Bingo Grabbins is a Soddit. His comfortable life is disturbed when the wizard, Gandef, and a company of bizarrely Welsh dwarves drag him away on an adventure. They have a plot to raid the treasure hoard (or so they say) guarded by Smug, a large and very tedious dragon. Oh, and Bingo finds this ring thing... The hilarious autobiography of the legendary hero of The Soddit. Adam Roberts' The Soddit was a bestseller and sold 150,000 copies. But what happened to the Soddit after his adventures, and after his account of them was published. . . Don't build--or remodel--a home without it! This new textbook provides a comprehensive introduction to every aspect of the technology of low-rise construction. It includes sub-structure (site work, setting out and foundations) and superstructure (flooring, roofs, finishes, fittings and fixtures). The material here covers the first year course requirement of all courses on which construction technology is taught - no matter what the ultimate qualification. It offers tried and tested solutions to a range of construction problems and is organised following the sequence of construction. It will show what has been done in the past, demonstrating good practice - what works and what doesn't - and common faults. There are summaries of the more important BSI documents and reference to the latest building regulations. Lengthy explanations are avoided by relying heavily on hundreds of illustrations, pairing detail drawings with clear photographs to show real life construction situations. The supporting spreadsheet referred to in the book can be found at this link http://www.blackwellpublishing.com/pdf/fleming/Fleming_spreadsheet.xls The new Adam Roberts novel is a story of global apocalypse, old hatreds and new beginnings. It is his best novel to date. And this is how the world will end ... 'The snow started falling on the sixth of September, soft noiseless flakes filling the sky like a swarm of white moths, or like static interference on your TV screen - whichever metaphor, nature or technology, you find the more evocative. Snow everywhere, all through the air, with that distinctive sense of hurrying that a vigorous snowfall brings with it. Everything in a rush, busy-busy snowflakes. And, simultaneously, paradoxically, everything is hushed, calm, as quiet as cancer, as white as death. And at the beginning people were happy.' But the snow doesn't stop. It falls and falls and falls. Until it lies three miles thick across the whole of the earth. Six billion people have died. Perhaps 150,000 survive. But those 150,000 need help, they need support, they need organising, governing. And so the lies begin. Lies about how the snow started. Lies about who is to blame. Lies about who is left. Lies about what really lies beneath. Vols. 29-30 contain papers of the International Engineering Congress, Chicago, 1893; v. 54, pts. A-F, papers of the International Engineering Congress, St. Louis, 1904. Orbit is ending the summer with an explosion of new and exciting titles, sure to start your fall off right. Debut author Kate Locke draws the reader into a world of steampunk, vampires, goblins, and werewolves with God Save the Queen. Continuing the Victorian steampunk theme, The Iron Wyrms Affair by Lilith Saintcrow explores sorcery and logic, starring a forensic sorceress, a detective, and a conspiracy that will shake the

Empire. Two young orphans must find their own fortunes and magic in *House of Shadows*, the beginning of a new fantasy series by Rachel Neumeier. *Sharps*, the new fantasy thriller by K.J. Parker, shows dueling can be just as dangerous as war and twice as duplicitous. Jessica McClain is the only female werewolf ever to exist and now must survive against all odds in Amanda Carlson's debut novel, *Full Blooded*. Also, new to Orbit but no stranger to the science fiction and fantasy world, Michael Cobby brings *Seeds of Earth*, an epic space opera about an Earth colony in the middle of an intergalactic battle. Finally, Orbit is proud to announce *The Soddit*, a parody of *The Hobbit* where Bingo Grabbins must go on an adventure and steal a treasure guarded by Smug the dragon. Bingo Grabbins is a soddit who enjoys a comfortable life (apart from his feet, of course). But his contentment is disturbed when the wizard, Gandef, and a company of bizarrely Welsh dwarves drag him away on an adventure. They have a plot to raid the treasure hoard (or so they say) guarded by Smug, a large and very tedious dragon. Bingo is reluctant to take part in this insane venture, but a dwarven dagger held to his throat soon surprises even himself and off the companions go on a quest that seems truly epic (well, until you read about what later happened to Bingo's cousin, at