Ancient Egypt Transformed May 21 2022 The Middle Kingdom (ca. 2030–1650 B.C.) was a transformational period in ancient Egypt, during which older artistic conventions, cultural principles, religious beliefs, and political systems were revived and reimagined. Ancient Egypt Transformed presents a comprehensive picture of the art of the Middle Kingdom, arguably the least known of Egypt's three kingdoms and yet one that saw the creation of powerful, compelling works rendered with great subtlety and sensitivity. The book brings together nearly 300 diverse works— including sculpture, relief decoration, stelae, jewelry, coffins, funerary objects, and personal possessions from the world's leading collections of Egyptian art. Essays on architecture, statuary, tomb and temple relief decoration, and stele explore how Middle Kingdom artists adapted forms and iconography of the Old Kingdom, using existing conventions to create strikingly original works. Twelve lavishly illustrated chapters, each with a scholarly essay and entries on related objects, begin with discussions of the distinctive art that arose in the south during the early Middle Kingdom, the artistic developments that followed the return to Egypt's traditional capital in the north, and the renewed construction of pyramid complexes. Thematic chapters devoted to the pharaoh, royal women, the court, and the vital role of family explore art created for different strata of Egyptian society, while others provide insight into Egypt's expanding relations with foreign lands and the themes of Middle Kingdom literature. The era's religious beliefs and practices, such as the pilgrimage to Abydos, are revealed through magnificent objects created for tombs, chapels, and temples. Finally, the book discusses Middle Kingdom archaeological sites, including excavations undertaken by the Metropolitan Museum over a number of decades. Written by an international team of respected Egyptologists and Middle Kingdom specialists, the text provides recent scholarship and fresh insights, making the book an authoritative resource.

Embodying Osiris Aug 12 2021 The modern Western movement to embrace Eastern spiritual traditions usually stops with India and the Orient. Westerners have yet to discover the wisdom that dates back even further to ancient Egypt. With a Jungian perspective, clinical psychologist Dr. Thom F. Cavalli plumbs that wisdom through the myth of Osiris, the green-skinned Egyptian god of vegetation and the Underworld. As no one else has done, Cavalli draws on Osiris's death and resurrection as a guide to spiritual transformation. The myth represents the joining of the conscious and the unconscious, the light and the dark, life and death, and shows how to live our temporal existence in service to and anticipation of eternal life. Cavalli sees the ancient art of alchemy — which attempted to turn lead into gold — as the key. The alchemical recipe "solve et coagula" (solution and coagulation) encoded in the myth describes the integration of all parts of a person and the method for achieving an experience of immortality in life and eternal life after death. The Osiris myth thus provides a model for the contemporary quest for individuation, the Jungian term for integrating ego and self, body and soul, in the process of becoming whole.

Population Circulation and the Transformation of Ancient Zuni Communities Jul 23 2022 Because nearly all aspects of culture depend on the movement of bodies, objects, and ideas, mobility has been a primary topic during the past forty years of archaeological research on small-scale societies. Most studies have concentrated either on local moves related to subsistence within geographically bounded communities or on migrations between regions resulting from pan-regional social and environmental changes. Gregson Schachner, however, contends that a critical aspect of mobility is the transfer of people, goods, and information within regions. This type of movement, which geographers term "population circulation," is vitally important in defining how both regional social systems and local communities are constituted, maintained, and—most important—changed. Schachner analyzes a population shift in the Zuni region of west-central New Mexico during the thirteenth century AD that led to the inception of major demographic changes, the founding of numerous settlements in frontier zones, and the initiation of radical transformations of community organization. Schachner argues that intraregional population circulation played a vital

role in shaping social transformation in the region and that many notable changes during this period arose directly out of peoples' attempts to create new social mechanisms for coping with frequent and geographically extensive residential mobility. By examining multiple aspects of population circulation and comparing areas that were newly settled in the thirteenth century to some that had been continuously occupied for hundreds of years, Schachner illustrates the role of population circulation in the formation of social groups and the creation of contexts conducive to social change. The Illumined Heart Feb 15 2022 Why are modern Christians so indistinguishable from everyone else? Why don't they stand out in virtue and joy? How could the early saints fast valiantly, pray constantly, and love others? Drawing on Christian writings throughout the early centuries, Frederica Mathewes-Green illuminates the ancient, transcultural faith of the early church.

