The Posthuman Rosi Braidotti, 2013-07-11 The Posthuman offers both an introduction and major contribution to contemporary debates on the posthuman Digital second life genetically modified food advanced prosthetics robotics and reproductive technologies are familiar facets of our globally linked and technologically mediated societies This has blurred the traditional distinction between the human and its others exposing the non naturalistic structure of the human The Posthuman starts by exploring the extent to which a post humanist move displaces the traditional humanistic unity of the subject Rather than perceiving this situation as a loss of cognitive and moral self mastery Braidotti argues that the posthuman helps us make sense of our flexible and multiple identities Braidotti then analyzes the escalating effects of post anthropocentric thought which encompass not only other species but also the sustainability of our planet as a whole Because contemporary market economies profit from the control and commodification of all that lives they result in hybridization erasing categorical distinctions between the human and other species seeds plants animals and bacteria These dislocations induced by globalized cultures and economies enable a critique of anthropocentrism but how reliable are they as indicators of a sustainable future The Posthuman concludes by considering the implications of these shifts for the institutional practice of the humanities Braidotti outlines new forms of cosmopolitan neo humanism that emerge from the spectrum of post colonial and race studies as well as gender analysis and environmentalism The challenge of the posthuman condition consists in seizing the opportunities for new social bonding and community building while pursuing sustainability and empowerment

The Elusive Quest for Growth William R. Easterly, 2002-08-02 Why economists' attempts to help poorer countries improve their economic well being have failed Since the end of World War II economists have tried to figure out how poor countries in the tropics could attain standards of living approaching those of countries in Europe and North America Attempted remedies have included providing foreign aid investing in machines fostering education controlling population growth and making aid loans as well as forgiving those loans on condition of reforms None of these solutions has delivered as promised The problem is not the failure of economics William Easterly argues but the failure to apply economic principles to practical policy work In this book Easterly shows how these solutions all violate the basic principle of economics that people private individuals and businesses government officials even aid donors respond to incentives Easterly first discusses the importance of growth He then analyzes the development solutions that have failed Finally he suggests alternative approaches to the problem Written in an accessible at times irreverent style Easterly's book combines modern growth theory with anecdotes from his fieldwork for the World Bank

Arthur Conan Doyle and Dashiell Hammett to Alfred Hitchcock and Martin Scorsese exploring the ways in which they have shaped and influenced the field Includes extensive references to the most up to date scholarship and a comprehensive bibliography Histories of the Devil Jeremy Tambling, 2017-02-07 This book is about representations of the devil in English and European literature Tracing the fascination in literature philosophy and theology with the irreducible presence of what may be called evil or comedy or the carnivalesque this book surveys the parts played by the devil in the texts derived from the Faustus legend looks at Marlowe and Shakespeare Rabelais Milton Blake Hoffmann Baudelaire Goethe Dostoevsky Bulgakov and Mann historically speculatively and from the standpoint of critical theory It asks Is there a single meaning to be assigned to the idea of the diabolical What value lies in thinking diabolically Is it still the definition of a good poet to be of the devil s party as Blake argued *The Unmaking of Fascist Aesthetics* Kriss Ravetto, 2001 In works by filmmakers from Bertolucci to Spielberg debauched images of nazi and fascist eroticism symbols of violence and immorality often bear an uncanny resemblance to the images and symbols once used by the fascists themselves to demarcate racial sexual and political others This book exposes the madness inherent in such a course which attests to the impossibility of disengaging visual and rhetorical constructions from political ideological and moral codes Kriss Ravetto argues that contemporary discourses using such devices actually continue unacknowledged rhetorical moral and visual analogies of the past Against postwar fictional and historical accounts of World War II in which generic images of evil characterize the nazi and the fascist Ravetto sets the more complex approach of such filmmakers as Pier Paolo Pasolini Liliana Cavani and Lina Wertmuller Her book asks us to think deeply about what it means to say that we have conquered fascism when the aesthetics of fascism still describe and determine how we look at political figures and global events Book jacket