any rate). Oh, and Bingo finds this ring thing... This text is organized into major sections on exterior cladding, exterior structures, and surface water control and landscaping. Wall surfaces are covered in a material- by-material organization, including thorough treatment of synthetic stucco (EIFS), a challenging issue for home inspectors. Reprint of the original, first published in 1859. The publishing house Anatiposi publishes historical books as reprints. Due to their age, these books may have missing pages or inferior quality. Our aim is to preserve these books and make them available to the public so that they do not get lost. In the grand tradition of the parody bestseller *Bored of the Rings*, this uproarious literary spoof follows the Tolkienesque adventures of Bingo "Sac" Grabbings, a rather unremarkable Soddit of Upper Middle Earth. He ventures forth (despite very sore and swollen feet indeed!) alongside Gandef the Coughing Wizard and a band of psoriasis-scratching, who-knows-what's-in-the-pipe-puffing dwarves, as they set out to relieve the haughty dragon Smug of his ill-gotten gold. With the recent blockbuster box office success of the *Lord of the Rings* films, the time is ripe for someone to poke a bit of good-natured fun at the phenomenon that is *The Hobbit*, and this hilarious parody succeeds brilliantly. Written by an acknowledged expert on all things Tolkien, it both salutes and skewers the classic novel, reinventing the tale of a courageous little being whose amazing persistence--and more than a bit of Soddit luck--belies his diminutive stature. *Cult Film as a Guide to Life* investigates the world and experience of cult films, from well-loved classics to the worst movies ever made. Including comprehensive studies of cult phenomena such as trash films, exploitation versions, cult adaptations, and case studies of movies as different as *Showgirls*, *Room 237* and *The Lord of the G-Strings*, this lively, provocative and original book shows why cult films may just be the perfect guide to making sense of the contemporary world. Using his expertise in two fields, I.Q. Hunter also explores the important overlap between cult film and adaptation studies. He argues that adaptation studies could learn a great deal from cult and fan studies about the importance of audiences' emotional investment not only in texts but also in the relationships between them, and how such bonds of caring are structured over time. The book's emergent theme is cult film as lived experience. With reference mostly to American cinema, Hunter explores how cultists, with their powerful emotional investment in films, care for them over time and across numerous intertexts in relationships of memory, nostalgia and anticipation. Since the mid 1990s, when the general public began using the Internet, governments and commerce have made vast investments in digital communications technology. There has been confusion and sometimes controversy over these, for example the proposed UK identity card system. The far-reaching commercial and social implications of decisions made in invisible or opaque specialist fields should concern every citizen. This book argues that decisions should be based on an understanding of the systems, technology and environment within which they operate; that experts and ordinary people should work together; and that technology and law are evolving in restrictive rather than enabling ways. Reprint of the original, first published in 1860. With this new book you'll quickly learn, step-by-step, the basic methods (and some valuable tricks of the trade) to master high-speed metal stud framing in commercial construction. If you're an experienced wood framer, you already have many of the skills you'll need. This manual, written by a framer who runs work for one of the largest metal stud contractors in the country, tells you just about everything you need to know to transfer those skills to metal stud framing in commercial buildings. My name is Bingo Grabbins. It's possible you know the basics: that I live in a hole, in the ground, not a nasty wet hole etc etc. A while ago I had a series of adventures, with a group of twelve doughty dwarfs. Sadly they're all dead now; but let's look on the bright side! I'm still alive. Since the events of *The Soddit* (worth a read you know) I have given up adventuring as - to speak frankly - a mug's game. Instead I've devoted myself to the writing of my various books. But the time has now

come for me to write my own autobiography. It's been growing on me for a while, like moss. This is the story of me after the famous story about me. It is the story of my other stories. It is in NO WAY related to The Hobbit. I don't even know what a Hobbit is.