Runes for Transformation May 13 2024 Runes have long been used as vital tools for transformation. The Norse employed them as tools for communication, and the Vikings would use them as wisdom before embarking on a journey or entering battle. Runic scholar Kaedrich Olsen reclaims the transformative power of the runes for readers today as a key to unlocking our potential for personal growth and our life's vision. Runes for Transformation is unlike any other rune book on the market, with Olsen's unique techniques and applications for this ancient alphabet including affirmations, NLP, visualizations, and meditation, as well as the historical background essential to embarking on this path. A highly respected teacher and transpersonal path worker, Kaedrich Olsen posits that the time for this "deeper working" of the runes has come and this will aid readers in both personal and collective evolution. Runes for Transformation is a rich resource and excellent guide for readers to take the steps to change their lives with a boldly modern approach to the ancient runes and for "change that really matters."

Beyond Reception Feb 27 2023 Beyond Reception applies a new concept for analyzing cultural change, known as 'transformation', the study of Renaissance humanism. Traditional scholarship takes the Renaissance humanists at their word, that they were simply viewing the ancient world as it actually was and recreating its key features within their own culture. Initially modern studies in the classical tradition accepted this claim and saw this process as largely passive.

'Transformation theory' emphasizes the active role played by the receiving culture both in constructing a vision of the past and in transforming that vision into something that was a meaningful part of the later culture. A chapter then explains the terminology and workings of 'transformation theory' is followed by essays by nine established experts that suggest how the key disciplines of grammar, rhetoric, history, poetry, and philosophy in the Renaissance represent transformations of what went on in these fields in ancient Greece and Rome. The picture that emerges suggests that Renaissance humanism as it was actually practiced both received and transformed the classical past, at the same time as it constructed a vision of that past that still resonates today.

Earth Light Nov 26 2022 Presents important practical methods of working within the Faery Tradition. Techniques of visualizations and imagination are used.

Embodying Value? Aug 24 2022 This bilingual volume presents a series of case studies exploring the ways in which different objects from the ancient world changed in both meaning and value over time. The contributions range in focus from the Neolithic until the medieval period, and interpret the material from a theoretical, interdisciplinary perspective. The case studies examine how objects represent, embody and affect particular values, illuminating the relationship between humans, societies and objects, as well as the role of the material in everyday life. 10 essays in English, 3 in German.

The Transformation of the World May 01 2023 A panoramic global history of the nineteenth century A monumental history of the nineteenth century, The Transformation of the World offers a panoramic and multifaceted portrait of a world in transition. Jürgen Osterhammel, an eminent scholar who has been called the Braudel of the nineteenth

century, moves beyond conventional Eurocentric and chronological accounts of the era, presenting instead a truly global history of breathtaking scope and towering erudition. He examines the powerful and complex forces that drove global change during the "long nineteenth century," taking readers from New York to New Delhi, from the Latin American revolutions to the Taiping Rebellion, from the perils and promise of Europe's transatlantic labor markets to the hardships endured by nomadic, tribal peoples across the planet. Osterhammel describes a world increasingly networked by the telegraph, the steamship, and the railways. He explores the changing relationship between human beings and nature, looks at the importance of cities, explains the role slavery and its abolition played in the emergence of new nations, challenges the widely held belief that the nineteenth century witnessed the triumph of the nation-state, and much more. This is the highly anticipated English edition of the spectacularly successful and critically acclaimed German book, which is also being translated into Chinese, Polish, Russian, and French. Indispensable for any historian, *The Transformation of the World* sheds important new light on this momentous epoch, showing how the nineteenth century paved the way for the global catastrophes of the twentieth century, yet how it also gave rise to pacifism, liberalism, the trade union, and a host of other crucial developments.

