"Our approach in

this new edition remains what it was in the first edition: to provide students and instructors with a text that delivers complete coverage of economic topics using many real-world examples. Our goal from the beginning has been to teach economics in a "widget-free" way by using real-world business and policy examples. It's an understatement to say that much has happened in the economy since our last edition appeared. The effects of the Covid-19 pandemic disrupted the economy as nothing else has in the lifetimes of today's students (and instructors). Congress, the Trump and Biden administrations, and the Federal Reserve responded to the severe recession of 2020 with fiscal and monetary policies that were also unprecedented. Partially as a result, the U.S. economy experienced the highest rates of inflation in 40 years. We have incorporated these developments in the new real-world examples and policy discussions in this edition and also in the extensive digital resources"-- Examining at a wide range of issues such as violence, poverty, feminism, racism, and privatization of healthcare, the contributors to this collection use a variety of analytical approaches to posit that the social, economic, and political issues confronting Canadians are shaped by social inequity. At the same time, these essays show how these inequalities are being successfully resisted individually and collectively. This fourth edition adds chapters on youth politics, higher education, technology and work, and immigration.
