Chinese Military Reform in the Age of Xi Jinping: Drivers, Challenges, and Implications Joel Wuthnow, Phillip Charles Saunders, China's People's Liberation Army PLA has embarked on its most wide ranging and ambitious restructuring since 1949 including major changes to most of its key organizations The restructuring reflects the desire to strengthen PLA joint operation capabilities on land sea in the air and in the space and cyber domains The reforms could result in a more adept joint warfighting force though the PLA will continue to face a number of key hurdles to effective joint operations Several potential actions would indicate that the PLA is overcoming obstacles to a stronger joint operations capability The reforms are also intended to increase Chairman Xi Jinping's control over the PLA and to reinvigorate Chinese Communist Party CCP organs within the military Xi Jinping's ability to push through reforms indicates that he has more authority over the PLA than his recent predecessors The restructuring could create new opportunities for U S China military contacts

Global Trends 2040 National Intelligence Council, 2021-03 The ongoing COVID 19 pandemic marks the most significant singular global disruption since World War II with health economic political and security implications that will ripple for years to come **Global Trends 2040 2021** *Global Trends 2040 A More Contested World 2021* released by the US National Intelligence Council is the latest report in its series of reports starting in

1997 about megatrends and the world's future. This report, strongly influenced by the COVID-19 pandemic, paints a bleak picture of the future and describes a contested, fragmented, and turbulent world. It specifically discusses the four main trends that will shape tomorrow's world: Demographics (by 2040, 1.4 billion people will be added, mostly in Africa and South Asia), Economics (increased government debt and concentrated economic power will escalate problems for the poor and middle class), Climate (a hotter world will increase water, food, and health insecurity), and Technology (the emergence of new technologies could both solve and cause problems for human life). Students, trend policymakers, entrepreneurs, academics, journalists, and anyone eager for a glimpse into the next decades will find this report, with colored graphs, essential reading.

The Long Game Rush Doshi, 2021-06-11. For more than a century, no US adversary or coalition of adversaries—not Nazi Germany, Imperial Japan, or the Soviet Union—has ever reached sixty percent of US GDP. China is the sole exception, and it is fast emerging into a global superpower that could rival, if not eclipse, the United States. What does China want? Does it have a grand strategy to achieve it, and what should the United States do about it? In *The Long Game*, Rush Doshi draws from a rich base of Chinese primary sources, including decades worth of party documents, leaked materials, memoirs by party leaders, and a careful analysis of China's conduct, to provide a history of China's grand strategy since the end of the Cold War. Taking readers behind the Party's closed doors, he uncovers Beijing's long, methodical game to displace America from its hegemonic position in both the East Asia regional and global orders through three sequential strategies of displacement. Beginning in the 1980s, China focused for two decades on hiding capabilities and biding time. After the 2008 Global Financial Crisis, it became more assertive regionally, following a policy of actively accomplishing something. Finally, in the aftermath of populist elections in 2016, China shifted to an even more aggressive strategy for undermining US hegemony, adopting the phrase "great changes unseen in a century." After charting how China's long game has evolved, Doshi offers a comprehensive yet asymmetric plan for an effective US response. Ironically, his proposed approach takes a page from Beijing's own strategic playbook to undermine China's ambitions and strengthen American order without competing dollar-for-dollar, ship-for-ship, or loan-for-loan.

To Get Rich Is Glorious Jacques deLisle, Avery Goldstein, 2019-09-24. In 1978, China launched economic reforms that have resulted in one of history's most dramatic national transformations. The reforms removed bureaucratic obstacles to economic growth and tapped China's immense reserves of labor and entrepreneurial talent to unleash unparalleled economic growth in the country. In the four decades since, China has become the world's second largest economy after the United States and a leading force in international trade and investment. As the contributors to this volume show, China also faces daunting challenges in sustaining growth, continuing its economic transformation, addressing the adverse consequences of economic success, and dealing with mounting suspicion from the United States and other trade and investment partners. China also confronts risks stemming from the project to expand its influence across the globe through infrastructure investments and other projects under the Belt and Road Initiative. At the same time, China's current leader, Xi Jinping, appears determined to make his own

lasting mark on the country and on China's use of its economic clout to shape the world around it *Learning from SARS* Institute of Medicine, Board on Global Health, Forum on Microbial Threats, 2004-04-26 The emergence of severe acute respiratory syndrome SARS in late 2002 and 2003 challenged the global public health community to confront a novel epidemic that spread rapidly from its origins in southern China until it had reached more than 25 other countries within a matter of months. In addition to the number of patients infected with the SARS virus, the disease had profound economic and political repercussions in many of the affected regions. Recent reports of isolated new SARS cases and a fear that the disease could reemerge and spread have put public health officials on high alert for any indications of possible new outbreaks. This report examines the response to SARS by public health systems in individual countries, the biology of the SARS coronavirus and related coronaviruses in animals, the economic and political fallout of the SARS epidemic, quarantine law and other public health measures that apply to combating infectious diseases, and the role of international organizations and scientific cooperation in halting the spread of SARS. The report provides an illuminating survey of findings from the epidemic along with an assessment of what might be needed in order to contain any future outbreaks of SARS or other emerging infections.