The Palgrave Handbook of Learning for Transformation Oct 14 2021 This handbook offers an expanded discourse on transformative learning by making the turn into new passageways to explore the phenomenon of transformation. It curates diverse discourses, knowledges and practices of transformation, in ways that both includes and departs from the adult learning mainstay of transformative learning and adult education. The purpose of this handbook is not to resolve or unify a theory of transformation and all the disciplinary contributions that clearly promote a living concept of transformation. Instead, the intent is to catalyze a more complex and deeper inquiry into the "Why of transformation." Each discipline, culture, ethics and practice has its own specialized care and reasons for paying attention to transformation. How can scholars, practitioners, and active members of discourses on transformative learning make a difference? How can they foster and create conditions that allow us to move on to other, unaddressed or understudied questions? To answer these questions, the editors and their authors employ the metaphor of the many turns into passageways to convey the potential of transformation that may emerge from the many connecting passageways between, for instance, people and society, theory and practice, knowledge created by diverse disciplines and fields/professions, individual and collective transformations, and individual and social action.

These sites anchor the super-energy codes to power beyond-dreams transformation for individuals who think differently, know differently, dream differently, who are creating the change for a pro-humanity and pro-earth. This not only takes vision and courage but the super-energy levels to create and contribute effectively, in freedom and peace, as spiritual warriors of change.

Ancient Judaism and Christian Origins Aug 04 2023 In the nineteenth and first half of the twentieth century, Christian scholars portrayed Judaism as the dark religious backdrop to the liberating events of Jesus' life and the rise of the early church. Since the 1950s, however, a dramatic shift has occurred in the study of Judaism, driven by new manuscript and archaeological discoveries and new methods and tools for analyzing sources. George Nickelsburg here provides a broad and synthesizing picture of the results of the past fifty years of scholarship on early Judaism and Christianity. He organizes his discussion around a number of traditional topics: scripture and tradition, Torah and the righteous life, God's activity on humanity's behalf, agents of God's activity, eschatology, historical circumstances, and social settings. Each of the chapters discusses the findings of contemporary research on early Judaism, and then sketches the implications of this research for a possible reinter-pretation of Christianity. Still, in the author's view, there remains a major Jewish-Christian agenda yet to be developed and implemented.

Sekhmet Jan 17 2022 A shamanic ritual with the Egyptian goddess Sekhmet to bring about alchemical transformation at the deepest levels of your being • Details how to work with Sekhmet to transform your negative behavior patterns and character flaws into creative impulses and higher energies • Leads you through guided visualizations, illustrated with photographs, to Sekhmet's chapel at the Temple of Karnak and through her shamanic ritual of transformation • Includes initiations, rites of passage, and transmissions from Sekhmet to release your fears and anger and rejuvenate your body, mind, and spirit Sekhmet is the lioness goddess of the Egyptian Pantheon, a fierce protector of truth, balance, and the Cosmic order of Ma'at. Known and feared as the goddess of war and destruction, she also represents the transformative power of kundalini energy, or sekhem, and is the main goddess to harness this power for healing. As "She Who Comes in Times of Chaos," she takes offerings of fear, rage, and weakness and transforms them into alchemical gold, the universal medicine for physical, emotional, and soul healing. In this book you are guided through a shamanic ritual of alchemical transformation and initiation with Sekhmet, working with this powerful goddess to release your most deeply rooted negative behavior patterns and be reborn into a more purified state of consciousness. Using intensive self-examination exercises to help you prepare to meet the goddess, the author leads you through a guided visualization, illustrated

with photographs, to an ancient statue of Sekhmet in her chapel at the Temple of Karnak. There, you will be shamanistically devoured by the goddess, directly experiencing the alchemical process of transformation in the belly of Sekhmet until you are rebirthed as a fully realized adult child of the goddess. You will experience how your offering of pain, fear, rage, and self-sabotage is digested, absorbed, and assimilated by Sekhmet while you are initiated into the alchemy of total transformation. The initiations, rites of passage, and transmissions from Sekhmet included in the journey restructure the most important aspects of your body, mind, spirit, and soul. This journey of shamanic death, illumination, and rebirth in the belly of Sekhmet provides an opportunity to heal on all levels and allows you to release your rage, anger, and fear as you transform the energies that maintained them into creative and constructive solutions that benefit yourself, your community, and the planet.

