Developing and Validating Test Items Thomas M. Haladyna,Michael C. Rodriguez,2013-07-18 Since test items are the building blocks of any test learning how to develop and validate test items has always been critical to the teaching learning process As they grow in importance and use testing programs increasingly supplement the use of selected response multiple choice items with constructed response formats This trend is expected to continue As a result a new item writing book is needed one that provides comprehensive coverage of both types of items and of the validity theory underlying them This book is an outgrowth of the author s previous book *Developing and Validating Multiple Choice Test Items 3e* Haladyna 2004 That book achieved distinction as the leading source of guidance on creating and validating selected response test items Like its predecessor the content of this new book is based on both an extensive review of the literature and on its author s long experience in the testing field It is very timely in this era of burgeoning testing programs especially when these items are delivered in a computer based environment Key features include Comprehensive and Flexible No other book so thoroughly covers the field of test item development and its various applications Focus on Validity Validity the most important consideration in testing is stressed throughout and is based on the Standards for Educational and Psychological Testing currently under revision by AERA APA and NCME Illustrative Examples The book presents various selected and constructed response formats and uses many examples to illustrate correct and incorrect ways of writing items Strategies for training item writers and developing large numbers of items using algorithms and other item generating methods are also presented Based on Theory and Research A comprehensive review and synthesis of existing research runs throughout the book and complements the expertise of its authors [The Potter's Wheel](#) Vincent Chukwemeka Ike,2020-10 This is About a pampered boy Obuechina Maduabuchi Only brother of five older sisters and a younger one prize pupil in school apple of his doting mother s eye eight years old and hopelessly spoilt In a vain attempt to salvage his character his father decides he must be sent away as houseboy to a teacher and his wicked wife *Values and Valuing in Mathematics Education* Philip

Clarkson, Wee Tiong Seah, Jeong Suk Pang, 2019-04-24 This engaging open access book discusses how a values and valuing perspective can facilitate a more effective mathematics pedagogical experience and allows readers to explore multiple applications of the values perspective across different education systems. It also clearly shows that teaching mathematics involves not only reasoning and feelings but also students' interactions with their cultural setting and each other. The book brings together the work of world leaders and new thinkers in mathematics educational research to improve the learning and teaching of mathematics. Addressing themes such as discovering hidden cultural values in a multicultural society and methodological issues in the investigation of values in mathematics, it stimulates readers to consider these topics in cross-cultural ways and offers suggestions for research and classroom practice. It is a valuable resource for scholars of mathematics education from early childhood through to higher education and an inspiring read for all mathematics teachers.

Handbook of Research on Enhancing Teacher Education with Advanced Instructional Technologies Ololube, Nwachukwu Prince, 2015-07-17 Before today's teachers are ready to instruct the intellectual leaders of tomorrow they must first be trained themselves. Information and communication technology can greatly increase the effectiveness of this training and also aid teachers as they seek to bring the latest technological advancements into their own classrooms. The Handbook of Research on Enhancing Teacher Education with Advanced Instructional Technologies explains the need to bring technology to the forefront of teacher training. With an emphasis on how information and communication technology can provide richer learning outcomes, this book is an essential reference source for researchers, academics, professionals, students, and technology developers in various disciplines. Human Characteristics and School Learning Benjamin Samuel Bloom, 1976

History of Education in Nigeria A. Babs Fafunwa, 2018-10-03 Originally published in 1974, a comprehensive history of Nigerian Education from early times right through to the time of publication had long been needed by all concerned with Education in Nigeria: students, teachers, and educational administrators. No one was better qualified than Professor Fafunwa to provide such a book, and in doing so he gave due emphasis to the beginnings of Education in its three main stages: indigenous, Muslim, and Christian Education. Nigerian Education had been considered all too often as a comparatively recent phenomenon, but this book points out from the start that Education is as old as Man himself in Africa, and that both Islam and Christianity were comparative newcomers in the field. A historical treatment of these three strands, which have combined to make up the modern Educational system, was vital to a clear understanding of what was needed for the future, and most of the first half of the book is concerned with these Educational beginnings. The imposing of a foreign colonial system on this framework did not always lead to a happy fusion of the systems, and the successes and the failures are examined in detail. There was no shortage of documentary evidence in the form of reports and statistics during the decades prior to publication, but this evidence was frequently scattered and inaccessible to the student, so that the author's careful selection of key evidence and reports, often drawn from his own personal experience, will be invaluable for those wishing to trace the

