The Art Teacher's Guide to Exploring Art and Design in the Community Ilona Szekely, 2021-09-09 How can community art build connection in diverse communities Where is the art in contemporary libraries How do you bring subway art into the classroom Drawing on an abundance of examples from Finland Italy New Zealand Spain and the USA including the NYC 2nd Ave Subway the Detroit s Heidelberg Project the Favel Painting Foundation and bicycle rack sculpture Szekely inspires readers to look beyond the classroom walls to develop meaningful art experiences for students She shows the myriad art forms media expressions and design professions that have the influence and potential to shape the local environment reaching far beyond the traditional museum and gallery venue Underpinned by a clear philosophical foundation the field tested approaches show readers how to go beyond the study of reproductions or dwelling on of the masters who are framed in art museums instead having meaningful art experiences using everyday objects and diverse collective experiences She also shows that innovative and exciting art lessons don t need large amounts of funding transportation or even a museum within the local community Each chapter includes photographs talking points and key lesson ideas along with links to further resources

The First 20 Hours Josh Kaufman, 2013-06-13 Forget the 10 000 hour rule what if it s possible to learn the basics of any new skill in 20 hours or less Take a moment to consider how many things you want to learn to do What s on your list What s holding you back from getting started Are you worried about the time and effort it takes to acquire new skills time you don t have and effort you can t spare Research suggests it takes 10 000 hours to develop a new skill In this nonstop world when will you ever find that much time and energy To make matters worse the early hours of practicing something new are always the most frustrating That s why it s difficult to learn how to speak a new language play an instrument hit a golf ball or shoot great photos It s so much easier to watch TV or surf the web In *The First 20 Hours* Josh Kaufman offers a systematic approach to rapid skill acquisition how to learn any new skill as quickly as possible His method shows you how to deconstruct complex skills maximize productive practice and remove common learning barriers By completing just 20 hours of focused deliberate practice you ll go from knowing absolutely nothing to performing noticeably well Kaufman personally field tested the methods in this book You ll have a front row seat as he develops a personal yoga practice writes his own web based computer programs teaches himself to touch type on a nonstandard key board explores the oldest and most complex board game in history picks up the ukulele and learns how to windsurf Here are a few of the simple techniques he teaches Define your target performance level Figure out what your desired level of skill looks like what you re trying to achieve and what you ll be able to do when you re done The more specific the better Deconstruct the skill Most of the things we think of as skills are actually bundles of smaller subskills If you break down the subcomponents it s easier to figure out which ones are most important and practice those first Eliminate barriers to practice Removing common distractions and unnecessary effort makes it much easier to sit down and focus on deliberate practice Create fast feedback loops Getting accurate real time information about how well you re performing

during practice makes it much easier to improve Whether you want to paint a portrait launch a start up fly an airplane or juggle flaming chain saws *The First 20 Hours* will help you pick up the basics of any skill in record time and have more fun along the way