Philae and the End of Ancient Egyptian Religion Jun 02 2023 The famous island of Philae, on Egypt's southern frontier, can be considered the last major temple site where Ancient Egyptian religion was practiced. According to the Byzantine historian Procopius, in 535-537 CE the Emperor Justinian ordered one of his generals to end this situation by destroying the island's temples. This account has usually been accepted as a sufficient explanation for the end of the Ancient Egyptian cults at Philae. Yet it is by no means unproblematic. This book shows that the event of 535-537 has to be seen in a larger context of religious transformation at Philae, which was more complex and gradual than Procopius describes it. Not only are the various Late Antique sources from and on Philae taken into account, for the first time the religious developments at Philae are also placed in a regional context by analyzing the sources from the other major towns in the region, Syene (Aswan) and Elephantine. "[T]he author situates his material into its wider historical context, and does this so effectively that what begins as a very specific study of a local problem expands to consider the transitions from paganism to Christianity in Egypt as a whole, and stands as one of the most important studies of this topic to date. This well written and deeply learned book is a tour de force of regional religious history that will also be essential reading for anyone interested in indigenous religion and early Christianity in this time of transition." -- Terry Wilfong, in Bulletin of the American Society of Papyrologists

Transformation of a Goddess Sep 12 2021 This book deals with the changing nature of the goddess Ishtar/Astarte/Aphrodite, who was widely revered in the ancient West Asia and the Mediterranean world and was known by different names. Although the three names are often closely related, their mutual relation has not yet been sufficiently clarified. They appear with different characters and attributes in various areas and periods. ... In this volume, specialists on different areas and periods discuss the theme from various perspectives, allowing a new and broader understanding of the goddess(es) concerned. The areas covered range from Mesopotamia to the Levant, Egypt and the Mediterranean world, the periods embraced from the third millennium BCE to the Hellenistic age. The volume is the fruit of an international conference held in Tokyo in 2011. Drawing on discussions at the conference, each article was completely rewritten.

Tradition and Transformation in Ancient Egypt Jul 11 2021 With the overall topic?Tradition and Transformation in Ancient Egypt? we tried to invite scholars working in different fields to discuss (dis)continuity of traditions and consequent cultural transformation. The main aim was to

stimulate research and an exchange of ideas and to build bridges for a variety of disciplines within Egyptology.0The first impression given by the ancient Egyptian culture is that of continuity and long-lasting stability. In fact, we can observe very different kinds of transformation processes alongside unbroken tradition. These changes are visible in all areas of society: politics, art, language, economy, religion, etc. This volume gives an insight into the research presented and the results of various discussions afterwards.0In the study of ancient cultures and civilizations, the questions about what remains and what is changing are always of great importance. It is the attempt to get a deeper understanding of the life and thinking of our ancestors. Cultural changes are dynamic processes and can be caused by developments in technology, political and religious ideas or substantial experiences with diverse societies or environmental factors.0Because of this sheer panoply of possible causes, one seeks to understand transformation in ancient Egypt by asking a series of essential questions: what is the nature of a particular change, when and where did it come about, through what agency, for what purpose, which parts of Egyptian society did it affect, and how lasting were its consequences? In order to answer these questions, it is necessary to involve as many different cultural aspects as possible.

Christianity and the Transformation of the Book Mar 31 2023 When early Christians began to study the Bible, and to write their own history and that of the Jews whom they claimed to supersede, they used scholarly methods invented by the librarians and literary critics of Hellenistic Alexandria. But Origen and Eusebius, two scholars of late Roman Caesarea, did far more. Both produced new kinds of books, in which parallel columns made possible critical comparisons previously unenvisioned, whether between biblical texts or between national histories. Eusebius went even farther, creating new research tools, new forms of history and polemic, and a new kind of library to support both research and book production. Christianity and the Transformation of the Book combines broad-gauged synthesis and close textual analysis to reconstruct the kinds of books and the ways of organizing scholarly inquiry and collaboration among the Christians of Caesarea, on the coast of Roman Palestine. The book explores the dialectical relationship between intellectual history and the history of the book, even as it expands our understanding of early Christian scholarship. Christianity and the Transformation of the Book attends to the social, religious, intellectual, and institutional contexts within which Origen and Eusebius worked, as well as the details of their scholarly practices--practices that, the authors argue, continued to define major sectors of Christian learning for almost two millennia and are, in many ways, still with us today.,

Tradition and Transformation in the Book of Chronicles Dec 16 2021 Since the Book of Chronicles is increasingly studied on its own, and not as a copy of 1-2 Samuel and 1-2, this study treats the various aspects and themes of this rich document. It provides an analysis of specific texts and topics uncovering the Chronicler's permanent creativity to transform Israel's tradition(s) into a new theological and ideological system of its own.

