Wonders in the Sky Jacques Vallee,Chris Aubeck,2010-10-28 One of the most ambitious works of paranormal investigation of our time here is an unprecedented compendium of pre twentieth century UFO accounts written with rigor and color by two of today s leading investigators of unexplained phenomena In the past century individuals newspapers and military agencies have recorded thousands of UFO incidents giving rise to much speculation about flying saucers visitors from other planets and alien abductions Yet the extraterrestrial phenomenon did not begin in the present era Far from it The authors of Wonders in the Sky reveal a thread of vividly rendered and sometimes strikingly similar reports of mysterious aerial phenomena from antiquity through the modern age These accounts often share definite physical features such as the heat felt and described by witnesses that have not changed much over the centuries Indeed such similarities between ancient and modern sightings are the rule rather than the exception In Wonders in the Sky respected researchers Jacques Vallee and Chris Aubeck examine more than 500 selected reports of sightings from biblical age antiquity through the year 1879 the point at which the Industrial Revolution deeply changed the nature of human society and the skies began to open to airplanes dirigibles rockets and other opportunities for misinterpretation represented by military prototypes Using vivid and engaging case studies and more than seventy five illustrations they reveal that unidentified flying objects have had a major impact not only on popular culture but on our history on our religion and on the models of the world humanity has formed from deepest antiquity Sure to become a classic among UFO enthusiasts and other followers of unexplained phenomena Wonders in the Sky is the most ambitious broad reaching and intelligent analysis ever written on premodern aerial mysteries

American Cosmic D.W. Pasulka,2019-01-18 More than half of American adults and more than seventy five percent of young Americans believe in intelligent extraterrestrial life This level of belief rivals that of belief in God American Cosmic examines the mechanisms at work behind the thriving belief system in extraterrestrial life a system that is changing and even supplanting traditional religions Over the course of a six year ethnographic study D W Pasulka interviewed successful and influential scientists professionals and Silicon Valley entrepreneurs who believe in extraterrestrial intelligence thereby disproving the common misconception that only fringe members of society believe in UFOs She argues that widespread belief in aliens is due to a number of factors including their ubiquity in modern media like The X Files which can influence memory and the believability lent to that media by the search for planets that might support life American Cosmic explores the intriguing question of how people interpret unexplainable experiences and argues that the media is replacing religion as a cultural authority that offers believers answers about non human intelligent life

They Are Already Here Sarah Scoles,2021-06-08 An anthropological look at the UFO community told through first person experiences with researchers in their element as they pursue what they see as a solvable mystery both terrestrial and cosmic More than half a century since Roswell UFOs have been making headlines once again On December 17 2017 the New York Times ran a front page story about an approximately five year Pentagon program called the Advanced Aerospace Threat Identification Program The article hinted and its sources clearly said in subsequent television interviews that some of the ships in question couldn t be linked to any country The implication of course was that they might be linked to other solar systems The UFO community those who had been thinking about seeing and analyzing supposed flying saucers or triangles or chevrons for years was surprisingly skeptical of the revelation Their incredulity and doubt rippled across the internet Many of the people most invested in UFO reality weren t really buying it And as Scoles did her own digging she ventured to dark conspiracy filled corners of the internet to a former paranormal research center in Utah and to the hallways of the Pentagon In *They Are Already Here* we meet the bigwigs the scrappy upstarts the field investigators the rational people and the unhinged kooks of this sprawling community How do they interact with each other How do they interact with anomalous phenomena And how do they as any group must reflect the politics and culture of the larger world around them We will travel along the Extraterrestrial Highway next to Area 51 and visit the UFO Watchtower where seeking lights in the sky is more of a spiritual quest than a gotcha one We meet someone who for a while believes they may have communicated with aliens Where do these alleged encounters stem from What are the emotional effects on the experiencers

The UFO Singularity Micah Hanks,2012-12-26 At the forefront of a new generation of UFOlogists Micah Hanks is someone who isn t afraid to tackle new paradigms ideas and theories The future of flying saucer seeking is in good hands Nick Redfern author of *The NASA Conspiracies* Why and how are past unexplained phenomena changing our future Where will transcending the bounds of current thinking lead How near is the singularity *The UFO Singularity* finally reveals what UFO phenomena can tell us about greater than human intelligence and offers provocative theories of where such intelligence might originate You ll explore the most challenging metaphysical questions and the latest scientific thoughts about them including What is the singularity and how does it relate to UFOs Could some UFOs be from our plane Could they actually be time travelers from our future What current scientific trends are leading us to the kinds of advanced technology we ve observed in various UFO reports Are there other ways in which UFOs could be considered extraterrestrial visitors in our midst even if they didn t get here in the way that most people think via interplanetary space flight

Identified Flying Objects Dr. Michael P. Masters, 2019-03-22 Could UFOs and Aliens simply be us but from the future This provocative new book cautiously examines the premise that extraterrestrials may instead be our distant human descendants using the anthropological tool of time travel to visit and study us in their own hominin evolutionary past Dr Michael P Masters a professor of biological anthropology specializing in human evolutionary anatomy archaeology and biomedicine explores how the persistence of long term biological and cultural trends in human evolution may ultimately result in us becoming the ones piloting these disc shaped craft which are likely the very devices that allow our future progeny to venture backward across the landscape of time Moreover these extraterrestrials are ubiquitously described as bipedal large brained hairless human like beings who communicate with us in our own languages and who possess technology advanced beyond but clearly built upon our own These accounts coupled with a thorough understanding of the past and modern human condition point to the continuation of established biological and cultural trends here on Earth long into the distant human future
