Making the Case Patrick Donnell Ball, Herbert F. Spierer, Louise Spierer, 2000 In Guatemala Database Representation Ken Ward The State of the Global Education Crisis UNESCO, United Nations Children's Fund, World Bank (the), 2021-12-09 The global disruption to education caused by the COVID 19 pandemic is without parallel and the effects on learning are severe The crisis brought education systems across the world to a halt with school closures affecting more than 1.6 billion learners While nearly every country in the world offered remote learning opportunities for students the quality and reach of such initiatives varied greatly and were at best partial substitutes for in person learning Now 21 months later schools remain closed for millions of children and youth and millions more are at risk of never returning to education Evidence of the detrimental impacts of school closures on children's learning offer a harrowing reality learning losses are substantial with the most marginalized children and youth often disproportionately affected Countries have an opportunity to accelerate learning recovery and make schools more efficient equitable and resilient by building on investments made and lessons learned during the crisis Now is the time to shift from crisis to recovery and beyond recovery to resilient and transformative education systems that truly deliver learning and well being for all children and youth The World Bank website

Struggling to Make the Grade: A Review of the Causes and Consequences of the Weak Outcomes of South Africa's Education System Mr. Montfort Mlachila, Thalefang Moeletsi, 2019-03-01 While South Africa has made significant improvements in basic and tertiary education enrollment the country still suffers from significant challenges in the quality of educational achievement by almost any international metric The paper finds that money is clearly not the main issue since the South Africa's education budget is comparable to OECD countries as a percent of GDP and exceeds that of most peer sub-Saharan African countries in per capita terms The main explanatory factors are complex and multifaceted and are associated with insufficient subject knowledge of some teachers history race language geographic location and socio economic status Low educational achievement contributes to low productivity growth and high levels of poverty unemployment and inequality Drawing on the literature the paper sketches some policy considerations to guide the debate on what works and what does not **Musical Instrument Design** Bart Hopkin, 1996-01-01 This is an encyclopedic large format book containing hundreds of illustrations While not geared toward making conventional instruments Musical Instrument Design provides all the information that anyone amateur or professional should ever need to construct an amazingly wide variety of percussion string and wind instruments Includes many designs along with parts lists and detailed construction instructions *Reducing Inequalities* Rémi Genevey, R. K. Pachauri, Laurence Tubiana, 2013-01-01 The reduction of inequalities within and between countries stands as a policy goal and deserves to take centre stage in the design of the Sustainable Development Goals

agreed during the Rio 20 Summit in 2012 The 2013 edition of A Planet for Life represents a unique international initiative grounded on conceptual and strategic thinking and most importantly empirical experiments conducted on five continents and touching on multiple realities This unprecedented collection of works proposes a solid empirical approach rather than an ideological one to inform future debate The case studies collected in this volume demonstrate the complexity of the new systems required to accommodate each country s specific economic political and cultural realities These systems combine technical financial legal fiscal and organizational elements with a great deal of applied expertise and are articulated within a clear well understood growth and job generating development strategy Inequality reduction does not occur by decree neither does it automatically arise through economic growth nor through policies that equalize incomes downward via ill conceived fiscal policies Inequality reduction involves a collaborative effort that must motivate all concerned parties one that constitutes a genuine political and social innovation and one that often runs counter to prevailing political and economic forces

Laura-Mihaela Muresan,Concepción Orna-Montesinos,2021-03-11 This edited book brings together an international cast of contributors to examine how academic literacy is learned and mastered in different tertiary education settings around the world Bringing to the fore the value of qualitative enquiry through ethnographic methods the authors illustrate in depth descriptions of genre knowledge and academic literacy development in first and second language writing All of the data presented in the chapters are original as well as innovative in the field in terms of content and scope and thought provoking regarding theoretical methodological and educational approaches The contributions are also representative of both novice and advanced academic writing experiences providing further insights into different stages of academic literacy development throughout the career span of a researcher Set against the backdrop of internationalisation trends in Higher Education and the pressure on multilingual academics to publish their research outcomes in English this volume will be of use to academics and practitioners interested in the fields of Languages for Academic Purposes Applied Linguistics Literacy Skills Genre Analysis and Acquisition and Language Education *Higher Education Pathways* Paul Ashwin,M. Case,2018-12-13

In what ways does access to undergraduate education have a transformative impact on people and societies What conditions are required for this impact to occur What are the pathways from an undergraduate education to the public good including inclusive economic development These questions have particular resonance in the South African higher education context which is attempting to tackle the challenges of widening access and improving completion rates in a system in which the segregations of the apartheid years are still apparent Higher education is recognised in core legislation as having a distinctive and crucial role in building post apartheid society Undergraduate education is seen as central to addressing skills shortages in South Africa It is also seen to yield significant social returns including a consistent positive impact on societal institutions and the development of a range of capabilities that have public as well as private benefits This book offers comprehensive contemporary evidence that allows for a fresh engagement with these pressing issues *David and Goliath* Malcolm Gladwell,2013-10-03 Why do underdogs succeed so much more than we expect How do the weak outsmart the

strong In David and Goliath Malcolm Gladwell no 1 bestselling author of The Tipping Point Blink Outliers and What the Dog Saw takes us on a scintillating and surprising journey through the hidden dynamics that shape the balance of power between the small and the mighty From the conflicts in Northern Ireland through the tactics of civil rights leaders and the problem of privilege Gladwell demonstrates how we misunderstand the true meaning of advantage and disadvantage When does a traumatic childhood work in someone s favour How can a disability leave someone better off And do you really want your child to go to the best school he or she can get into David and Goliath draws on the stories of remarkable underdogs history science psychology and on Malcolm Gladwell s unparalleled ability to make the connections others miss It s a brilliant illuminating book that overturns conventional thinking about power and advantage A global phenomenon there is it seems no subject over which he cannot scatter some magic dust Observer

Public Sociology Michael Burawoy,2021-09-08 Michael Burawoy has helped to reshape the theory and practice of sociology across the Western world Public Sociology is his most thoroughgoing attempt to explore what a truly committed engaged sociology should look like in the twenty first century Burawoy looks back on the defining moments of his intellectual journey exploring his pivotal early experiences as a researcher such as his fieldwork in a Zambian copper mine and a Chicago factory He recounts his time as a graduate and professor during the ideological ferment in sociology departments of the 1970s and explores how his experiences intersected with a changing political and intellectual world up to the present Recalling Max Weber Burawoy argues that sociology is much more than just a discipline it is a vocation to be practiced everywhere and by everyone

Mapping Equity and Quality in Mathematics Education Bill Atweh,Mellony Graven,Walter Secada,Paola Valero,2011-01-06 Concerns about quality mathematics education are often posed in terms of the types of mathematics that are worthwhile and valuable for both the student and society in general and about how to best support students so that they can develop this mathematics Concerns about equity are about who is excluded from the opportunity to develop quality mathematics within our current practices and systems and about how to remove social barriers that systematically disadvantage those students This collection of chapters summarises our learning about the achievement of both equity and quality agendas in mathematics education and to move forward the debate on their importance for the field