Food and Transformation in Ancient Mediterranean Literature Jan 09 2024 New research that transforms how to understand food and eating in literature Meredith J. C. Warren identifies and defines a new genre in ancient texts that she terms hierophagy, a specific type of transformational eating where otherworldly things are consumed. Multiple ancient Mediterranean, Jewish, and Christian texts represent the ramifications of consuming otherworldly food, ramifications that were understood across religious boundaries. Reading ancient texts through the lens of hierophagy helps scholars and students interpret difficult passages in Joseph and Aseneth, 4 Ezra, Revelation 10, and the Persephone myths, among others. Features: Exploration of how ancient literature relies on bending, challenging, inverting, and parodying cultural norms in order to make meaning out of genres Analysis of hierophagy as social action that articulates how patterns of communication across texts and cultures emerge and diverge A new understanding of previously confounding scenes of literary eating

I've Decided to Live 120 Years Oct 26 2022 The Ancient Secret to Longevity, Vitality, and Life Transformation

Self and Self-transformation in the History of Religions Mar 11 2024 This book brings together scholars of a variety of the world's major civilizations to focus on the universal theme of inner transformation. The idea of the "self" is a cultural formation like any other, and models and conceptions of the inner world of the person vary widely from one civilization to another. Nonetheless, all the world's great religions insist on the need to transform this inner world. Such transformations, often ritually enacted, reveal the primary intuitions, drives, and conflicts active within the culture. The individual essays study dramatic examples of these processes in a wide range of cultures, including China, India, Tibet, Greece and Rome, Late Antiquity, Islam, Judaism, and medieval and early-modern Christian Europe.

The Transformation of American Law, 1780-1860 Dec 28 2022 In a remarkable book based on prodigious research, Morton J. Horwitz offers a sweeping overview of the emergence of a national (and modern) legal system from English and colonial antecedents. He treats the evolution of the common law as intellectual history and also demonstrates how the shifting views of private law became a dynamic element in the economic growth of the United States. Horwitz's subtle and sophisticated explanation of societal change begins with the common law, which was intended to provide justice for all. The great breakpoint came after 1790 when the law was slowly transformed to favor economic growth and development. The courts spurred economic competition instead of circumscribing it. This new instrumental law flourished as the legal profession and the mercantile elite forged a mutually beneficial alliance to gain wealth and power. The evolving law of the early republic interacted with political philosophy, Horwitz shows. The doctrine of laissez-faire, long considered the cloak for competition, is here seen as a shield for the newly rich. By the 1840s the overarching reach of the doctrine prevented further distribution of wealth and protected entrenched classes by disallowing the courts very much power to intervene in economic life. This searching interpretation, which connects law and the courts to the real world, will engage historians in a new debate. For to view the law as an engine of vast economic transformation is to challenge in a stunning way previous interpretations of the eras of revolution and reform.

[Time for Transformation](#) Feb 10 2024 We live in an "interesting" era. In Dickens's words, it is "the best of times," it is "the worst of times." On the one hand, we encounter increasing violence and lack of conscience in the world, while on the other, we see many becoming increasingly aware and spiritually oriented. The great traditions of East and West--ancient Egyptian, Mayan, Hindu, and Christian--foretold that our time would become a critical period of transition, from materialistic preoccupation to a more spiritual focus. Esoteric teaching tells us that, in this period of transition, we will be confronted by the problem of good and evil and, consequently, by growing fear, insecurity, and violence in both society and in our own souls. Such phenomena are part of our unique time and

