John Drury Clark,2018-05-23 This newly reissued debut book in the Rutgers University Press Classics Imprint is the story of the search for a rocket propellant which could be trusted to take man into space This search was a hazardous enterprise carried out by rival labs who worked against the known laws of nature with no guarantee of success or safety Acclaimed scientist and sci fi author John Drury Clark writes with irreverent and eyewitness immediacy about the development of the explosive fuels strong enough to negate the relentless restraints of gravity The resulting volume is as much a memoir as a work of history sharing a behind the scenes view of an enterprise which eventually took men to the moon missiles to the planets and satellites to outer space A classic work in the history of science and described as a good book on rocket stuff that s a really fun one by SpaceX founder Elon Musk readers will want to get their hands on this influential classic available for the first time in decades

The Outboard Motor Manual Keith Henderson,1992-01 Contents include selecting engine size setting height and trim angle choosing propeller type size and pitch likely fuel consumption running in the engine preventive maintenance and winterizing protecting against corrosion trailering and launching and much more

Modern Marine Engineer's Manual Alan Osbourne,1965 Volume II of the manual that has been absolutely indispensable to the ship s engineer for over forty years was completely updated by a team of practicing marine engineers in 1991 Chapters on obsolete equipment were deleted those on systems that are still current were updated and new chapters were written to cover the innovations in materials machines and operating practices that evolved recently
