The Fourth Industrial Revolution Klaus Schwab, 2017-01-03 World renowned economist Klaus Schwab Founder and Executive Chairman of the World Economic Forum explains that we have an opportunity to shape the fourth industrial revolution which will fundamentally alter how we live and work Schwab argues that this revolution is different in scale scope and complexity from any that have come before Characterized by a range of new technologies that are fusing the physical digital and biological worlds the developments are affecting all disciplines economies industries and governments and even challenging ideas about what it means to be human Artificial intelligence is already all around us from supercomputers drones and virtual assistants to 3D printing DNA sequencing smart thermostats wear able sensors and microchips smaller than a grain of sand But this is just the beginning nanomaterials 200 times stronger than steel and a million times thinner than a strand of hair and the first transplant of a 3D printed liver are already in development Imagine smart factories in which global systems of manufacturing are coordinated virtually or implantable mobile phones made of biosynthetic materials The fourth industrial revolution says Schwab is more significant and its ramifications more profound than in any prior period of human history He outlines the key technologies driving this revolution and discusses the major impacts expected on government business civil society and individuals Schwab also offers bold ideas on how to harness these changes and shape a better future one in which technology empowers people rather than replaces them progress serves society rather than disrupts it and in which innovators respect moral and ethical boundaries rather than cross them We all have the opportunity to contribute to developing new frameworks that advance progress

Post Corona Scott Galloway, 2020-11-24 New York Times bestseller Few are better positioned to illuminate the vagaries of this transformation than Galloway a tech entrepreneur author and professor at New York University's Stern School In brisk prose and catchy illustrations he vividly demonstrates how the largest technology

companies turned the crisis of the pandemic into the market share grabbing opportunity of a lifetime The New York Times As good an analysis as you could wish to read The Financial Times From bestselling author and NYU Business School professor Scott Galloway comes a keenly insightful urgent analysis of who stands to win and who's at risk to lose in a post pandemic world The COVID 19 outbreak has turned bedrooms into offices pitted young against old and widened the gaps between rich and poor red and blue the mask wearers and the mask haters Some businesses like home exercise company Peloton video conference software maker Zoom and Amazon woke up to find themselves crushed under an avalanche of consumer demand Others like the restaurant travel hospitality and live entertainment industries scrambled to escape obliteration But as New York Times bestselling author Scott Galloway argues the pandemic has not been a change agent so much as an accelerant of trends already well underway In Post Corona he outlines the contours of the crisis and the opportunities that lie ahead Some businesses like the powerful tech monopolies will thrive as a result of the disruption Other industries like higher education will struggle to maintain a value proposition that no longer makes sense when we can't stand shoulder to shoulder And the pandemic has accelerated deeper trends in government and society exposing a widening gap between our vision of America as a land of opportunity and the troubling realities of our declining wellbeing Combining his signature humor and brash style with sharp business insights and the occasional dose of righteous anger Galloway offers both warning and hope in equal measure As he writes Our commonwealth didn't just happen it was shaped We chose this path no trend is permanent and can't be made worse or corrected
