Snake Oil Science R. Barker Bausell PhD,2009-07-31 Millions of people worldwide swear by such therapies as acupuncture herbal cures and homeopathic remedies Indeed complementary and alternative medicine is embraced by a broad spectrum of society from ordinary people to scientists and physicians to celebrities such as Prince Charles and Oprah Winfrey In the tradition of Michael Shermers Why People Believe Weird Things and Robert Parks s Voodoo Science Barker Bausell provides an engaging look at the scientific evidence for complementary and alternative medicine CAM and at the logical psychological and physiological pitfalls that lead otherwise intelligent people including researchers physicians and therapists to endorse these cures The books ultimate goal is to reveal not whether these therapies work as Bausell explains most do work although weakly and temporarily but whether they work for the reasons their proponents believe Indeed as Bausell reveals it is the placebo effect that accounts for most of the positive results He explores this remarkable phenomenon the biological and chemical evidence for the placebo effect how it works in the body and why research on any therapy that does not factor in the placebo effect will inevitably produce false results By contrast as Bausell shows in an impressive survey of research from high quality scientific journals and systematic reviews studies employing credible placebo controls do not indicate positive effects for CAM therapies over and above those attributable to random chance Here is not only an entertaining critique of the strangely zealous world of CAM belief and practice but it also a first rate introduction to how to correctly interpret scientific research of any sort Readers will come away with a solid understanding of good vs bad research practice and a healthy skepticism of claims about the latest miracle cure be it St John s Wort for depression or acupuncture for chronic pain

The Age of Surveillance Capitalism Shoshana Zuboff,2019-01-15 The challenges to humanity posed by the digital future the first detailed examination of the unprecedented form of power called surveillance capitalism and the quest by powerful corporations to predict and control our behavior In this masterwork of original thinking and research Shoshana Zuboff provides startling insights into the phenomenon that she has named surveillance capitalism The stakes could not be higher a global architecture of behavior modification threatens human nature in the twenty first century just as industrial capitalism disfigured the natural world in the twentieth Zuboff vividly brings to life the consequences as surveillance capitalism advances from Silicon Valley into every economic sector Vast wealth and power are accumulated in ominous new behavioral futures markets where predictions about our behavior are bought and sold and the production of goods and services is subordinated to a new means of behavioral modification The threat has shifted from a totalitarian Big Brother state to a ubiquitous digital architecture a Big Other operating in the interests of surveillance capital Here is the crucible of an unprecedented form of power marked by extreme concentrations of knowledge and free from democratic oversight Zuboff s comprehensive and moving analysis lays bare the threats to twenty first century society a controlled hive of total connection that seduces with promises of total certainty for maximum profit at the expense of democracy freedom and our human future With little resistance from law or society surveillance capitalism is on the verge of dominating the social order and shaping the digital future if we let it

Engineering Eden Jordan Fisher Smith, 2016-06-07 The fascinating story of a trial that opened a window onto the century long battle to control nature in the national parks When twenty five year old Harry Walker was killed by a bear in Yellowstone Park in 1972 the civil trial prompted by his death became a proxy for bigger questions about American wilderness management that had been boiling for a century At immediate issue was whether the Park Service should have done more to keep bears away from humans but what was revealed as the trial unfolded was just how fruitless our efforts to regulate nature in the parks had always been The proceedings drew to the witness stand some of the most important figures in twentieth century wilderness management including the eminent zoologist A Starker Leopold who had produced a landmark conservationist document in the 1950s and all American twin researchers John and Frank Craighead who ran groundbreaking bear studies at Yellowstone Their testimony would help decide whether the government owed the Walker family restitution for Harry s death but it would also illuminate decades of patchwork efforts to preserve an idea of nature that had never existed in the first place In this remarkable excavation of American environmental history nature writer and former park ranger Jordan Fisher Smith uses Harry Walker s story to tell the larger narrative of the futile sometimes fatal attempts to remake wilderness in the name of preserving it Tracing a course from the founding of the national parks through the tangled twentieth century growth of the conservationist movement Smith gives the lie to the portrayal of national parks as Edenic wonderlands unspoiled until the arrival of Europeans and shows how virtually every attempt to manage nature in the parks has only created cascading effects that require even more management Moving across time and between Yellowstone Yosemite and Glacier national parks Engineering Eden shows how efforts at wilderness management have always been undone by one fundamental problem that the idea of what is wild dissolves as soon as we begin to examine it leaving us with little framework to say what wilderness should look like and which human interventions are acceptable in trying to preserve it In the tradition of John McPhee s *The Control of Nature* and Alan Burdick s *Out of Eden* Jordan Fisher Smith has produced a powerful work of popular science and environmental history grappling with critical issues that we have even now yet to resolve
