Cognitive Neuroscience of Language David Kemmerer, 2014-11-20 Language is one of our most precious and uniquely human capacities so it is not surprising that research on its neural substrates has been advancing quite rapidly in recent years Until now however there has not been a single introductory textbook that focuses specifically on this topic Cognitive Neuroscience of Language fills that gap by providing an up to date wide ranging and pedagogically practical survey of the most important developments in the field It guides students through all of the major areas of investigation beginning with fundamental aspects of brain structure and function and then proceeding to cover aphasia syndromes the perception and production of speech the processing of language in written and signed modalities the meanings of words and the formulation and comprehension of complex expressions including grammatically inflected words complete sentences and entire stories Drawing heavily on prominent theoretical models the core chapters illustrate how such frameworks are supported and sometimes challenged by experiments employing diverse brain mapping techniques Although much of the content is inherently challenging and intended primarily for graduate or upper level undergraduate students it requires no previous knowledge of either neuroscience or linguistics defining technical terms and explaining important principles from both disciplines along the way

Internal Combustion Engines Institution of Mechanical Engineers, 2014-10-10 This book presents the papers from the Internal Combustion Engines Performance fuel economy and emissions held in London UK This popular international conference from the Institution of Mechanical Engineers provides a forum for IC engine experts looking closely at developments for personal transport applications though many of the drivers of change apply to light and heavy duty on and

off highway transport and other sectors These are exciting times to be working in the IC engine field With the move towards downsizing advances in FIE and alternative fuels new engine architectures and the introduction of Euro 6 in 2014 there are plenty of challenges The aim remains to reduce both CO2 emissions and the dependence on oil derivate fossil fuels whilst meeting the future more stringent constraints on gaseous and particulate material emissions as set by EU North American and Japanese regulations How will technology developments enhance performance and shape the next generation of designs The book introduces compression and internal combustion engines applications followed by chapters on the challenges faced by alternative fuels and fuel delivery The remaining chapters explore current improvements in combustion pollution prevention strategies and data comparisons Presents the latest requirements and challenges for personal transport applications Gives an insight into the technical advances and research going on in the IC Engines field Provides the latest developments in compression and spark ignition engines for light and heavy duty applications automotive and other markets

David Vizard's How to Port and Flow Test Cylinder Heads David Vizard,2012 Porting heads is an art and science It takes a craftsman s touch to shape the surfaces of the head for the optimal flow characteristics and the best performance Porting demands the right tools skills and application of knowledge Few other engine builders have the same level of knowledge and skill porting engine heads as David Vizard All the aspects of porting stock as well as aftermarket heads in aluminum and cast iron constructions are covered Vizard goes into great depth and detail on porting aftermarket heads Starting with the basic techniques up to more advanced techniques you are shown how to port iron and aluminum heads as well as benefits of hand and CNC porting You are also shown how to build a high quality flow bench at home so you can test your work and obtain professional results Vizard shows how to optimize flow paths through the heads past the valves and into the combustion chamber The book covers blending the bowls a basic porting procedure and also covers pocket porting porting the intake runners and many advanced procedures These advanced procedures include unshrouding valves porting a shortside turn from the floor of the port down toward the valve seat and developing the ideal port area and angle All of these changes combine to produce optimal flow velocity through the engine for maximum power *How to Super Tune and Modify Holley Carburetors* David Vizard,2013 Explains the science the function and most important the tuning expertise required to get your Holley carburetor to perform its best

The Scot's Vow Audrey Adair,2017-12-16 She will have her freedom no matter the cost Victoria Brighton refuses to be a pawn to to be played by her stepfather who will stop at nothing to access her inheritance including marrying her off to the cold and calculating Duke of Lansingberg She escapes across the sea to the western prairies unknowing what is ahead of her but intent that she will never again allow a man to dictate her future He will honor his promises and hold his family together Callum McDougall future chieftan of the McDougall clan is journeying to the North West Territories to determine what has become of his missing cousin Once his mission is complete he will honor the family tradition and return to Scotland as chieftan to lead his clan Together in the new world what will the future hold

Callum and Victoria fight their intense attraction to one another as Callum must return to Scotland while Victoria vows to remain true to herself. Soon however they find themselves unlikely allies in their respective predicaments. With a future continents apart will they succeed in denying their growing feelings for one another or will love prevail

"One Minute to Ditch!" Cornelius Ryan, 2016-01-18 Prize winning True Stories of the Supreme Moment When Men Suddenly Face Death. Some of these true stories are already famous because they have been dramatized on television. All of them take you straight to the heart of great moments of crisis. You'll know what it's like to look down at the wide Pacific and realize that your plane is going to ditch there. You'll twist the wheel of your racing car as it takes a narrow turn at Indianapolis. You'll struggle in cabin 56 of the S.S. Andrea Doria during its five last frantic hours. In these and other stories Cornelius Ryan, ace journalist, has caught the essence of that split second that may be a man's last. Two of these pieces have won Benjamin Franklin Magazine awards. One Minute To Ditch: Thirty-one men, women and children high over the mid-Pacific in a failing plane. Dramatized on TV: Five Desperate Hours in Cabin 56. A story of the sinking of the S.S. Andrea Doria told in gripping minute by minute detail. Dramatized on TV: The Major of St. L. A classic of the Normandy invasion, an unforgettable true story of quiet heroism. Dramatized on TV: These and other factual accounts are moving documents of crisis of courage against the sudden fact of very possible death

Design Research in Architecture Murray Fraser, 2021-07-28 What is the role of design research in the types of insight and knowledge that architects create That is the central question raised by this book It acts as the introductory overview for Ashgate's major new series Design Research in Architecture which has been created in order to establish a firm basis for this emerging field of investigation within architecture While there have been numerous architects scholars since the Renaissance who have relied upon the interplay of drawings models textual analysis intellectual ideas and cultural insights to scrutinise the discipline nonetheless until recently there has been a reluctance within architectural culture to acknowledge and accept the role of design research as part of the discourse However in many countries around the world one of the key changes in architecture and architectural education over the last decade has been the acceptance of design as a legitimate research area in its own right and this new series provides a forum where the best proponents of architectural design research can publish their work This volume provides a broad overview on design research that supports and amplifies the different volumes coming out in the book series It brings together leading architects and academics to discuss the more general issues involved in design research At the end there is an Indicative Bibliography which alludes to a long history of architectural books which can be seen as being in the spirit of design research *Pictures Past* A. Medium Design Keller Easterling, 2021-01-19 How to Design the World Working Without Solutions In Medium Design everyone is a designer But design in this case inverts the typical focus on object over its settings to concentrate on the medium the matrix space between objects events and ideological declarations It disrupts habitual modern approaches to the world's intractable dilemmas from climate cataclysm to inequality to concentrations of authoritarian power In a series of case studies dealing with everything from automation and migration to explosive urban growth and atmospheric changes Medium Design offers spatial tools for innovation and global decision making to challenge the authority of more familiar legal or economic approaches From this perspective solutions are mistakes and ideologies are unreliable guides Rather than the modern desire for the new designers find more sophistication in relationships between emergent and incumbent technologies Encouraging entanglement medium design does not try to eliminate problems but rather to put them together in productive combinations And in the process of reconceptualizing design Easterling puzzles over bulletproof powers Stanley Kubrick ISIS
