What Problems Do Runners Face?

Many runners usually end up getting hurt by the end of their careers. Many factors cause these injuries and “depending on the body tissues involved, may indicate myositis (an inflammation of the muscle), tendinitis, (inflammation of the tendons), or periostitis (an inflammation of the tissue covering the bone)” (Wright). It may be very surprising to other sports players that running causes as many injuries as it does because it is a sport that seems so harmless, but most runners suffer an injury by the end of their careers. Simply running does not involve any contact, it does not involve any sort of ball that could be a hazard, and it does not involve any jumping of any sort, but it does cause the kind of stress on muscles that leads to sprains and fractures. For example, a football player could get an injury by colliding with another player which could lead to internal injuries, but a runner only has the force of her weight on the ground to lead to injuries which, more often than not, is a sprain. To try to understand the full effects that sprains and other problems have on runners, it is important to understand what the individual injuries are, how the problems impact runners, what solutions there are to the problems, and what the future looks like for these issues.

One way to understand the full effects of injuries on runners is to understand what each specific injury is. One common problem that runners experience is an injury called shin splints, which is “defined as an inflammation of the tissues in the lower leg causing pain with exercise” (Wright). This problem hurts runners because if the pain of this injury gets too severe, there is a

The Political Classroom Diana E. Hess, Paula McAvoy, 2014-11-13 WINNER 2016 Grawemeyer Award in Education Helping students develop their ability to deliberate political questions is an essential component of democratic education but introducing political issues into the classroom is pedagogically challenging and raises ethical dilemmas for teachers Diana E Hess and Paula McAvoy argue that teachers will make better professional judgments about these issues if they aim toward creating political classrooms which engage students in deliberations about questions that ask How should we live together Based on the findings from a large mixed method study about discussions of political issues within high school classrooms The Political Classroom presents in depth and engaging cases of teacher practice Paying particular attention to how political polarization and social inequality affect classroom dynamics Hess and McAvoy promote a coherent plan for providing students with a nonpartisan political education and for improving the quality of classroom deliberations

The Crisis in Sociology Joseph Lopreato, Timothy Alan Crippen, 2001-09-01 Crisis in Sociology presents a compelling portrait of sociology's current troubles and proposes a remedy that is likely to inspire controversy In the authors view sociology's crisis has deep roots traceable to the over ambitious sweep of the discipline's founders Lopreato and Crippen argue that the most disabling flaw is the failure to discover even a single general law or principle necessary to systematically organize empirical observations guide inquiry by suggesting falsifiable hypotheses and form the core of a genuinely cumulative body of knowledge Crisis in Sociology invites sociologists to consider that participation in the new social science exemplified by thriving new fields such as evolutionary psychology may help to build a vigorous scientific sociology

Revolution Jerome H. Barkow, 2006 The naturalizing perspective of Darwinian thought has become one of the major intellectual currents of our time pervading contemporary understandings of human nature and society Unfortunately many social scientists in sociology psychology and sociocultural anthropology have failed to engage with it Barkow asks his fellow social scientists to put aside their all too common preconceptions and stereotypes of the biological and to consider a powerful argument that is far different from that of those who once invoked a vocabulary of genes and Darwin as a justification for genocide He argues that the theoretical perspective that has been so successful when applied to the behavior of every other animal species can be applied just as successfully to our own and that the real debate is about how to apply it BOOK JACKET
