The Price of Inefficiency Frank Koester, 1913

*Monster Culture in the 21st Century* Marina Levina, Diem-My T. Bui, 2013-05-23 In the past decade our rapidly changing world faced terrorism global epidemics economic and social strife new communication technologies immigration and climate change to name a few These fears and tensions reflect an evermore interconnected global environment where increased mobility of people technologies and disease have produced great social political and economical uncertainty The essays in this collection examine how monstrosity has been used to manage these rising fears and tensions Analyzing popular films and televisions shows such as *True Blood* *Twilight* *Paranormal Activity* *District 9* *Battlestar Galactica* and *Avatar* it argues that monstrous narratives of the past decade have become omnipresent specifically because they represent collective social anxieties over resisting and embracing change in the 21st century The first comprehensive text that uses monstrosity not just as a metaphor for change but rather a necessary condition through which change is lived and experienced in the 21st century this approach introduces a different perspective toward the study of monstrosity in culture

Believe Me Or Your Lying Eyes With "Hind" Sight! Lou Illar,2009-08 I find television very educating Every time somebody turns on the set I go into the other room and read a book Groucho Marx In 1957 Vance Packard wrote Our American life through a large scale effort to use psychiatry and the social sciences to influence and manipulate buying has had impressive success below our level of awareness Since 1957 there is great evidence that our culture has become a harbinger of emotional exploitation in more forms than we can recognize and irrational profit taking in more forms than we can image In these times investing in a charity is not easy within a gambling culture that has glamorized wind fall profits and run away CEO salaries It certainly worsens when these efforts become unfettered and ignored by business efforts that not only fail to provide a product of value but offer no product at all This madness can only succeed by turning huge profits through the creation of cannibalistic markets and non profit corporations that feed on gambling addictions which buy moments of hope as they excite and exploit risk instincts This baiting continues to validate at warp speed the assumption that we are a nation of impulse buyers We reverse like a school of starving gold fish fearful of the vibrations of mere foot steps and unable to notice bread crumbs on top of the water No doubt someone has convinced us that with every failure there will always be another roll of the dice The more relevant question of interest is who will roll those dice on your internet gambling site No doubt we have become more reactive but worse we have become less knowledgeable This writing is offered to encourage your thoughtfulness about your money and who and what you empower as you give it away

*The Theory of Gambling and Statistical Logic* Richard A. Epstein,1995 Covering all aspects of gambling The Theory of Gambling and Statistical Logic is mathematically sophisticated but can be read for what it says about the games and strategies skipping the technicalities The material is fascinating and detailed and the analysis is masterful
