Evidence-based Practice in Nursing Dec 09 2023

Do your students ever struggle to grasp what exactly constitutes evidence or struggle to see how it applies to practice? Would you like them to feel more confident about critiquing evidence? The need for an evidence base for nursing practice is widely accepted. However, what constitutes evidence and how nurses might apply it to practice is not always clear. This book guides nursing students through the process of identifying, appraising and applying evidence in nursing practice. It explores a wide range differing sources of evidence and knowledge, and helps students to develop key skills of critiquing research and using evidence in clinical decision making.

Evidence-Based Nursing Jul 04 2023 This book is a key resource designed to teach undergraduate nursing students how to engage in evidence-

based practice (EBP). This text allows students to possess a basic knowledge regarding research methodology and critically appraise published research. *Essentials of Evidence-Based Nursing* addresses learning objectives using an organized, easy-to-read approach that stands out from other texts. Perfect for undergraduate students and practicing nurses who have not had exposure to evidence-based practice content!

Concepts and Cases in Nursing Ethics -

Fourth Edition Dec 17 2021 A portion of the revenue from this book's sales will be donated to Doctors Without Borders to assist the humanitarian work of nurses, doctors, and other health care providers in the fight against COVID-19 and beyond. *Concepts and Cases in Nursing Ethics* is an introduction to contemporary ethical issues in health care, designed especially for Canadian audiences. The book is organized around six key concepts: beneficence, autonomy, truth-telling, confidentiality, justice, and integrity. Each of

these concepts is explained and discussed with reference to professional and legal norms. The discussion is then supplemented by case studies that exemplify the relevant concepts and show how each applies in health care and nursing practice. This new fourth edition includes an added chapter on end-of-life issues, and it is revised throughout to reflect the latest developments on topics such as global health ethics, cultural competence, social media, and palliative sedation, as well as ethical issues relating to COVID-19.

Evidence-Based Practice in Nursing Feb 28 2023 The *Evidence-Based Practice Manual* successfully breaks down the skills required for evidence-based nursing into manageable components. The reader will learn how to find, critically read and interpret a range of research studies, and will discover optimal approaches towards helping patients reach decisions that are informed by the best-available evidence. The more-strategic concepts of developing an

organisational evidence-based culture and making evidence-based changes at the organisational level are addressed in the final chapter. This popular book comes with helpful online exercises including NCLEX questions for the US readership. Helps students learn to read and understand research results as a foundation for evidence-based practice Easy writing style makes a potentially difficult subject accessible and enjoyable Explains how to search the literature and rank it according to the strength of its evidence Case studies, scenarios and exercises 'bring the subject to life' Clearly explains the process of critical appraisal - quality of the study, interpretation of the results, and applicability of the findings to individual patients Explains the various means of applying data from population studies to the individual Offers practical advice on how to communicate risks and benefits to patients Contains a glossary of useful terms New editorship brings an international dimension to the content Includes

a new chapter on mixed methods studies Expanded discussion of the evaluation of qualitative systematic reviews Updated information on the implementation of guidelines and the current role of evidence in healthcare organisational policy Now published in full colour throughout

Advanced Practice Nursing: Essential

Knowledge for the Profession Mar 20 2022 Advanced Practice Nursing:Essential Knowledge for the Profession, Fourth Edition is a core advanced practice text used in both Master's Level and DNP programs.

Concepts and Cases in Nursing Ethics, second edition Jan 10 2024 Concepts and Cases in Nursing Ethics maps the ethical landscape of contemporary nursing. The book is the product of a collaboration between philosopher-ethicist Michael Yeo, nurse-ethicist Anne Moorhouse, and six representatives of various areas of professional nursing. It thus combines philosophical and ethical analysis with nursing

knowledge and experience in a manner that is both understandable and relevant. The book is organized around six main concepts in nursing ethics: beneficence, autonomy, confidentiality, truth-telling, justice, and integrity. A chapter is devoted to the elucidation of each of these concepts. In each chapter, historical background and conceptual analysis are supplemented by case studies that exemplify issues and show how the concept applies in nursing practice. In this new edition, the materials in each chapter have been updated to reflect recent developments in nursing and more generally in health care. In addition, a totally new chapter on ethical theory has been added. Complete with bibliographies and study questions for further analysis of cases, this book is ideally suited for textbook use. It will help both practitioners and students to deal better with the clinical problems and issues that are encountered in the field. However, its simple prose and clear exposition of complex issues will make Concepts and Cases in Nursing

Ethics attractive to anyone concerned about health care.

