Gratitude like other positive emotions has inspired many theological and philosophical writings but it has inspired very little vigorous empirical research In an effort to remedy this oversight this volume brings together prominent scientists from various disciplines to examine what has become known as the most neglected emotion The volume begins with the historical philosophical and theoretical foundations of gratitude then presents the current research perspectives from social personality and developmental psychology as well as from primatology anthropology and biology The volume also includes a comprehensive annotated bibliography of research on gratitude This work contributes a great deal to the growing positive psychology initiative and to the scientific investigation of positive human emotions It will be an invaluable resource for researchers and students in social personality and developmental clinical and health psychology as well as to sociologists and cultural anthropologists Control and Freedom Wendy Hui Kyong Chun, 2008-09-26 A work that bridges media archaeology and visual culture studies argues that the Internet has emerged as a mass medium by linking control with freedom and democracy How has the Internet a medium that thrives on control been accepted as a medium of freedom Why is freedom increasingly indistinguishable from paranoid control In *Control and Freedom* Wendy Hui Kyong Chun explores the current political and technological coupling of freedom with control by tracing the emergence of the Internet as a mass medium The parallel and paranoid myths of the Internet as total freedom total control she says stem from our reduction of political problems into technological ones Drawing on the theories of Gilles Deleuze and Michel Foucault and analyzing such phenomena as Webcams and face recognition technology Chun argues that the relationship between control and freedom in networked contact is experienced and negotiated through sexuality and race She traces the desire for cyberspace to cyberpunk fiction and maps the transformation of public private into open closed Analyzing pornocracy she contends that it was through cyberporn and the government's attempts to regulate it that the Internet became a marketplace of ideas and commodities Chun describes the way Internet promoters conflated technological empowerment with racial empowerment and through close examinations of William Gibson's *Neuromancer* and Mamoru Oshii's *Ghost in the Shell* she analyzes the management of interactivity in narratives of cyberspace The Internet's potential for democracy stems not from illusory promises of individual empowerment Chun argues but rather from the ways in which it exposes us to others and to other machines in ways we cannot control Using fiber optic networks light coursing through glass tubes as metaphor and reality *Control and Freedom* engages the rich philosophical tradition of light as a figure for knowledge clarification surveillance and discipline in order to argue that fiber optic networks physically instantiate and thus shatter enlightenment Essentials of Anesthesia for Infants and Neonates Mary Ellen McCann, Christine Greco, Kai Matthes, 2018-02-22 A practical comprehensive guide to the special needs of infants and neonates undergoing anesthesia Integrative Pediatric Oncology Alfred Längler, Patrick J.