announce the birth of a new era--socially, culturally, and inwardly. It all points to the single fact that now is the time for transformation. In this brief, life-changing book, the authors show how we can develop during this critical period of transition, moving through the darkness to the light by breaking the spell of evil. *Time for Transformation* offers guidance, wisdom, and encouragement in this essential in for our changing times. C O N T E N T S: Introduction 1. The Negative Forces at Work in Our Society 2. What Is Happening in Our Soul? 3. What Makes Our Time Decisive? 4. The Birth Pangs of a New Humanity 5. The Development of the Individual 6. The Awakening of the Inner Spirit 7. Darkness as a Path of Initiation 8. Through the Darkness to Light 9. Breaking the Spell Notes *The Ancient Art of Transformation* Sep 05 2023 The Ancient Art of Transformation: Case Studies from Mediterranean Contexts examines instances of human transformation in the ancient and early Christian Mediterranean world by exploring the ways in which art impacts, aids, or provides evidence for physical, spiritual, personal, and social transitions. Building on Arnold van Gennep's notion of universal rites of passage, papers in this volume expand the definition of "transformation" to include widespread transitions such as shifts in political establishments and changes in cultural identity. In considering these broadly defined "passages," authors have observed particular changes in the visual record, whether they be manifest, enigmatic, or symbolic. While several papers address transitions that are incomplete, resulting in intermediary, hybrid states, others suggest that the medium itself can be integral to interpreting a transition, and in some cases, be itself transformed. Together, the volume covers not only a broad chronological span (c. 5th century BC to 4th century AD), but also an expansive geographical range (Egypt, Greece, and Italy). Reflecting upon issues central to a variety of Mediterranean cultures (Egyptians, Etruscans, Greeks, Romans, and early Christians), *The Ancient Art of Transformation* documents how personal, societal, and historical changes become permanently fixed in the material record. The Ancient Art of Transformation examines the visual manifestation of human transformation in the ancient and early medieval Mediterranean world, exploring the role of art and visual culture in enabling, hindering, or documenting physical, spiritual, personal, and social transitions such as pregnancy and birth, initiations, marriage, death and funerals. The definition of "transformation" is also expanded to address instances of less personal and more widespread transitions such as shifts in political establishments and changes in cultural identity in geographic locations. Additionally, although the ancient material record documents certain rites of passage such as marriage and death extensively, artifacts and their accompanying images are often studied simply to reconstruct these social processes. Authors here suggest that material evidence itself can be integral to interpreting a transition, and in some cases, be itself transformed. Further, several papers address transitions that are incomplete, resulting in intermediary, hybrid states that are very often reflected in the visual record such as Athenian vase-painting imagery forecasting the bride as a mother, displays of nudity that reflect intermediate life stages in Etruscan art and Octavian's visual transformation into Pharaoh and Augustus in Egyptian architecture and material culture. At its core the volume establishes current methods for understanding how ancient visual culture shaped, informed, and was affected by processes of transformation. Together, these papers offer a close examination of various types of visual evidence from several cultures and periods (e.g., Etruscan, Greek, Roman, early Christian), and document how personal, societal, and historical changes become permanently fixed in the material record.

[The Last Hours of Ancient Sunlight](#) Nov 14 2021 A call to consciousness that combines spirituality and ecology and offers hope for the future. As the world's population explodes, cultures and species are wiped out, and we have now reached the halfway point of our supplies of oil, humans the world over are confronting difficult choices about how to create a future which works. Thom Hartmann proposes that the only lasting solution to the crises we face is to re-learn the lessons our ancient ancestors knew - lessons that allowed them to live sustainably for hundreds of thousands of years - but which we've forgotten. Hartmann shows how to find this new and yet ancient way of seeing the world and the life on and in it, allowing us to touch that place where the survival of humanity may be found.

Awakening the Ancient Power of Snake Sep 24 2022 A look at the mythic, archetypal, and transformational aspects of Snake • Explores how and why Snake was transformed from esteemed advisor and guardian of ancient wisdom to a symbol of deception and evil • Examines Snake's healing powers, its role in awakening kundalini, and its connections to dreams, shamanism, alchemy, and the Goddess • Shares

