Geography 3-11 Feb 28 2023 The advent of the National Primary Strategy has produced a welcome reminder to teachers of the importance of geography within the primary curriculum. This book aims to encourage this renewed awareness and to support teachers in teaching primary geography in different and exciting ways. It will show that children have an entitlement to learn about geography and this can be achieved in a lively, creative fashion uplifting for both teachers and children. It covers: planning for and assessing progression in learning inclusion ICT and drama indoors, outdoors and beyond. Written in association with the Geographical Association, this book will help both trainee and experienced teachers to integrate geography as an essential part of the primary curriculum.

[Thinking Geographically](#) Nov 15 2021 This book explains how the concepts of geography can

teach young people to think geographically, deeply and ethically. Thinking Geographically demonstrates how the concepts of place, space, environment and interconnection teach students new ways of perceiving and understanding the world, the concepts of scale and time teach them ways of analysing the world, while the concepts of sustainability and wellbeing show them how to evaluate and reflect on what they observe, and all eight concepts develop their higher order and critical thinking. To further support teachers, this book includes a chapter on how to teach for conceptual understanding, as well as two chapters that illustrate the application of geographical thinking to an understanding of the effects of land cover change and the problem of regional inequality. Rich with practical examples, this book is an essential resource for geography teachers, whether already teaching or studying to become one, and for those who teach them.
