Basiswissen Requirements Engineering Klaus Pohl,Chris Rupp,2021-01-31 Basiswissen Requirements Engineering Klaus Pohl,Chris Rupp,2015-03 *Basiswissen Requirements Engineering* Klaus Pohl,Chris Rupp,2010 *Requirements Engineering Fundamentals, 2nd Edition* Klaus Pohl,2016-04-30 Requirements engineering tasks have become increasingly complex In order to ensure a high level of knowledge and competency among requirements engineers the International Requirements Engineering Board IREB developed a standardized qualification called the Certified Professional for Requirements Engineering CPRE The certification defines the practical skills of a requirements engineer on various training levels This book is designed for self study and covers the curriculum for the Certified Professional for Requirements Engineering Foundation Level exam as defined by the IREB The 2nd edition has been thoroughly revised and is aligned with the curriculum Version 2.2 of the IREB In addition some minor corrections to the 1st edition have been included About IREB The mission of the IREB is to contribute to the standardization of further education in the fields of business analysis and requirements engineering by providing syllabi and examinations thereby achieving a higher level of applied requirements engineering The IRE Board is comprised of a balanced mix of independent internationally recognized experts in the fields of economy consulting research and science The IREB is a non profit corporation For more information visit www.certified-re.com

Requirements Engineering Klaus Pohl,2010-07-24 Requirements engineering is the process of eliciting individual stakeholder requirements and needs and developing them into detailed agreed requirements documented and specified in such a way that they can serve as the basis for all other system development activities In this textbook Klaus Pohl provides a comprehensive and well structured introduction to the fundamentals principles and techniques of requirements engineering He presents approved techniques for eliciting negotiating and documenting as well as validating and managing requirements for software intensive systems The various aspects of the process and the techniques are illustrated using numerous examples based on his extensive teaching experience and his work in industrial collaborations His presentation aims at professionals students and lecturers in systems and software engineering or business applications development Professionals such as project managers software architects systems analysts and software engineers will benefit in their daily work from the didactically well presented combination of validated procedures and industrial experience Students and lecturers will appreciate the comprehensive description of sound fundamentals principles and techniques which is completed by a huge commented list of references for further reading Lecturers will find additional teaching material on the book s website www.requirements-book.com

Subject-Oriented Business Process Management Albert Fleischmann,Werner Schmidt,Robert Singer,Detlef Seese,2011-08-12 This book constitutes the thoroughly refereed post proceedings of the Second International Conference on Subject Oriented Business Process

Management S BPM ONE 2010 held in Karlsruhe Germany in October 2010 The 10 revised full papers presented together with one invited keynote paper and three panel statements were carefully reviewed and selected from initially 17 submissions The papers present innovative cross disciplinary ideas concepts methods tools and results in foundational and applied research as well as studies on the realization of such innovations in the real world all based on the promising new paradigm of subject oriented business process management

Innovative Methods in Logistics and Supply Chain Management Thorsten Blecker, 2014-09-24 Innovative Methods in Logistics and Supply Chain Management

Managing Collaborative R&D Projects Gabriela Fernandes, Lawrence Dooley, David O'Sullivan, Asbjørn Rolstadås, 2021-03-25

Collaboration among industry universities and research institutes plays a vital role in stimulating open innovation which in turn leads to new products processes services and business models This book brings together a number of real life examples of how to govern and manage open innovation collaboration projects more effectively and provides timely insights that project consortia governance boards and funding agencies can directly apply to implement and monitor projects and achieve greater impacts All papers were written by recognized leading authorities with extensive experience in governance and management and reveal how to capitalize on the potential of open innovation This book shares multidisciplinary research perspectives on the potential benefits and challenges of collaboration project management and open innovation as well as the management of complex organizational cultures and governance models

Transdisciplinary Perspectives on Complex Systems Franz-Josef Kahlen, Shannon Flumerfelt, Anabela Alves, 2016-08-16 This book presents an internationally comprehensive perspective into the field of complex systems It explores the challenges of and approaches to complexity from a broad range of disciplines including big data health care medicine mathematics mechanical and systems engineering air traffic control and finance The book's interdisciplinary character allows readers to identify transferable and mutually exclusive lessons learned among these disciplines and beyond As such it is well suited to the transfer of applications and methodologies between ostensibly incompatible disciplines This book provides fresh perspectives on comparable issues of complexity from the top minds on systems thinking

Software Pioneers Manfred Broy, Ernst Denert, 2012-12-06 A lucid statement of the philosophy of modular programming can be found in a 1970 textbook on the design of system programs by Gouthier and Pont 1 | Cf10 23 which we quote below A well defined segmentation of the project effort ensures system modularity Each task forms a separate distinct program module At implementation time each module and its inputs and outputs are well defined there is

no confusion in the intended interface with other system modules At checkout time the integrity of the module is tested independently there are few scheduling problems in synchronizing the completion of several tasks before checkout can begin Finally the system is maintained in modular fashion system errors and deficiencies can be traced to specific system modules thus limiting the scope of detailed error searching Usually nothing is said about the criteria to be used in dividing the system into modules This paper will discuss that issue and by means of examples suggest some criteria which can be used in decomposing a system into modules

