

Mitosis Worksheet

The diagram below shows six cells in various phases of the cell cycle. Note the cells are not arranged in the order in which mitosis occurs and one of the phases of mitosis occurs twice. Use the diagram to answer questions 1-7.

- 1) Cells A and F show an early and a late stage of the same phase of mitosis. What phase is it?
 A - early prophase, F - late prophase
- 2) Which cell is in metaphase?
 C
- 3) Which cell is in the first phase of mitosis?
 A (if consider prophase 1st) but D (if consider interphase 1st)
- 4) In cell A, what structure is labeled X?
 Centrioles
- 5) Which cell is in the "in between" phase of mitosis?
 D (interphase, where the cell is being the cell it was created to be!)
- 6) Place the diagrams in order from first to last.
 A, F, C, E, B, D (some may put D first. Remember this is a cycle so how the order is viewed is subjective)
- 7) Are the cells depicted plant or animal cells? Explain your answer.
 Animal - round in shape
- 8) What is the longest phase of the cell cycle?
 D
- 9) Why is mitosis important?
 Allows cells to reproduce, making exact copies of themselves

Lab Coats in Hollywood David A. Kirby, 2011 How science consultants make movie science plausible in films ranging from 2001 A Space Odyssey to Finding Nemo Stanley Kubrick s 2001 A Space Odyssey released in 1968 is perhaps the most scientifically accurate film ever produced The film presented such a plausible realistic vision of space flight that many moon hoax proponents believe that Kubrick staged the 1969 moon landing using the same studios and techniques Kubrick s scientific verisimilitude in 2001 came courtesy of his science consultants including two former NASA scientists and the more than sixty five companies research organizations and government agencies that offered technical advice Although most filmmakers don t consult experts as extensively as Kubrick did films ranging from A Beautiful Mind and Contact to Finding Nemo and The Hulk have achieved some degree of scientific credibility because of science consultants In Lab Coats in Hollywood David Kirby examines the interaction of science and cinema how science consultants make movie science plausible how filmmakers negotiate scientific accuracy within production constraints and how movies affect popular perceptions of science Drawing on interviews and archival material Kirby examines such science consulting tasks as fact checking and shaping visual iconography Kirby finds that cinema can influence science as well Depictions of science in popular films can promote research agendas stimulate technological development and even stir citizens into political action

It is currently the subject of much debate around the world involving a variety of ethical, religious, societal, scientific, and medical issues. Scientific and Medical Aspects of Human Reproductive Cloning considers the scientific and medical sides of this issue plus ethical issues that pertain to human subjects research. Based on experience with reproductive cloning in animals, the report concludes that human reproductive cloning would be dangerous for the woman, fetus, and newborn and is likely to fail. The study panel did not address the issue of whether human reproductive cloning, even if it were found to be medically safe, would be or would not be acceptable to individuals or society.
