Envision a cadre of leading scientists and practitioners working collaboratively on a highly focused program of education research that is tightly coupled with practice. Much of the research is carried out in school settings. Research influences educational practice, and the outcomes in practice inform further research efforts. The Strategic Education Research Partnership (SERP) is designed to make this vision a reality. It proposes a large-scale, coherent program of research and development that would put the problems of educational practice at its center, and focus on all stages necessary to influence practice. These include theory testing, the development and evaluation of instructional programs, the study of practice in context, and attention to taking innovations to scale. This book explains the features of SERP and the ways in which it would address the major challenges of linking research and practice. It is a call to mobilize the nation's resources and political will, the power of scientific research, and the expertise of our educators, to create a more effective research and development program for improving student learning. Shrouded in the lore of legendary Indians, Mt. Timpanogos beckons the urban populace of Utah. And yet, no "Indian" legend graced the mount until Mormon settlers conjured it—once they had displaced the local Indians, the Utes, from their actual landmark, Utah Lake. On Zion's Mount tells the story of this curious shift. It is a quintessentially American story about the fraught process of making oneself "native" in a strange land. But it is also a complex tale of how cultures confer meaning on the environment—how they create homelands. Only in Utah did Euro-American settlers conceive of having a homeland in the Native American sense—an endemic spiritual geography. They called it "Zion." Mormonism, a religion indigenous to the United States, originally embraced Indians as "Lamanites," or spiritual kin. On Zion's Mount shows how, paradoxically, the Mormons created their homeland at the expense of the local Indians—and how they expressed their sense of belonging by investing Timpanogos with "Indian" meaning. This same pattern was repeated across the United States. Jared Farmer reveals how settlers and their descendants (the new natives) bestowed "Indian" place names and recited pseudo-Indian legends about those places—cultural acts that still affect the way we think about American Indians and American landscapes. From the renowned psychologist who introduced the world to "growth mindset" comes this updated edition of the million-copy bestseller—featuring transformative insights into redefining success, building lifelong resilience, and supercharging self-improvement. "Through clever research studies and engaging writing, Dweck illuminates how our beliefs about our capabilities exert tremendous influence on how we learn and which paths we take in life."—Bill Gates, GatesNotes "It's not always the people who start out the smartest who end up the smartest." After decades of research, world-renowned Stanford University psychologist Carol S. Dweck, Ph.D., discovered a simple but groundbreaking idea: the power of mindset. In this brilliant book, she

shows how success in school, work, sports, the arts, and almost every area of human endeavor can be dramatically influenced by how we think about our talents and abilities. People with a fixed mindset—those who believe that abilities are fixed—are less likely to flourish than those with a growth mindset—those who believe that abilities can be developed. Mindset reveals how great parents, teachers, managers, and athletes can put this idea to use to foster outstanding accomplishment. In this edition, Dweck offers new insights into her now famous and broadly embraced concept. She introduces a phenomenon she calls false growth mindset and guides people toward adopting a deeper, truer growth mindset. She also expands the mindset concept beyond the individual, applying it to the cultures of groups and organizations. With the right mindset, you can motivate those you lead, teach, and love—to transform their lives and your own. In this second volume of his long-anticipated five-volume collection of parashat hashavua commentaries, Rabbi Sir Jonathan Sacks explores these intersections as they relate to universal concerns of freedom, love, responsibility, identity, and destiny. Chief Rabbi Sacks fuses Jewish tradition, Western philosophy, and literature to present a highly developed understanding of the human condition under God's sovereignty. Erudite and eloquent, *Covenant Conversation* allows us to experience Chief Rabbi Sacks' sophisticated approach to life lived in an ongoing dialogue with the Torah. Turn any student into a bookworm with a few easy and practical strategies Donalyn Miller says she has yet to meet a child she can't turn into a reader. No matter how far behind Miller's students might be when they reach her 6th grade classroom, they end up reading an average of 40 to 50 books a year. Miller's unconventional approach dispenses with drills and worksheets that make reading a chore. Instead, she helps students navigate the world of literature and gives them time to read books they pick out themselves. Her love of books and teaching is both infectious and inspiring. In the book, you'll find: Hands-on strategies for managing and improving your own school library Tactics for helping students walk on their own two feet and continue the reading habit after they've finished with your class Data from student surveys and end-of-year feedback that proves how well the Miller Method works *The Book Whisperer* includes a dynamite list of recommended "kid lit" that helps parents and teachers find the books that students really like to read.
