[The Wealth Explosion](#) Stephen Davies,2019 How did the modern dynamist economy of wealth and opportunity come about This major new analytical work emphasizes the often surprising fundamental and continuing processes of innovation and transformation which has produced the world we live in now Today we live in a social and economic world that is fundamentally different from the one inhabited by our ancestors The difference between the experience of people living today and that of all of our ancestors back to the advent of agriculture is as great as that between them and their hunter gatherer forebears The processes of transformational changes could have started many times in history but they first became sustained in North West Europe about 240 years ago The question of why this happened in that particular place and time is one that has exercised generations of scholars Thanks to that work we now have a much clearer idea of how and why the traditional world of our ancestors was so different from the modern world that we inhabit This book builds on that work and gives a new answer to the question of why and how things changed showing that this unprecedented breakthrough was the result of the way a particular world historical process worked out in Europe largely because of contingent and accidental factors The book also considers the question of what kind of world it is that we now live in and whether it can continue

A Door Into Time Shawn Inmon,2020 Life after his deployment with Army Special Forces was rough for Alex His ex wife thought he needed to stop disappointing their daughter and she was right He would try harder With six hours before his little girl's fourth birthday party he observed that the wall he'd been obsessing over in his basement was too short Plenty of time to tear out a panel and look behind it He found a brick wall Behind that was another just like the first and he still had time When the second wall came down Alex stood and stared at the shining doorway Next to it held up by a knife was a note with a warning which he didn't heed He is transported to a future unlike anything we've imagined and Alex's fight to get back home becomes an epic struggle

Prelude to Extinction Andreas Karpf,2019-09-19 Earth's first interstellar mission An alien colony in ruins Their fight for survival has only just begun Called True Science Fiction A must read When Jack Harrison climbed down the short ladder from the airlock and stepped onto the debris covered soil the ground crackled with the sound of dried leaves and twigs Warm sunlight shined through his helmet making him almost forget the decade he just spent captaining Earth's first

ship to another star system The serene tropical surroundings though stood in stark contrast to the long abandoned structures that lay nearby Evidence points to a massacre the systematic extermination of an alien colony hundreds of millennia ahead of humanity Time however has erased any trace of the attackers Jack and his crew barely start probing the ruins before their curiosity betrays them as an abandoned alien device cuts them off from their main ship Lost and short on supplies survival soon becomes their only goal Even their short lived rescue by an alien race who themselves are under siege offers little hope As they struggle to find a way home signs begin pointing to a danger darker than any they could have foreseen Jack knows that playing it safe may no longer be an option but his only other choice is to confront a threat that they don t even begin to understand