A Brief Status Report The major advancement in the area of modular programming has been the development of coding techniques and assemblers which 1 allow one module to be written with little knowledge of the code in another module and 2 allow modules to be reassembled and replaced without reassembly of the whole system

The Role of Culture in Social Media Marketing. A Systematic Literature Review Nivedha Mahendran,2019-03-11 Master's Thesis from the year 2018 in the subject Business economics Marketing Corporate Communication CRM Market Research Social Media grade 1 7 University of Bamberg language English abstract This present master thesis examines the role of culture on Social Media Marketing being a form of modern marketing and a bundle of marketing related activities using social media With the help of a systematic literature review answers are sought to the question as to which extent cultural differences influence the effectiveness of social media marketing The main objective is to adequately present the state of research on the interdisciplinary topic and to identify research gaps The findings from peer reviewed journals ascribe an indispensable value to the cultural component and illuminate the topic from different contemporary relevant perspectives The results indicate that social media marketing is generally covered from a cultural point of view Moreover the insights provide valuable knowledge from both consumers research perspective and from applied social media practices in multicultural settings However the findings also reveal extant research gaps in several directions that need to be addressed in the near future to provide theoretical approaches and scientifically proven evidence on successful utilization of social media marketing in multicultural settings The fact that social media plays an extremely important component in the worldwide dynamic technology development is an irrefutable fact Companies are forced to integrate social media in the most diverse areas in order to be lucrative in the long term to save costs and to survive in competition Typical fields of application include all departments that deal with external corporate communication e.g HR for recruiting and talent acquisition PR for professionally maintaining a favorable public image or in the marketing department as revolutionary marketing and sales platforms According to a new study 69% of marketing employees stated that marketing activities on social media helped to increase important marketing indicators and strengthen customer and brand loyalty Nevertheless social media offer great opportunities but also hold challenges A major challenge is to choose the right medium which depends to a great extent on the target group

Digital Twin Driven Smart Manufacturing Fei Tao,Meng Zhang,A.Y.C. Nee,2019-02-07 Digital Twin Driven Smart Manufacturing examines the background latest research and

application models for digital twin technology and shows how it can be central to a smart manufacturing process The interest in digital twin in manufacturing is driven by a need for excellent product reliability and an overall trend towards intelligent and connected manufacturing systems This book provides an ideal entry point to this subject for readers in industry and academia as it answers the questions a What is a digital twin b How to construct a digital twin c How to use a digital twin to improve manufacturing efficiency d What are the essential activities in the implementation of a digital twin e What are the most important obstacles to overcome for the successful deployment of a digital twin f What are the relations between digital twin and New Technologies g How to combine digital twin with the New Technologies to achieve high efficiency and smartness in manufacturing This book focuses on these problems as it aims to help readers make the best use of digital twin technology towards smart manufacturing Analyzes the differences synergies and possibilities for integration between digital twin technology and other technologies such as big data service and Internet of Things Discuss new requirements for a traditional three dimension digital twin and proposes a methodology for a five dimension version Investigates new models for optimized manufacturing prognostics and health management and cyber physical fusion based on the digital twin

Machine Learning Concepts with Python and the Jupyter Notebook Environment Nikita Silaparasetty,2020-10-06 Create execute modify and share machine learning applications with Python and TensorFlow 2.0 in the Jupyter Notebook environment This book breaks down any barriers to programming machine learning applications through the use of Jupyter Notebook instead of a text editor or a regular IDE You'll start by learning how to use Jupyter Notebooks to improve the way you program with Python After getting a good grounding in working with Python in Jupyter Notebooks you'll dive into what TensorFlow is how it helps machine learning enthusiasts and how to tackle the challenges it presents Along the way sample programs created using Jupyter Notebooks allow you to apply concepts from earlier in the book Those who are new to machine learning can dive in with these easy programs and develop basic skills A glossary at the end of the book provides common machine learning and Python keywords and definitions to make learning even easier What You Will Learn Program in Python and TensorFlow Tackle basic machine learning obstacles Develop in the Jupyter Notebooks environment Who This Book Is For Ideal for Machine Learning and Deep Learning enthusiasts who are interested in programming with Python using TensorFlow 2.0 in the Jupyter Notebook Application Some basic knowledge of Machine Learning concepts and Python Programming using Python version 3 is helpful *Big Data Analytics in Supply Chain Management* Iman Rahimi,Amir H. Gandomi,Simon James Fong,M. Ali Ülkü,2020-12-20 In a world of soaring digitization social media financial transactions and production and logistics processes constantly produce massive data Employing analytical tools to extract insights and foresights from data improves the quality speed and reliability of solutions to highly intertwined issues faced in supply chain operations From procurement in Industry 4.0 to sustainable consumption behavior to curriculum development for data scientists this book offers a wide array of techniques and theories of Big Data Analytics applied to Supply Chain Management

It offers a comprehensive overview and forms a new synthesis by bringing together seemingly divergent fields of research. Intended for Engineering and Business students, scholars, and professionals, this book is a collection of state-of-the-art research and best practices to spur discussion about and extend the cumulative knowledge of emerging supply chain problems.

