**Self-directed learning research and its impact on educational practice** Elsa Mentz,Roxanne Bailey,2021-05-17 This scholarly book is the third volume in an NWU book series on self directed learning and is devoted to self directed learning research and its impact on educational practice The importance of self directed learning for learners in the 21st century to equip themselves with the necessary skills to take responsibility for their own learning for life cannot be over emphasised The target audience does not only consist of scholars in the field of self directed learning in Higher Education and the Schooling sector but includes all scholars in the field of teaching and learning in all education and training sectors The book contributes to the discourse on creating dispositions towards self directed learning among all learners and adds to the latest body of scholarship in terms of self directed learning Although from different perspectives all chapters in the book are closely linked together around self directed learning as a central theme following on the work done in Volume 1 of this series Self Directed Learning for the 21st Century Implications for Higher Education to form a rich knowledge bank of work on self directed learning

**Inclusion, Equity and Access for Individuals with Disabilities** Santoshi Halder,Vassilios Argyropoulos,2019-03-02 The book provides multiple perspectives and insights on the area of Inclusion Equity and Access for people with disabilities and brings together various inclusive effective practices from 21 countries across the world most comprehensively in one book The book documents perspectives from educational researchers and teacher educators through first hand experience using cutting edge research and conceptual understandings thought processes and reflections The book brings together various methodologies to expose scientific truths in the area of disability and inclusion Chapter authors utilize a self reflective stance representing state of the art theory and practice for exploring notions of disability Authors examine cultural relational practices common values and beliefs and shared experiences for the purpose of helping cultural members and cultural strangers better understand interdependent factors Each chapter is an attempt to unravel a thought provoking comprehensive and thorough understanding of the challenges and abilities of

individuals with disabilities shaped by their own culture society and country re engaging the promise of scientific research as a generative form of inquiry The book is designed to be of use to a wide range of professionals researchers practitioners advocates special educators and parents providing information and or discussions on educational needs health care provisions and social services irrespective of country and culture Curriculum and Assessment David Scott,2001 Curriculum and Assessment is the first volume of a new series International Perspectives on Curriculum This edited book examines the relationship between curriculum pedagogy and assessment and as with subsequent volumes adopts a cross sector and comparative approach Contributors make reference to a number of important debates in the fields of curriculum and assessment summative versus formative assessment differentiation versus inclusion psychometric versus holistic theorising decontextualised versus contextualised assessment symbol processing versus situated learning approaches integrated versus connected assessment and high stakes versus low stakes assessment The rationale for this volume is not to reach an agreement about assessment and curriculum frameworks but to air the various debates referred to above and develop new frameworks for understanding these important issues This volume and the series is timely as administrators and policy makers in different parts of the world have taken an increased interest in education and as moves to centralise curriculum provision have gathered pace This has in some cases driven a wedge between curriculum theory and curriculum practice as policy makers have developed and implemented proposals without referring to academic debates about these issues It therefore is an important task to reassert the need to discuss and debate the curriculum in a critical manner before implementation occurs This volume sets about that task addressing policy makers administrators teachers and the research community What Teachers Need to Know About Language Carolyn Temple Adger,Catherine E. Snow,Donna Christian,2018-07-10 Rising enrollments of students for whom English is not a first language mean that every teacher whether teaching kindergarten or high school algebra is a language teacher This book explains what teachers need to know about language in order to be more effective in the classroom and it shows how teacher education might help them gain that knowledge It focuses especially on features of academic English and gives examples of the many aspects of teaching and learning to which language is key This second edition reflects the now greatly expanded knowledge base about academic language and classroom discourse and highlights the pivotal role that language plays in learning and schooling The volume will be of interest to teachers teacher educators professional development specialists administrators and all those interested in helping to ensure student success in the classroom and beyond Local Governance and ICTs in Africa Timothy Mwololo Waema,T.
