Catalog It! Allison G. Kaplan, 2015-12-07 Whether you're a practicing cataloger looking for a short text to update you on the application of RDA to cataloging records or a school librarian who needs a quick resource to answer cataloging questions this guide is for you. Since the last edition of this invaluable text was published the library world has experienced a revolution in descriptive cataloging the likes of which has not been seen since the early 1980s. This updated third edition of an established and well-respected guide makes it easy for you to stay in step with those monumental changes. The book will help you understand the latest fundamentals of cataloging so you can get items on the library shelves quickly and efficiently. Every chapter has been revised. Changes in standards including RDA and BISAC that were alluded to in the second edition are discussed in depth and illustrated with explanations and sample problem sets are included so you can put theory into practice. In addition the book provides you with clear headings for easy scanning as well as cheat sheets and templates for creating records for book and non-book items. Previous editions of this text have been used by library practitioners and library and information science professors across the country because of its spot-on easy-to-follow guidance on cataloging for school libraries. This new edition builds upon those strengths adding everything you need to know about current groundbreaking changes.

Digital Cinematography David Stump, 2014-03-21 First published in 2014. With the shift from film to digital a new view of the future of cinematography has emerged. Today's successful cinematographer must be equal parts artist, technician, and business person. The cinematographer needs to master the arts of lighting, composition, framing, and other aesthetic considerations as well as the technology of digital cameras, recorders, and workflows and must know how to choose the right tools within their budget to get the job done. David Stump's *Digital Cinematography* focusses primarily on the tools and technology of the trade, looking at how digital cameras work, the ramifications of choosing one camera versus another, and how those choices help creative cinematographers to tell a story. This book empowers you to both correctly choose the right camera and workflow for your project from today's incredibly varied options as well as understand the ins and outs of implementing those options. Stump sheds a light on the confusing advantages and disadvantages of shooting theatrical features using digital technology and what it can or can't do. Topics covered include: Detailed coverage of Arriflex, Blackmagic, Canon, Ikonoskop, Panasonic, Panavision, Phantom, Red, Silicon Imaging, Sony, and Weisscam digital motion picture cameras. Coverage of a wide variety of lenses including Angenieux, Canon, Cooke, Fujinon, Hawk, Leica, Panavision, Red, Schneider, Sony, UniqOptics, Vantage, and Zeiss. Coverage of recorders, displays, and look management tools. Exposure theory, tips, learn how to correctly expose digital cameras. Focusing tips, learn how to focus digital cameras correctly. Checklists to help design digital workflows. Practical tips on preparation, prepare for shooting a digital motion picture like a professional. Camera set up and operation, color management, digital intermediates, 3D stereo cinematography, future trends, and much more.

Commerce Business Daily ,1999-03 **Popular Photography** ,1996-09 The Rise of Cable Programming in the United States Megan Mullen,2009-06-23 Winner McGannon Communications Research Award 2004 In 1971 the Sloan Commission on Cable Communications likened the ongoing developments in cable television to the first uses of movable type and the invention of the telephone Cable s proponents in the late 1960s and early 1970s hoped it would eventually remedy all the perceived ills of broadcast television including lowest common denominator programming inability to serve the needs of local audiences and failure to recognize the needs of cultural minorities Yet a quarter century after the blue sky era cable television programming closely resembled and indeed depended upon broadcast television programming Whatever happened

to the Sloan Commission's revolution now in sight In this book Megan Mullen examines the first half century of cable television to understand why cable never achieved its promise as a radically different means of communication Using textual analysis and oral archival and regulatory history she chronicles and analyzes cable programming developments in the United States during three critical stages of the medium's history the early community antenna CATV years 1948 1967 the optimistic blue sky years 1968 1975 and the early satellite years 1976 1995 This history clearly reveals how cable's roots as a retransmitter of broadcast signals the regulatory constraints that stymied innovation and the economic success of cable as an outlet for broadcast or broadcast type programs all combined to defeat most utopian visions for cable programming
