earnings May 06 2021 *Beyond Earnings* is targeted at investors, financial professionals, and students who want to improve their ability to analyze financial statements, forecast cash flows, and ultimately value a company. The authors demonstrate that reported earnings are easily gamed by accounting shenanigans and reveal how commonly used profitability measures such as return on equity can be misleading. Because earnings and P/E ratios are too unreliable for valuation, this book takes you beyond earnings and shows you how to apply the HOLT CFROI and Economic Profit framework in a step-by-step manner. A better measure of profitability results in improved capital allocation decisions and fundamental valuations. This ground-breaking book offers the first practical in-depth discussion of how profitability and growth fade, and shows how to put this information to work right away. The authors introduce their trailblazing Fundamental Pricing Model which includes fade as an adjustable value driver and can be used to value the impact of business model disruption. As the authors explain, the key to superior stock picking is understanding the expectations embedded in a stock's price and having a clear view of whether the company can beat those expectations. The HOLT framework has been rigorously field tested for over 40 years by global investment professionals to help them make better stock picks and by corporate managers to understand the expectations embedded in their stock price. *Beyond Earnings* is an indispensable guide for investors who want to improve their odds of outperforming the competition.

Vernacular Heritage and Earthen Architecture Feb 24 2023 In a continuously changing world, there has been a growing interest in the protection of vernacular heritage and earthen architecture. The

need to protect and enhance this fragile heritage via intelligent responses to threats from nature and the environment has become evident. Historically, vernacular heritage research focussed on philosophical aspects

The SAGE International Encyclopedia of Mass Media and Society Apr 04 2021 The reference will discuss mass media around the world in their varied forms—newspapers, magazines, radio, television, film, books, music, websites, and social media—and will describe the role of each in both mirroring and shaping society.

Emerging Tools and Strategies for Financial Management Aug 21 2022 Over the past years, significant changes have occurred in the corporate sector arising from globalization, increasing international competitiveness, and intensive use of information and communication technologies (ICTs). These developments have led to new corporate and social behaviors that are affecting the entire corporate value chain. Thus, business organizations are focusing on technological innovation as a driving force of development. *Emerging Tools and Strategies for Financial Management* is a pivotal reference source that explores both practical and theoretical perspectives on how financial management is evolving and how future consequences of technological innovation will affect individuals, businesses, and society. While highlighting topics such as financial imbalance, venture capital, and shadow banking, this publication explores the relationship between companies and their customers and the methods of generating changes in today's enterprises. This book is ideally designed for business managers, financial analysts, financial controllers, directors, finance officers, treasurers, entrepreneurs, CEOs, academicians, students, and research professionals.

Financial Management Jan 06 2024 This book is widely used in introductory and intermediate corporate finance courses. This sixth edition offers an increased focus on questions and solutions. A

greater number of questions have been inserted at the introductory and intermediate levels, and the Financial Management link on the website www.jutaacademic.co.za will offer additional questions and solutions. Recent examination questions from Part 1 and Part II of the Qualifying Examination have been included, as well as questions from the professional examinations set by ACCA and CIMA. Real-world applications of corporate finance theory and new developments are included to ensure that the textbook retains its relevance.

The Multimedia and CD-ROM Directory Mar 04 2021

Encyclopedia of Organizational Knowledge, Administration, and Technology Dec 13 2021 For any organization to be successful, it must operate in such a manner that knowledge and information, human resources, and technology are continually taken into consideration and managed effectively. Business concepts are always present regardless of the field or industry – in education, government, healthcare, not-for-profit, engineering, hospitality/tourism, among others. Maintaining organizational awareness and a strategic frame of mind is critical to meeting goals, gaining competitive advantage, and ultimately ensuring sustainability. The Encyclopedia of Organizational Knowledge, Administration, and Technology is an inaugural five-volume publication that offers 193 completely new and previously unpublished articles authored by leading experts on the latest concepts, issues, challenges, innovations, and opportunities covering all aspects of modern organizations. Moreover, it is comprised of content that highlights major breakthroughs, discoveries, and authoritative research results as they pertain to all aspects of organizational growth and development including methodologies that can help companies thrive and analytical tools that assess an organization's internal health and performance. Insights are offered in key topics such as organizational structure, strategic leadership, information technology management, and business analytics, among others. The

knowledge compiled in this publication is designed for entrepreneurs, managers, executives, investors, economic analysts, computer engineers, software programmers, human resource departments, and other industry professionals seeking to understand the latest tools to emerge from this field and who are looking to incorporate them in their practice. Additionally, academicians, researchers, and students in fields that include but are not limited to business, management science, organizational development, entrepreneurship, sociology, corporate psychology, computer science, and information technology will benefit from the research compiled within this publication.

Vernacular Architecture: Towards a Sustainable Future Jun 11 2024 Sustainability is a concept that has monopolised a large number of the scientific debates in a wide range of spheres connected not only with architecture, urban planning and construction, but also with the product market, tourism, culture, etc. However, sustainability is indissolubly linked to vernacular architecture and the lessons this architectu
