and sanity In this book Nat Greene who s been solving hard problems professionally for over twenty years shares nine behaviors anyone can adopt to find solutions to even the most seemingly intractable problems The problem with most problem solving Greene says is that it s not problem solving at all it s guessing We have an idea of what might work and we try it out If that doesn t work we try something else And so on It s inefficient at best and with really hard problems there are simply too many variables for guessing to work Greene shows you how to adopt the behaviors great problem solvers use to arrive at solutions efficiently without guessing He illustrates them with examples ranging from everyday issues like fixing a malfunctioning garage door to stopping frequent breakdowns at a chemical plant saving millions of dollars to addressing the scourge of poverty in sub Saharan Africa So stop guessing and start solving today

The Art and Craft of Problem Solving Paul Zeitz,2017 This text on mathematical problem solving provides a comprehensive outline of problemsolving ology concentrating on strategy and tactics It discusses a number of standard mathematical subjects such as combinatorics and calculus from a problem solver s perspective *The Art of Problem Solving* Anthony Ekanem,2016-11-07 You likely use problem solving every day It is often taken for granted People do not realize just how wonderful and important problem solving is Most people do not even recognize it as a skill In fact most of the time problem solving is just second nature Problem solving can actually be defined as an art The art of problem solving is something that we learn at a very young age It helps us through life and is something we could not live without Being able to solve problems is a life skill It is important and it should be taken seriously to get the best results from it Looking at problem solving as an art can help you to become more appreciative of it You can begin to use problem solving to its full potential and really respect that problem solving is important You just need to learn more about problem solving as a skill and an art Problem solving is a fixture in life You have to be able to solve problems Problems pop up every day Sometimes they are small and sometimes they are large Sometimes solving a problem is a matter of life and death and other times it is merely a matter of keeping your sanity Regardless of why you need problem solving you cannot deny that you need it If you are a parent then problem solving is a skill you no doubt could not live without Children are full of problems and as the parent it is up to you to help them find the solution Sometimes you have to be creative because problems that come up can sometimes be quite difficult to solve without a little creative thinking The same can be said in business Businesses have plenty of problems and it is up to the employees to find a way to solve those problems
