Pompeii and Herculaneum Mar 06 2023 The original edition of Pompeii: A Sourcebook was a crucial resource for students of the site. Now updated to include material from Herculaneum, the neighbouring town also buried in the eruption of Vesuvius, Pompeii and Herculaneum: A Sourcebook allows readers to form a richer and more diverse picture of urban life on the Bay of Naples. Focusing upon inscriptions and ancient texts, it translates and sets into context a representative sample of the huge range of source material uncovered in these towns. From the labels on wine jars to scribbled insults, and from advertisements for gladiatorial contests to love poetry, the individual chapters explore the early history of Pompeii and Herculaneum, their destruction, leisure pursuits, politics, commerce, religion, the family and society. Information about Pompeii and Herculaneum from authors based in Rome is included, but the great majority of sources come from the cities themselves, written by their ordinary inhabitants – men and women, citizens and slaves. Incorporating the latest research and finds from the two cities and enhanced with more photographs, maps, and plans, Pompeii and Herculaneum: A Sourcebook offers an invaluable resource for anyone studying or visiting the sites.

Islamic Jurisprudence Sep 12 2023 Islamic jurisprudence is a much misunderstood system. The misunderstanding is due to lack of information and to centuries of prejudice. This book seeks to present information, not at present available in a single work, on the pioneering efforts of Islamic jurists to develop a comprehensive body of human rights, principles and practice, as well as a

corpus of international law principles. The attempt to develop such international law principles long anticipated any similar work in other legal or cultural systems. Human rights doctrine based upon the Qu'ran and the Sunna of the Prophet was expressed in terms which will strike the reader as surprisingly modern. In international law, Islamic treatises anticipated the work of Grotius by eight centuries. It is hoped that this systematic exposition, not attempted before in such detail, will help considerably in reducing misunderstanding and the resulting tensions, as well as being of considerable value to the Islamic world. The work will be of interest not only to lawyers, but also to philosophers, historians, sociologists, political scientists and students of international affairs.

The Correspondence of the Kings of Ur Jan 04 2023 The Correspondence of the Kings of Ur is a collection of literary letters between the Ur III monarchs and their high officials at the end of the third millennium B.C. The letters cover topics of royal authority and proper governance, defense of frontier regions, and the ultimate disintegration of the empire and represent the largest corpus of Sumerian prose literature we possess. This long-awaited edition, based on extensive collation of almost all extant manuscripts, numbering more than a hundred, includes detailed historical and literary analyses, and copious philological commentary. It entirely supersedes the Michalowski's oft-cited unpublished Yale dissertation of 1976. The edition is accompanied by an extensive analysis of the place of the letters in early second-millennium schooling, treating the letters as literature, followed by chapters that contextualize the epistolary material within historical and historiographic contexts, utilizing many Sumerian archival, literary, and historical sources. The main objective here is to try to navigate the complex issues of authenticity, authority, and fiction that arise from the study of these literary artifacts. In addition, Michalowski offers new hypotheses about many aspects of late third-millennium history, including essays on military history and strategy, on frontiers, on the nature and putative character of nomadism at the time, as well as a long chapter on the role of a people designated as Amorites. The included DVD includes various photographs at high resolution of most of the tablets included in the study.

Earthworks Jan 16 2024 Nothing can be built without some excavation and transfer of soil (or rock) from one part of a site to another and this makes earthworks the most common product of civil engineering operations. Although normally seen as major structures, such as earth fill dams or large highways or railway embankments, the majority of earthworks are connected with minor civil works and building construction. Whatever the type of work, the principles are the same. Earthworks: a guide accumulates information on topics that are essential to earthworks engineering.