development of Education in Nigeria up to the early 1970s A knowledge of the history and development of the Nigerian Education system of the numerous and intensely varied personalities and beliefs which have combined and often conflicted to shape it is indispensable to all students in colleges and universities studying to become teachers It is this knowledge that Professor Fafunwa set out to provide drawing on his wide experience as teacher writer and educationalist The Science of Interest Paul A. O'Keefe, Judith M. Harackiewicz, 2017-08-01 This exceptional volume analyzes the intricate roles interest plays in cognition motivation and learning and daily living with a special focus on its development and maintenance across life domains Leading experts discuss a spectrum of interest ranging from curiosity to obsession and trace its functions in goal setting decision making self regulation and performance New research refines the current knowledge on student interest in educational settings and the social contexts of interest with insights into why interest levels change during engagement and in the long run From these findings contributors address ways to foster and nurture interest in the therapy room and the classroom for optimum benefits throughout life Among the topics covered Embedding interest within self regulation Knowledge acquisition at the intersection of situational and individual interest The role of interest in motivation and engagement The two faces of passion Creative geniuses polymaths child prodigies and autistic savants The promotion and development of interest A robust guide to a fascinating area of study The Science of Interest synthesizes the field's current knowledge of interest and indicates future directions Its chapters contribute depth and rigor to this growing area of research and will enhance the work of researchers in education psychologists social scientists and public policymakers **Education Reforms Without Evaluation Designs** Peter James Kpolovie, 2012 *Mathematics: A Very Short Introduction* Timothy Gowers, 2002-08-22 The aim of this volume is to explain the differences between research level mathematics and the maths taught at school Most differences are philosophical and the first few chapters are about general aspects of mathematical thought Emerging Perspectives on Learning, teaching, and Technology Michael Orey, 2012-03-20 Emerging Perspectives on Learning Teaching and Technology **The Export Administration Act** James V. Human Motivation Bernard Weiner,2013-06-17 Weiner introduces and offers his own motivation for producing this most impressive work with the following There are two distinct approaches to the study of motivation One stratagem is a product of academic experimental procedures while the second is an outgrowth of clinical non experimental methods Each of the approaches has unique advantages and disadvantages But all investigators in this field are guided by a single basic question namely Why do organisms think and behave as they do To help answer that basic question Human Motivation presents an entire range of motivation studies from psychoanalytic social learning and humanistic theory to social facilitation arousal emotions personal responsibility and the irrationality of attributions through chapterand verse of Hullian and Lewinian theory

Make It Stick Peter C. Brown,Henry L. Roediger III,Mark A. McDaniel,2014-04-14 To most of us learning something the hard way implies wasted time and effort Good teaching we believe should be creatively tailored to the different learning styles of students and should use strategies that make learning easier Make It Stick turns fashionable ideas like these on their head Drawing on recent discoveries in cognitive psychology and other disciplines the authors offer concrete techniques for becoming more productive learners

Memory plays a central role in our ability to carry out complex cognitive tasks such as applying knowledge to problems never before encountered and drawing inferences from facts already known New insights into how memory is encoded consolidated and later retrieved have led to a better understanding of how we learn Grappling with the impediments that make learning challenging leads both to more complex mastery and better retention of what was learned Many common study habits and practice routines turn out to be counterproductive Underlining and highlighting rereading cramming and single minded repetition of new skills create the illusion of mastery but gains fade quickly More complex and durable learning come from self testing introducing certain difficulties in practice waiting to re study new material until a little forgetting has set in and interleaving the practice of one skill or topic with another Speaking most urgently to students teachers trainers and athletes Make It Stick will appeal to all those interested in the challenge of lifelong learning and self improvement
