Beyond the Mountain Nov 06 2021 What does it take to be one of the world's best high-altitude mountain climbers? A lot of fundraising; traveling in some of the world's most dangerous countries; enduring cold bivouacs, searing lungs, and a cloudy mind when you can least afford one. It means learning the hard lessons the mountains teach. Steve House built his reputation on ascents throughout the Alps, Canada, Alaska, the Karakoram and the Himalaya that have expanded possibilities of style, speed, and difficulty. In 2005 Steve and

alpinist Vince Anderson pioneered a direct new route on the Rupal Face of 26,600-foot Nanga Parbat, which had never before been climbed in alpine style. It was the third ascent of the face and the achievement earned Steve and Vince the first Piolet d'or (Golden Ice Axe) awarded to North Americans. Steve is an accomplished and spellbinding storyteller in the tradition of Maurice Herzog and Lionel Terray. Beyond the Mountain is a gripping read destined to be a mountain classic. And it

Internal Family Systems Skills Training Manual Nov 18 2022 Internal Family Systems Therapy (IFS) provides a revolutionary treatment plan for PTSD, anxiety, depression, substance abuse, eating disorders and more. Using a non-pathologizing, accelerated approach -- rooted in neuroscience -- IFS applies inner resources and self-compassion for healing emotional wounding at its core. This new manual offers straight-forward explanations and illustrates a wide variety of applications. Easy to read and highly practical. Step-by-step techniques Annotated case examples Unique meditations Downloadable exercises, worksheets IFS is Evidence-Based Thirty years ago, IFS creator Richard Schwartz, PhD, listened to his clients describing the behaviors and fears of their most extreme parts. He found that the inner world of all his clients was characterized by parts who had a positive intent for the client but had taken on extreme roles in an effort to be safe. He also discovered that these extreme parts would become less disruptive and more cooperative once their concerns were addressed and they felt safer. IFS views psychic multiplicity as the norm: we all have parts. In addition, every part has a good intention for the client, and every part has value. When clients listen to all their parts, they can heal their wounded parts. Today, IFS, which has established a legacy of efficiency and effectiveness in treating many mental health issues, is being heralded by Dr. Bessel van der Kolk as a treatment that all clinicians should know.

The Cochrane Handbook for Systematic Reviews of Interventions contains methodological guidance for the preparation and maintenance of Cochrane intervention reviews. Written in a clear and accessible format, it is the essential manual for all those preparing, maintaining and reading Cochrane reviews. Many of the principles and methods described here are appropriate for systematic reviews applied to other types of research and to systematic reviews of interventions undertaken by others. Training Dogs Aug 28 2023 **Please note that Dogwise does not endorse all of the training methods used in this book; it is a historical document and an early example of modern dog training. Today's dog trainer can trace the roots of modern training to Training Dogs by Colonel Konrad Most. Written in Germany in 1910, Training Dogs influenced how both dogs and trainers were taught in Europe and the United States for the next 50 years! It contains valuable and historically significant information, a true classic. 21st century trainers and behaviorists will find it amazing to realize that early in the 20th century Konrad Most was using and applying behavioral training principles with dogs long before B.F. Skinner! Most also created systematic and scientific methods to teach trainers how to train dogs with his " Theory of Training." While Most's methods may be viewed as harsh by modern dog trainers, the theory behind it was revolutionary for its time and it is still applied today. Discover the roots of behavioral training. Seeing the world from a dog's point of view. Utilizing instinctual behavior in training such as the prey drive. Use of compulsion and inducements. Use of primary and secondary reinforcers. Learn how Most Taught Obedience exercises including the recall, jumping and retrieving. Guard and schutzhund training. Reconnaissance and tracking; scent theory. Water work for hunting dogs. Dogs for the blind. Here is what today's dog trainers say about Training Dogs. Most demonstrated an understanding of operant conditioning concepts such as primary and secondary reinforcement, shaping, fading and chaining 28 years before the publication of B.F. Skinner's The Behavior of Organisms. He differentiated between primary and secondary reinforcers. He used his voice and soft tones as secondary inducements, much the way some trainers use clicks today. Mary Burch & Jon S. Bailey authors of How Dogs Learn. Although some of Most's methods seem archaic and harsh in this enlightened age of positive training, some of the theory he set forth was years ahead of its time. Knowing where training came from helps us appreciate where we are today. Sheila Booth author of Purely Positive Training and co-author of Schutzhund Obedience Training in Drive. Konrad Most was a police dog, war dog and seeing-eye dog trainer in Germany for the first half of the 20th Century. He trained dogs in World Wars I AND II and created curricula for trainers. He was a researcher in the field of canine psychology and trained dogs for virtually every use during his long career.
