Fisheries Subsidies, Sustainable Development and the WTO Aug 12 2021 The fisheries sector is in crisis. Inappropriate subsidies to the fishing industry are a key factor responsible for worldwide fisheries depletion, overcapitalization and ecosystem degradation. There is an urgent need for an international mechanism to promote the appropriate restructuring of fisheries subsidies in order to create a more sustainable industry. In recent years the leading international forum charged with providing such a mechanism has been the World Trade Organization (WTO). This book explains why and how the reform of fisheries subsidies has become one of the most concrete and potentially successful international efforts to achieve global environmental, economic and developmental policy coherence. It describes the history and current status of the discussions at the WTO, drawing on UNEP's key documents and reflecting on the major issues. Accompanying the book are downloadable resources containing full-text versions of the most important source material used in the publication. The book is aimed at a broad stakeholder audience, including policymakers in

the fields of trade, fisheries, environmental economics and international environmental governance, as well as academics and others looking for an overview of the fisheries subsidies issue and an introduction to its technical components. Published with the United Nations Environment Programme (UNEP)

Dynamics of Meteor Outbursts and Satellite Mitigation Strategies Feb 03 2021 The potential threat posed by Leonid meteoroids to orbiting spacecraft over the next several years calls for new dynamic mitigation strategies to assist the satellite community in reducing the danger to its vehicles. This book offers deliberate dynamic mitigation strategies to complement the traditional shielding strategies, providing mission operators additional ways to decrease the danger. Five different attitude control and orbit maneuvering options are examined in detail. The information is presented in algorithmic form to allow technically competent, but meteoroid inexperienced, operators to easily understand the phenomena, assess the danger, and implement

procedures. Although general in scope, the book emphasizes the Leonid meteor events of the 1998-2002 timeframe.

The North Carolina Railroad, 1849-1871, and the Modernization of North Carolina Nov 14 2021 In telling the story of the North Carolina Railroad's independent years (1849-71), Trelease covers all aspects of the company and its development, including its construction and rolling stock; its management, labor force, and labor policies; its passenger and freight operations; and its role in the Civil War. He also assesses the impact of the railroad on the economic and social development of North Carolina. Originally published in 1991. A UNC Press Enduring Edition -- UNC Press Enduring Editions use the latest in digital technology to make available again books from our distinguished backlist that were previously out of print. These editions are published

unaltered from the original, and are presented in affordable paperback formats, bringing readers both historical and cultural value.