transformational stories and practical ways that Snake can help us travel through the imaginal realm, gather treasure from the psyche, and shed outgrown aspects of self Entwined with human consciousness since prehistoric times, Snake has always been associated with transformation--from the shedding of its skin to the rising of kundalini energy. In ancient times, Snake served as protector and advisor to gods, goddesses, and royalty. But with the story of Adam and Eve, Snake became the enemy--a tempter and deceiver. How did this happen and why do humans continue to fear and vilify Snake? Inspired by a vivid dream of an immense snake that lost its tail, animal communicator Dawn Baumann Brunke investigates the interwoven history of Snake and humanity and explores how we can once again access Snake's wisdom and harness its powerful ability to heal, transform, and awaken. Uncovering ties between Snake and Goddess, the author demonstrates how both were systematically suppressed millennia ago with the spread of a patriarchal perspective that valued mastery over nature, God over Goddess. Brunke reveals how myths that originally extolled the virtues of Snake and Goddess were refashioned, recreating their images as debased and untrustworthy. She explores why snakes show up in shamanic journeys and transformational dreams and how their unique presence in our world can serve as catalysts of change, truth-telling, and enlightenment. Examining Snake's role in awakening human consciousness, Brunke considers the alchemical role of the serpent as well as Snake's connections to ancient healing, modern medicine, and even the DNA molecule. She shares psycho-activating stories to help trigger transformation and provide graceful movement through the chaos of change. And she offers practical techniques to journey with Snake through inner worlds, to shed confining aspects of self, and to integrate experiences more holistically. Brunke shows how we need to re-embrace the ancient power of Snake to better support our return to a more balanced consciousness--one that reunites nature with spirit, sacred masculine with sacred feminine--as we strive for global change and personal awakening.

Transformations of the Inner Self in Ancient Religions Jan 29 2023

This collection of papers from two workshops - held in Heidelberg, Germany, in July 1996 and Jerusalem, Israel, in October 1997 - is concerned with anthropological rather than theological aspects of the Near Eastern and Mediterranean religions, ranging from the 'primary' religions of the archaic period and their complex developments in Egypt and Mesopotamia to the 'soteriological' movements and 'secondary' religions that emerged in Late Antiquity. The first part of the book focuses on "Confession and Conversion", while the second part is devoted to the topic of "Guilt, Sin and Rituals of Purification". The primary purpose of this volume is to convey a sense of the dynamics and dialectical relationships between the various Near Eastern and Mediterranean religions from the archaic period to Late Antiquity.

The Emerald Tablet Jul 03 2023 The Emerald Tablet—an ancient document that contains the essence of the alchemical teachings—has had an important influence on many Western spiritual and religious traditions. Ostensibly concerned with turning base metals into gold, alchemy was in fact dedicated to transforming the lead of self into the gold of spirit. This brilliant history of alchemy traces its sources back to ancient Egypt, and presents alchemy as a useful, practical system of self-transformation. Each of the seven steps of alchemical transformation is explained, with hands-on techniques and exercises, treating alchemy as a living discipline for achieving a spiritual awakening.

Posthuman Transformation in Ancient Mediterranean Thought Apr 12 2024 Ancient theories of posthuman transformation can shape, chasten, and reform modern (biotechnical) theories of posthuman enhancement.

Tradition and Transformation in Christian Art Mar 07 2021

Tradition and Transformation in Christian Art approaches tradition and transculturality in religious art from an Orthodox perspective that defines tradition as a dynamic field of exchanges and synergies between iconographic types and their variants. Relying on a new ontology of

iconographic types, it explores one of the most significant ascetical and eschatological Christian images, the King of Glory (Man of Sorrows). This icon of the dead-living Christ originated in Byzantium, migrated west, and was promoted in the New World by Franciscan and Dominican missions. Themes include tensions between Byzantine and Latin spiritualities of penance and salvation, the participation of the body and gender in deification, and the theological plasticity of the Christian imaginary. Primitivist tendencies in Christian eschatology and modernism place avant-garde interest in New Mexican santos and Greek icons in tradition.

Transformation Through Destruction Mar 19 2022 Over a 1000 tiny bronze artefacts were found alongside the remains of a man in a Dutch barrow that was excavated in laboratory conditions. The objects had been dismantled and taken apart, all to be destroyed by fire in what appears to have been a pars pro toto burial. In essence, a person and a place were being transformed through destruction. Based on the meticulous excavation and a range of specialist and comprehensive studies of finds, a prehistoric burial ritual now can be brought to life in surprising detail. This Iron Age community used extraordinary objects that find their closest counterpart in the elite graves of the Hallstatt culture in Central Europe.