Reference Modeling Jörg Becker, Patrick Delfmann, 2007-07-14. This book examines reference modeling from different perspectives. It discusses reference modeling languages that provide special modeling language concepts for the development and application of reference models. The book also covers reference modeling methodologies which additionally provide procedure models for the construction and application of reference models as well as particular reference models.

Hidden Cities Fabrizio Nevola, David Rosenthal, Nicholas Terpstra, 2022-03-02. This groundbreaking collection explores the convergence of the spatial and digital turns through a suite of smartphone apps. Hidden Cities that present research-led itineraries in early modern cities as public history. The Hidden Cities apps have expanded from an initial case example of Renaissance Florence to a further five historic European cities. This collection considers how the medium structures new methodologies for site-based historical research while also providing a platform for public history experiences that go beyond typical heritage priorities. It also presents guidelines for user experience design that reconciles the interests of researchers and end users. A central section of the volume presents the underpinning original scholarship that shapes the locative app trails illustrating how historical research can be translated into public-facing work. The final section examines how history delivered in the format of geolocated apps offers new opportunities for collaboration and innovation from the creation of museums without walls connecting objects in collections to their original settings to informing decision-making in city tourism management. Hidden Cities is a valuable resource for upper-level undergraduates, postgraduates, and scholars across a variety of disciplines including urban history, public history, museum studies, art and architecture, and digital humanities. Service Oriented, Holonic and Multi-agent Manufacturing Systems for Industry of the Future Theodor Borangiu, Damien Trentesaux, Paulo Leitão, Adriana Giret Boggino, Vicente Botti, 2019-08-02. This proceedings book presents selected peer-reviewed papers from the 9th International Workshop on Service Oriented Holonic and Multi-agent Manufacturing Systems for the Industry of the Future organized by Universitat Politècnica de València, Spain, and held on October 3-4, 2019. The SOHOMA 2019 Workshop aimed to foster innovation in the digital transformation of manufacturing and logistics by promoting new concepts and methods and solutions through service orientation in holonic and agent-based control with distributed intelligence. The book provides insights into the theme of the SOHOMA 19 Workshop: Smart anything everywhere: the vertical and horizontal manufacturing integration addressing Industry of the Future (IoF), a term used to describe the 4th industrial revolution initiated by a new generation of adaptive, fully connected, analytical, and highly efficient robotized manufacturing systems. This global IoF model describes a new stage of

manufacturing that is fully automatized and uses advanced information communication and control technologies such as industrial IoT cyber physical production systems cloud manufacturing resource virtualization product intelligence and digital twin edge and fog computing It presents the IoF interconnection of distributed manufacturing entities using a system of systems approach discussing new types of highly interconnected and self organizing production resources in the entire value chain and new types of intelligent decision making support based on from real time production data collected from resources products and machine learning processing This book is intended for researchers and engineers working in the manufacturing value chain and specialists developing computer based control and robotics solutions for the Industry of the Future It is also a valuable resource for master s and Ph D students in engineering sciences programs *Legacy* Carolyn Westergren,2019-07-01 Shakespeare used the idiom But in the end truth will come out The apropos title of this book *Legacy* is based on a true story This is a historical novel based on the life of Mary Fisher Born in a slave shack in 1871 to a black mother while amid flooding and a malaria epidemic the heroine of the story was the daughter of the widower plantation owner Severe flooding and a yellow fever depredation left her with only an older half sister Emerald and her father Colonel Gallagher who named her Felice in the story Raised as daddy s little princess she had an idyllic childhood Though her father died when she was a teenager he had arranged for her to attend a Catholic boarding school in New Orleans There she acquired a proper education and mastered the social graces After graduating she remained at school since she had no place to return Stunningly beautiful Felice worked as a governess to relatives of the Louisiana governor for a time After a disappointing first love affair she matured to become an adult a passed for white madam of a bordello in New Orleans Under Jim Crow laws it was illegal for black women to even be present in such an establishment much less own one By the roaring twenties a few Corpus Christi community leaders decided that the only thing missing from their fair Gulf Coast city was a first class bordello The gentlemen went to New Orleans where they asked the real Mary Fisher to relocate her operation She realized the value of protection and benefits that these men could provide and took them up on their offer After decades in business and retirement at age seventy five with abundant jewelry cash and rental property the woman was murdered The story evolves into a true crime mystery with an unexpected ending [Feminist Science Studies](#) Maralee Mayberry,Banu Subramaniam,Lisa H.
