English translation of two Sinhalese novels Piccamala and Araliyamal aramaya. Motilal and Jawaharlal Nehru were both prominent Indian men in their own right, Motilal as a widely successful civil lawyer and a popular political figure, and Jawaharlal as a firm nationalist leader and possible heir of the Mahatma. This book discusses Motilal's life and achievements, and examines the first four decades of Jawaharlal's life. It shows that while the father-son tandem played different roles in the nationalist struggle of India, their close emotional bonds helped them influence each other. The importance of various electrical machines is well known in the various engineering fields. The book provides comprehensive coverage of the magnetic circuits, magnetic materials, single and three phase transformers and d.c. machines. The book is structured to cover the key aspects of the course Electrical Machines - I. The book starts with the explanation of basics of magnetic circuits, concepts of self and mutual inductances and important magnetic materials. In October 1947, two months after he became independent India's first prime minister, Jawaharlal Nehru wrote the first of his fortnightly letters to the heads of the country's provincial governments—a tradition he kept until a few months before his death. This carefully selected collection covers a range of themes and subjects, including citizenship, war and peace, law and order, governance and corruption, and India's place in the world. The letters also cover momentous world events and the many crises the country faced during the first sixteen years after Independence. Visionary, wise and reflective, these letters are of great contemporary relevance for the guidance they provide for our current problems and predicaments. Uncommon times call for uncommon wisdom. It's inspiring to hear from people who've graduated from the school of hard knocks, yet kept a sense of humor. People like Twain, Voltaire, Oscar Wilde. People who've said the thing so well that we all wish we'd said it. People who've been there, done that, and refuse to sugarcoat what they've learned. People who know, as Sherry Hochman puts it, that "Every day is a gift—even if it sucks." From Kathryn and Ross petras, curators of craziness (and surprising smarts), comes a timely collection of reassuring reality: "Why is there so much month left at the end of the money?"—John Barrymore "October. This is one of the peculiarly dangerous months to speculate in stocks in. The others are July, January, September, April, November, May, March, June, December, August, and February." —Mark Twain "I know God will not give me anything I can't handle. I just wish he didn't trust me so much."—Mother Teresa "When one burns one's bridges, what a very nice fire it makes."—Dylan Thomas "If you think you have it tough, read history books."—Bill Maher And Voltaire: "Life is a shipwreck but we must not forget to sing in the lifeboats." Duravastha is a Malayalam language poetry book by Mahakavi Kumaran Asan. It was first published in 1922. P.N. Haksar has been hailed as the most distinguished public servant of his generation, having served as Secretary and Principal Secretary to the Prime Minister Indira Gandhi from 1967-73. His book a partial autobiography, distilling the first sixteen years of his life, surveying the history of his ancestors, reconstructing their portraits, looking into their foibles and achievements. Examining his family heritage, Haksar also deftly captures the flavor and charm of early twentieth-century India and its first stirrings under Gandhi and Nehru. A boy who can recall his past life. A hint of hidden treasure. An adventure in the desert of Rajasthan . . . In one of their most hair-raising

escapades ever, Feluda and Topshe set out for Rajasthan on the trail of the parapsychologist Dr Hajra and Mukul, a boy who claims he remembers his previous life. On the way they meet Jatayu, an author of popular crime thrillers, who decides to accompany them. After numerous adventures, including an impromptu camel ride across the desert, they reach Mukul's Golden Fortress, where Feluda unravels the many strands of a complex case. An unputdownable volume that spans Khushwant Singh's long, chequered career, in which he reminisces about the people he met, befriended, and fell out with. It also includes fascinating, insightful pieces on the many places the author travelled. Characteristically 'no-holds-barred', each profile reveals intimate titbits about the personalities and allows us to discover unknown aspects of India and the world. Maritime security is one of the latest additions to the field of international as well as national security. The concept has received growing attention especially due to the intensification of concerns over maritime terrorism since 2000. The rise of modern piracy, maritime crimes such as human trafficking, and the increasing importance of the 'blue economy' and issues relating to freedom of navigation, maritime environmental protection and resource management have resulted in increased significance of maritime security studies. A significant number of states and other international actors such as, Multinational Corporations (MNCs) and Transnational Corporations (TNCs), have placed maritime security high in their security agenda. This priority is reflected in several governmental and intergovernmental strategies for maritime security. In addition to that the regional grouping in the Indian Ocean and Indo – Pacific, such as ASEAN, BIMSTEC, IORA, and IONS have placed maritime security issues high in their agenda. Part of the new IFST Advances in Food Science Series, Seafood Processing: Technology, Quality and Safety covers the whole range of current processes which are applied to seafood, as well as quality and safety aspects. The first part of the book ('Processing Technologies') covers primary processing, heating, chilling, freezing, irradiation, traditional preservation methods (salting, drying, smoking, fermentation, etc), frozen surimi and packaging. The subjects of waste management and sustainability issues of fish processing are also covered. In the second part ('Quality and Safety Issues'), quality and safety analysis, fish and seafood authenticity and risk assessment are included. Proceedings of the Symposium on "Advances and Priorities in Fisheries Technology," held during 11-13 February, 1998, at Cochin, India. Elegant, perceptive, and startlingly prophetic, Nehru: A Contemporary's Estimate is one of the finest accounts of Nehru ever written. Walter Crocker, the Australian high commissioner to India,

admired Nehru the man—his grace, style, intelligence and energy—and was deeply critical of many of his political decisions—the invasion of Goa, India’s Kashmir policy, the Five Year Plans. This book, written shortly after Nehru’s death, is full of invaluable first hand observations about the man and his politics. Many of Crocker’s points, too—especially the implications of the Five Year Plans and of the introduction of democracy to India—are particularly relevant today. Out of print for many years, this classic biography has been reissued with an authoritative foreword by Ramachandra Guha. The wavelet is a powerful mathematical tool that plays an important role in science and technology. This book looks at some of the most creative and popular applications of wavelets including biomedical signal processing, image processing, communication signal processing, Internet of Things (IoT), acoustical signal processing, financial market data analysis, energy and power management, and COVID-19 pandemic measurements and calculations. The editor’s personal interest is the application of wavelet transform to identify time domain changes on signals and corresponding frequency components and in improving power amplifier behavior. Unlike other parts of India, Kerala's geographic location in the extreme south-west protected it from extraneous influences allowing its many splendoured arts to continue and evolve with a certain insularity. Besides the world-renowned Kathakali, Kerala boasts of the oldest form of Sanskrit theatre, Kootiattam; ritual dances where blood sacrifices are still prevalent; masked and trance performances where dancers wear headgear more than 5 metres high; the most ancient martial arts technique, Kalaripayattu, and many other little-known forms of dance, war and ritual. In a society where every act is codified and every colour symbolic, it needs a lifetime to understand the intricacies and the layers of meaning and sophistication that make up the culture of region. In this book, Kerala's many art and ritual forms are introduced by eminent scholars. Stunning colour visuals, many of rites never seen outside the temple, allow, for the first time, a comparative look into the intricacies of style, make-up, adornments and costumes, making this book a first-ever introduction to the mysterious arts of Kerala.
