The Covid-19 pandemic has led the world to a dramatic loss of human life and presents an unprecedented challenge to human relations, public**

health, food systems and the world of work. Nearly half of the world's 3.3 billion global workforce are at risk of losing their livelihoods. Without the means to earn an income, many are unable to feed themselves and their families. Border closures, trade restrictions and confinement measures have been preventing the common people and the farmers from accessing markets such as buying inputs and selling their products. The pandemic has decimated jobs and placed millions of livelihoods at risk. • Best Selling Book in English Edition for SSC CPO Paper I Exam with objective-type questions as per the latest syllabus given by the SSC. • Compare your performance with other students using Smart Answer Sheets in EduGorilla's SSC CPO Paper I Exam Practice Kit. • SSC CPO Paper I Exam Preparation Kit comes with 11 Tests (8 Mock Tests + 3 Previous Year Papers) with the best quality content. • Increase your chances of selection by 14X. • SSC CPO Paper I Exam Prep Kit comes with well-structured and 100% detailed solutions for all the questions. • Clear exam with good grades using thoroughly Researched Content by experts. This book contains high-quality refereed research papers presented at the 6th International Conference on Computer Science, Engineering, and Education Applications (ICCSEEA2023), which took place in Warsaw, Poland, on March 17-19, 2023, and was organized by the National Technical University of Ukraine "Igor Sikorsky Kyiv Polytechnic Institute", the National Aviation University, Lviv Polytechnic National University, the Polish Operational and Systems Society, Warsaw University of Technology, and the International Research Association of Modern Education and Computer Science. The book covers a variety of topics, including cutting-edge research in computer science, artificial intelligence, engineering techniques, smart logistics, and knowledge representation with educational applications. The book is an invaluable resource for academics, graduate students, engineers, management professionals, and undergraduate students who are interested in computer science and its applications in engineering and education. This book presents the latest research findings, innovative research results, methods and development techniques related to P2P, grid, cloud and Internet computing from both theoretical and practical perspectives. It also reveals the synergies among such large-scale computing paradigms. P2P, grid, cloud and Internet computing technologies have rapidly become established as breakthrough paradigms for solving complex problems by enabling aggregation and sharing of an increasing variety of distributed computational resources at large scale. Grid computing originated as a paradigm for high-performance computing, as an alternative to expensive supercomputers through different forms of large-scale distributed computing. P2P computing emerged as a new paradigm after client-server and web-based computing and has proved useful in the development of social networking, B2B (business to

business), B2C (business to consumer), B2G (business to government), and B2E (business to employee). Cloud computing has been defined as a “computing paradigm where the boundaries of computing are determined by economic rationale rather than technical limits,” and it has fast become a computing paradigm with applicability and adoption in all application domains and which provides utility computing at a large scale. Lastly, Internet computing is the basis of any large-scale distributed computing paradigms; it has developed into a vast area of flourishing fields with enormous impact on today’s information societies, and serving as a universal platform comprising a large variety of computing forms such as grid, P2P, cloud and mobile computing.
