Information Quality in Information Fusion and Decision Making Éloi Bossé,Galina L. Rogova,2019-04-02 This book presents a contemporary view of the role of information quality in information fusion and decision making and provides a formal foundation and the implementation strategies required for dealing with insufficient information quality in building fusion systems for decision making Information fusion is the process of gathering processing and combining large amounts of information from multiple and diverse sources including physical sensors to human intelligence reports and social media That data and information may be unreliable of low fidelity insufficient resolution contradictory fake and or redundant Sources may provide unverified reports obtained from other sources resulting in correlations and biases The success of the fusion processing depends on how well knowledge produced by the processing chain represents reality which in turn depends on how adequate data are how good and adequate are the models used and how accurate appropriate or applicable prior and contextual knowledge is By offering contributions by leading experts this book provides an unparalleled understanding of the problem of information quality in information fusion and decision making for researchers and professionals in the field

Intellectual Property Rights Mario Cimoli,Giovanni Dosi,Keith E. Maskus,Ruth L. Okediji,Jerome H. Reichman,2014-05-08 In recent years Intellectual Property Rights both in the form of patents and copyrights have expanded in their coverage the breadth and depth of protection and the tightness of their enforcement Moreover for the first time in history the IPR regime has become increasingly uniform at international level by means of the TRIPS agreement irrespectively of the degrees of development of the various countries This volume first addresses from different angles the effects of IPR on the processes of innovation and innovation diffusion in general and with respect to developing countries in particular Contrary to a widespread view there is very little evidence that the rates of innovation increase with the tightness of IPR even in developed countries Conversely in

many circumstances tight IPR represents an obstacle to imitation and innovation diffusion in developing countries What can policies do then This is the second major theme of the book which offers several detailed discussions of possible policy measures even within the current TRIPS regime including the exploitation of the waivers to IPR enforcement that it contains various forms of development of technological commons and non patent rewards to innovators such as prizes Some drawbacks of the regimes however are unavoidable hence the advocacy in many contributions to the book of deep reforms of the system in both developed and developing countries including the non patentability of scientific discoveries the reduction of the depth and breadth of IPR patents and the variability of the degrees of IPR protection according to the levels of a country s development

Glycinergic transmission: physiological, developmental and pathological implications Robert J. Harvey, Jean-Michel Rigo, Inhibitory glycine receptors GlyRs containing the alpha1 and beta subunits are well known for their involvement in an inherited motor disorder hyperekplexia characterised by neonatal hypertonia and an exaggerated startle reflex However it has recently emerged that other GlyR subtypes e g those containing the alpha2 alpha3 and alpha4 subunits may play more diverse biological roles New animal models of glycinergic dysfunction have been reported in zebrafish bandoneon shocked mice *cincinatti Nmf11* and cows *CMD2* In addition key studies on neurotransmitter transporters for glycine GlyT1 GlyT2 VIAAT have also revealed key roles for these presynaptic and glial proteins in health and disease Molecular modelling and structure function studies have also provided key insights into allosteric signal transduction mechanisms and the diverse pharmacology of glycine receptors This Research Topic aims to bring together experts in the field of glycinergic transmission and invite research articles or topical reviews to provide an up to date perspective on the insights into receptor transporter and synaptic function that can be gained by the study of glycinergic transmission

AN Optimist's Tour of the Future Mark Stevenson, 2011-02-03 In the tradition of Bill Bryson s *A Short History of Nearly Everything* a smart and entertaining guide to the future of civilization When unexpectedly confronted with his own mortality Mark Stevenson a writer deep thinker and stand up comedian began to ponder what the future holds for our species The past is a foreign country writes Stevenson By my analysis it s a bit like France in that I ve been to parts of it and eaten some nice food there But the future The future is an unknown territory and there isn t a guidebook Thus his ambition was born Stevenson set out simply asking What s next and then traveled the globe in pursuit of the answers Along the way he visited the Australian outback to visit the farmers who can save us from climate change met a robot with mood swings and talked to the Spaniard who s putting a hotel in space While some might be overwhelmed or even dismayed by the looming realities of genome sequencing synthetic biology a nuclear renaissance and carbon scrubbing Stevenson remains well optimistic Drawing on his singular humor and storytelling to break down these sometimes complicated discoveries *An Optimist s Tour of the Future* paints a wonderfully readable and completely enthralling portrait of where we ll be when we grow up and why it s not so scary Watch a Video
