Mick Waters has consistently been a down-to-earth voice in the increasingly complex world of education for many years. He has regularly endeared himself to school communities in the UK and overseas by talking the sort of sense they needed to hear: practical, challenging, inspiring, insightful, engaging. His unique perspective, closeness to the classroom, and ability to see innovation in terms of its impact on learners mean his views are always worth listening to. In this long-awaited book, Mick tells it how it is. The things he believes in. The things he wants to see differently. Wry reflections, humorous insights, astute asides, and simple ideas to change the system and the future for young people everywhere. This is the book you have been waiting for. Mastering Primary History Karin Doull, Christopher Russell, Alison Hales, 2019-02-21. Mastering Primary History introduces the primary history curriculum and helps trainees and teachers learn how to plan and teach inspiring lessons that make learning history irresistible. Topics covered include: Current developments in history. History as an irresistible activity. History as a practical activity. Skills to develop in history. Promoting curiosity. Assessing children in history. Practical issues. This guide includes examples of children's work, case studies, readings to reflect upon, and reflective questions that all help to show students and teachers what is considered to be best and most innovative practice and how they can use that knowledge in their own teaching to the greatest effect. The book draws on the experience of three leading professionals in primary history: Karin Doull, Christopher Russell, and Alison Hales, to provide the essential guide to teaching history for all trainee primary teachers. Mastering Primary Languages Paula Ambrossi, Darnelle Constant-Shepherd, 2018-03-22. Starting Science...Again? Martin Braund,2008-10-09 The structure of this book encourages active participation via reflective activity boxes which further allows for the engagement and consolidation of ideas Evidence based research is cited resulting in the author suggesting a number of practical activities to encourage progression and continuity in science ESCalate Why do pupils learning and motivation slow down markedly as they move from primary to secondary school Why is this situation worse in science than in any other curriculum subject This book combines reports of and reflection on best practice in improving progression and continuity of teaching and learning in science particularly at that transition stage between primary and secondary school Presenting the views of teachers and pupils on progression learning and application of science the book suggests practical ways of improving teaching and learning in science Each chapter includes examples of learning materials with notes on how these might be used or adapted by teachers in their own classroom settings Science teaching in secondary schools is often based on assumptions that children know or can do very little so the job in the secondary school becomes one of showing pupils how to start doing science properly as if from scratch The damage that this false view can do to pupils learning motivation and confidence is clear This book will help teachers to assess children s prior knowledge effectively and build meaningful and enjoyable science lessons

Debates in Design and Technology Education Gwyneth Owen-Jackson,2013-08-21 Design and Technology has long held a controversial place on the school curriculum with some arguing that it shouldn t be there at all This book presents and questions considered arguments and judgements and explores the major issues that all D T teachers encounter in their daily professional lives In exploring some of the key debates it encourages critical reflection and aims to stimulate both novice and experienced teachers to think more deeply about their practice and link research and evidence to what they have observed in schools Written by expert design and technology education professionals chapters tackle established and contemporary issues enabling you to reach informed judgements and argue your point of view with deeper theoretical knowledge and understanding Debates covered include What is the purpose of design and technology Is it a vocational or academic subject What is the place of design and technology within the STEM agenda What knowledge and skills do teachers really need What does the design and technology gender divide mean for schools and pupils Is it a creative subject What is

the future for design and technology With its combination of expert opinion and fresh insight *Debates in Design and Technology Education* is the ideal companion for any student or practising teacher engaged in initial training continuing professional development or Masters level study