Palliative Care Nursing May 02 2023 “This 5th edition is an important achievement; it is a symbol of commitment to the field of palliative nursing, where we have been and where we are going.” - Betty Rolling Ferrell, PhD, MA, FAAN, FPCN, CHPN From the Foreword The aging population has only grown since the first edition of this comprehensive and seminal publication nearly 20 years ago. Based on the need to

humanize rather than medicalize the illness experience for patients, this text delves into palliative care beyond the specific diseases affecting the patient. Instead, content focuses on the whole person and family. Palliative patients struggle with chronic, debilitating, and painful conditions, and grapple with the fact that life as they knew it has already passed away. Families and friends reciprocally suffer, not knowing how to help and therefore become the secondary victims of the disease. This is not the challenge of a lone nurse, or a single physician, therapist, or social worker. Rather, palliative and hospice care requires the expertise and unique roles of an interprofessional team to help the patient and family strengthen their resilience, continue to find meaning and purpose in life, and cure what can be cured. Palliative Care Nursing, Fifth Edition, delivers advanced empirical, aesthetic, ethical and personal knowledge. This new edition brings an increased focus on outcomes, benchmarking progress, and goals of care. It

expounds upon the importance of the cross-disciplinary collaboration introduced in the previous edition. Every chapter in Sections I, II, and III includes content written by a non-nursing member of the interprofessional team. Based on best-evidence and clinical practice guidelines, this text presents comprehensive, targeted interventions responsive to the needs of palliative and hospice patients and family. Each chapter contains compassionate, timely, appropriate, and cost-effective care for diverse populations across the illness trajectory. Key Features The expanded new edition offers current, comprehensive, one-stop source of highly-relevant clinical information on palliative care Life-span approach: age-appropriate nursing considerations (e.g. geriatric, pediatric and family) Includes disease-specific and symptom-specific nursing management chapters Promotes a holistic and interdisciplinary approach to palliative care Offers important legal, ethical and cultural considerations related

to death and dying Case Studies with Case Study Conclusion in each clinical chapter New to The Fifth Edition: An expanded chapter on Palliative Care incorporates most up to date scope and standards, information on Basic and Advanced HPNA certification, self-reflection and self-care for nurses. A chapter on Interprofessional Collaboration Instructor Resources: Power points and Test bank

Nursing Research: Reading, Using and Creating

Evidence Feb 04 2021 « Nursing Research:

Reading, Using, and Creating Evidence, Fourth
Edition focuses on the concept that research is
essential as evidence for nursing practice.

Written in a conversational tone and using a
reader-friendly approach, this text teaches
students how to translate research into evidence
in a practical way. The text enables students to
gain a fundamental understanding of all types of
research used for evidence through its emphasis
on research methods, use of research evidence
in clinical decision-making, and ways to engage
in evidence-based practice. The Fourth Edition
highlights the importance of translating
research findings into evidence as the most
critical step for improving patient care. This

updated edition contrasts six different models
for organizational evidenced-based practice,
including Magnet designation requirements,
collaboration between researchers and
practitioners for knowledge translation,
community and home health evidence-based
practice, and the challenges of creating an
organizational culture that values evidence-
based practice. »--

Middle Range Theory for Nursing, Fourth Edition May 14 2024 Three-time recipient of the AJN Book of the Year Award! Praise for the third

edition: "This is an outstanding edition of this book. It has great relevance for learning about, developing, and using middle range theories. It is very user friendly, yet scholarly." Score: 90, 4 Stars -Doody's Medical Reviews The fourth edition of this invaluable publication on middle range theory in nursing reflects the most current theoretical advances in the field. With two additional chapters, new content incorporates exemplars that bridge middle range theory to advanced nursing practice and research. Additional content for DNP and PhD programs includes two new theories: Bureaucratic Caring and Self-Care of Chronic Illness. This user-friendly text stresses how theory informs practice and research in the everyday world of nursing. Divided into four sections, content sets the stage for understanding middle range theory by elaborating on disciplinary perspectives, an organizing framework, and evaluation of the theory. Middle Range Theory for Nursing, Fourth Edition presents a broad spectrum of 13

middle range theories. Each theory is broken down into its purpose, development, and conceptual underpinnings, and includes a model demonstrating the relationships among the concepts, and the use of the theory in research and practice. In addition, concept building for research through the lens of middle range theory is presented as a rigorous 10-phase process that moves from a practice story to a conceptual foundation. Exemplars are presented clarifying both the concept building process and the use of conceptual structures in research design. This new edition remains an essential text for advanced practice, theory, and research courses. New to the Fourth Edition: Reflects new theoretical advances Two completely new chapters New content for DNP and PhD programs Two new theories: Bureaucratic Caring and Self-Care of Chronic Illness Two articles from *Advances in Nursing Science* documenting a historical meta-perspective on middle range theory development Key Features:

Provides a strong contextual foundation for understanding middle range theory Introduces the Ladder of Abstraction to clarify the range of nursing's theoretical foundation Presents 13 middle range theories with philosophical, conceptual, and empirical dimensions of each theory Includes Appendix summarizing middle range theories from 1988 to 2016
