Social Science for What? Jul 29 2022 How the NSF became an important yet controversial patron for the social sciences, influencing debates over their scientific status and social relevance. In the early Cold War years, the U.S. government established the National Science Foundation (NSF), a civilian agency that soon became widely known for its dedication to supporting first-rate science. The agency's 1950 enabling legislation made no mention of the social sciences, although it included a vague reference to "other sciences." Nevertheless, as Mark Solovey shows in this book, the NSF also soon became a major--albeit controversial--source of public funding for them.

Social Work Science Jun 15 2021 What is the role of science in social work? Ian Shaw considers social work inventions, evidence-based practice, the history of scientific claims in social work practice, technology, and social work research methodology to demonstrate the significant role that scientific language and practice play in the complex world of social work. By treating science as a social action marked by the interplay of choice, activity, and constraints, Shaw links scientific and social work knowledge through the core themes of the nature of evidence, critical learning and understanding, justice, and the skilled evaluation of the subject. He shows specifically how to connect science, research, and the practical and speaks to the novel topics this integration introduces into the discipline, including experience, expertise, faith, tacit knowledge, judgment, interests, scientific controversies, and understanding.

Social Science Success Book 7 (A.Y. 2023-24)Onward Jun 27 2022 The series SOCIAL SCIENCE SUCCESS is a set of three books for Classes 6 to 8. It is aligned with National Education Policy, 2020 and is in accordance with National Curriculum Framework (NCF). Each book in the series is supported with Online Support, Teacher's Resource Book and E-book for teachers. Each book in the series is divided into three sections — History, Geography & Social and Political Life. Our attempt, in this series, is to capture the interest and arouse genuine curiosity in the learners through presentation of facts and concepts in a simple and lucid style, infused with numerous original illustrations and photographs. Utmost care has been taken to encapsulate in the series the key parameters laid down in National Education Policy (NEP) 2020. The NEP places the learner at the heart of the teaching-learning process. In recent years, there has been a paradigm shift towards designing a learner-centric curriculum that is based on an activity-based approach. There is also an equal emphasis on equipping young learners with essential twenty-first-century skills. The text as well as the exercises in the book promote the holistic development of the learners. Besides, there is a lot of emphasis on enhancing the creativity, critical thinking, and communication and collaboration skills of learners. How Does Social Science Work? Mar 25 2022 The culmination of a lifetime spent in a variety of fields - sociology, anthropology, economics, psychology, and philosophy of science - How Does Social Science Work? takes an innovative, sometimes iconoclastic look at social scientists at work in many disciplines. It describes how they investigate and the kinds of truth they produce, illuminating the weaknesses and dangers inherent in their research. At once an analysis, a critique, and a synthesis, this major study begins by surveying philosophical approaches to hermeneutics, to examine the question of how social science ought to work. It illustrates many of its arguments with untraditional examples, such as the reception of the work of the political biographer Robert Caro to show the hermeneutical problems of ethnographers. The major part of the book surveys sociological, political, and psychological studies of social science to get a rounded picture of how social science works. Paul Diesling warns that "social science exists between two opposite kinds of degeneration, a value-free professionalism that lives only for publications that show off the latest techniques, and a deep social concern that uses science

for propaganda." He argues for greater self-awareness and humility among social scientists, although he notes that "some social scientists . . . will angrily reject the thought that their personality affects their research in any way." This profound and sometimes witty book will appeal to students and practitioners in the social sciences who are ready to take a fresh look at their field. An extensive bibliography provides a wealth of references across an array of social science disciplines.

Social Science Research May 15 2021 • This new edition gives students valuable practice in reading and evaluating research. All major methods of research are illustrated, including qualitative research, content/document analysis, survey research, observational research, experimental research, and program evaluation. • The articles deal with contemporary topics that will hold your students' attention. • The lines in each article are sequentially numbered. This allows easy reference to specific parts of the articles during classroom discussions. • Factual Questions at the end of each article encourage students to read for methodological and substantive points. • The Answer Key provides answers to the Factual Questions. The line numbers where the answers can be found are included, making the key easy to use. • The Questions for Discussion at the end of each article address broad issues of research design and overall research quality. • Ideal for homework assignments followed by classroom discussions at the next class meeting.

Public Engagement and Social Science Feb 21 2022 Drawing on social science conversations at a lively café in Bristol, this highly original book explores the value of public engagement in a wider social science context. The chapters range from themes such as the dialogic character of the social sciences, pragmatism in responses, and the underpinnings of managerial approaches to the restructuring of higher education. The first part reflects upon the different social and political inflections of public engagement. It is followed by chapters based upon talks at the café that were concerned with public engagement and the contribution of social science to a reflexive understanding of the dilemmas and practices of daily life. Together, the contributors offer a refreshing look at the role of social science in the societies it examines.--

Teaching Humanities & Social Sciences Mar 13 2021 Teaching Humanities and Social Sciences, 7e prepares teachers to develop and implement programs in the humanities and social sciences learning area from F-10. It successfully blends theory with practical approaches to provide a basis for teaching that is engaging, inquiry-based and relevant to students' lives. Using Version 8.1 of the Australian Curriculum, the text discusses the new structure of the humanities and social sciences learning area. Chapters on history, geography, civics and citizenship, and economics and business discuss the nature of these subjects and how to teach them to achieve the greatest benefit for students, both as sub-strands within the Year F-6/7 HASS subject and as distinct Year 7-10 subjects. Throughout, the book maintains its highly respected philosophical and practical orientation, including a commitment to deep learning in a context of critical inquiry. With the aid of this valuable text, teachers can assist primary, middle and secondary students to become active and informed citizens who contribute to a just, democratic and sustainable future.

The Structure of Social Science Feb 04 2023 Originally published in 1974, this book provided a most useful introductory survey of all the major philosophical issues relating to the social sciences at the time. While it covers a remarkable amount of ground in a short space, it is never superficial, for its lucid and careful analysis does full justice to the complexities and controversies of the subject. Nor is it merely a survey, for, while putting all points of view with scrupulous fairness, the author never fails to make clear his own, and to support it with reasoned argument. The book's basic framework is a comparison of physical and social science, and in this context the author examines the problems of the mental aspect of social life, general laws, the individual and the social, explanation, and the relation of fact to value. He is far from advocating (as is often done) the wholesale acceptance or rejection of the 'physical science model' in the social sciences – rather, he carefully considers the various elements of the model in relation to the nature of social life. A noteworthy feature of this book is the philosophical analysis of statistical correlations and tests of significance, which bulk so large in the practice of social scientists, yet are all too seldom discussed in books of this kind. Also of special interest is the penetrating and original analysis of functionalist explanation in social science. Students of the social sciences and of philosophy will find this an admirable introduction to an important aspect of their respective disciplines.
