All-Embracing Manufacturing Dec 20 2021 All-embracing
manufacturing is a system that aims to dissolve the complexity
of the manufacturing process and restore the inherent
simplicity. It claims that production is very simple and flexible
by nature. However, the complexity is a result of the production
system approach which makes it rigid and therefore complex.

All-embracing manufacturing introduces flexibility to production planning, it eliminates constraints, bottlenecks, disruptions automatically while it restores the simplicity. No decision is made ahead of time, but only at the time of execution. It introduces technology as dominant part of manufacturing. It is a computer oriented system that imitates human behavior i.e. practically as any of us behave in daily personal life.