China's Influence and American Interests Larry Diamond, Orville Schell, 2019-08-01 While Americans are generally aware of China's ambitions as a global economic and military superpower, few understand just how deeply and assertively that country has already sought to influence American society. As the authors of this volume write, it is time for a wake-up call. In documenting the extent of Beijing's expanding influence operations inside the United States, they aim to raise awareness of China's efforts to penetrate and sway a range of American institutions: state and local governments, academic institutions, think tanks, media, and businesses. And they highlight other aspects of the propagandistic discourse war waged by the Chinese government and Communist Party leaders that are less expected and more alarming, such as their view of Chinese Americans as members of a worldwide Chinese diaspora that owes undefined allegiance to the so-called Motherland. Featuring ideas and policy proposals from leading China specialists, *China's Influence and American Interests* argues that a successful future relationship requires a rebalancing toward greater transparency, reciprocity, and fairness. Throughout, the authors also strongly state the importance of avoiding casting aspersions on Chinese and on Chinese Americans who constitute a vital portion of American society. But if the United States is to fare well in this increasingly adversarial relationship with China, Americans must have a far better sense of that country's ambitions and methods than they do now.

Ethnic Policy in China James Leibold, 2013 Following significant interethnic violence beginning in 2008, Chinese intellectuals and policymakers are now engaged in unprecedented debate over the future direction of their country's ethnic policies. This study attempts to gauge current Chinese opinion on this once secretive and still highly sensitive area of national policy. Domestic Chinese opinion on ethnic policies over the last five years is reviewed, and implications for future policies under the new leadership of CPC Secretary General Xi Jinping are explored. Careful review of a wide spectrum of contemporary Chinese

commentary identifies an emerging consensus for ethnic policy reform. Leading public intellectuals as well as some party officials now openly call for new measures strengthening national integration at the expense of minority rights and autonomy. These reformers argue that divisive ethnic policies adopted from the former USSR must be replaced by those supporting an ethnic melting pot concept. Despite this important shift in opinion, such radical policy changes as ending regional ethnic autonomy or minority preferences are unlikely over the short to medium term. Small yet significant adjustments in rhetoric and policy emphasis are however expected as the party state attempts to strengthen interethnic cohesiveness as a part of its larger agenda of stability maintenance.

About the author: James Leibold is a senior lecturer in Politics and Asian Studies at La Trobe University in Melbourne, Australia. He is the author of *Reconfiguring Chinese Nationalism* (2007) and co-editor of *Critical Han Studies* (2012) and *Minority Education in China* (forthcoming). His research on ethnicity, nationalism, and race in modern China has appeared in *The China Journal*, *The China Quarterly*, *The Journal of Asian Studies*, *Modern China*, and other publications.

China's Grand Strategy Andrew Scobell, Edmund J. Burke, Cortez A. Cooper III, Sale Lilly, Chad J. R. Ohlandt, Eric Warner, J.D. Williams, 2020-07-27. To explore what extended competition between the United States and China might entail out to 2050, the authors of this report identified and characterized China's grand strategy, analyzed its component national strategies (diplomacy, economics, science and technology, and military affairs), and assessed how successful China might be at implementing these over the next three decades.

The Paradox of Power David C. Gompert, 2020. The second half of the 20th century featured a strategic competition between the United States and the Soviet Union. That competition avoided World War III in part because during the 1950s, scholars like Henry Kissinger, Thomas Schelling, Herman Kahn, and Albert Wohlstetter analyzed the fundamental nature of nuclear deterrence. Decades of arms control negotiations reinforced these early notions of stability and created a mutual understanding that allowed U.S.-Soviet competition to proceed without armed conflict. The first half of the 21st century will be dominated by the relationship between the United States and China. That relationship is likely to contain elements of both cooperation and competition. Territorial disputes such as those over Taiwan and the South China Sea will be an important feature of this competition, but both are traditional disputes and traditional solutions suggest themselves. A more difficult set of issues relates to U.S.-Chinese competition and cooperation in three domains in which real strategic harm can be inflicted in the current era: nuclear space and cyber. Just as a clearer understanding of the fundamental principles of nuclear deterrence maintained adequate stability during the Cold War, a clearer understanding of the characteristics of these three domains can provide the underpinnings of strategic stability between the United States and China in the decades ahead. That is what this book is about.

Making Of An Economic Superpower, The: Unlocking China's Secret Of Rapid Industrialization Yi Wen,2016-05-13 The rise of China is no doubt one of the most important events in world economic history since the Industrial Revolution Mainstream economics especially the institutional theory of economic development based on a dichotomy of extractive vs inclusive political institutions is highly inadequate in explaining China s rise This book argues that only a radical reinterpretation of the history of the Industrial Revolution and the rise of the West as incorrectly portrayed by the institutional theory can fully explain China s growth miracle and why the determined rise of China is unstoppable despite its current backward financial system and political institutions Conversely China s spectacular and rapid transformation from an impoverished agrarian society to a formidable industrial superpower sheds considerable light on the fundamental shortcomings of the institutional theory and mainstream blackboard economic models and provides more accurate reevaluations of historical episodes such as Africa s enduring poverty trap despite radical political and economic reforms Latin America s lost decades and frequent debt crises 19th century Europe s great escape from the Malthusian trap and the Industrial Revolution itself
