REGENTS HIGH SCHOOL EXAMINATION

GEOMETRY

Thursday, August 13, 2009—8:30 to 11:30 a.m., only

Student Name: Steve Sibol

School Name: jmap.org

Print your name and the name of your school on the lines above. Then turn to the last page of this booklet, which is the answer sheet for Part I. Fold the last page along the perforations and, slowly and carefully, tear off the answer sheet. Then fill in the heading of your answer sheet.

This examination has four parts, with a total of 38 questions. You must answer all questions in this examination. Write your answers to the Part I multiple-choice questions on the separate answer sheet. Write your answers to the questions in Parts II, III, and IV directly in this booklet. All work should be written in pen, except graphs and drawings, which should be done in pencil. Clearly indicate the necessary steps, including appropriate formula substitutions, diagrams, graphs, charts, etc.

The formulas that you may need to answer some questions in this examination are found at the end of the examination. This sheet is perforated so you may remove it from this booklet.

Scrap paper is not permitted for any part of this examination, but you may use the blank spaces in this booklet as scrap paper. A perforated sheet of scrap graph paper is provided at the end of this booklet for any question for which graphing may be helpful but is not required. You may remove this sheet from this booklet. Any work done on this sheet of scrap graph paper will not be scored.

When you have completed the examination, you must sign the statement printed at the end of the answer sheet, indicating that you had no unlawful knowledge of the questions or answers prior to the examination and that you have neither given nor received assistance in answering any of the questions during the examination. Your answer sheet cannot be accepted if you fail to sign this declaration.

Notice...

A graphing calculator, a straightedge (ruler), and a compass must be available for you to use while taking this examination.

The use of any communications device is strictly prohibited when taking this examination. If you use any communications device, no matter how briefly, your examination will be invalidated and no score will be calculated for you.

DO NOT OPEN THIS EXAMINATION BOOKLET UNTIL THE SIGNAL IS GIVEN.

Higher Education? Andrew Hacker, Claudia Dreifus, 2010-08-03 What s gone wrong at our colleges and universities and how to get American higher education back on track A quarter of a million dollars It s the going tab for four years at most top tier universities Why does it cost so much and is it worth it Renowned sociologist Andrew Hacker and New York Times writer Claudia Dreifus make an incisive case that the American way of higher education now a 420 billion per year business has lost sight of its primary mission the education of young adults Going behind the myths and mantras they probe the true performance of the Ivy League the baleful influence of tenure an unhealthy reliance on part time teachers and the supersized bureaucracies which now have a life of their own As Hacker and Dreifus call for a thorough overhaul of a self indulgent system they take readers on a road trip from Princeton to Evergreen State to Florida Gulf Coast University

revealing those faculties and institutions that are getting it right and proving that teaching and learning can be achieved and at a much more reasonable price

Economics, 2015 Russell Cooper and Andrew John have written an economics text aimed directly at students from its very inception You're thinking Yeah sure I've heard that before This textbook Economics Theory Through Applications centers around student needs and expectations through two premises Students are motivated to study economics if they see that it relates to their own lives Students learn best from an inductive approach in which they are first confronted with a problem and then led through the process of solving that problem Many books claim to present economics in a way that is digestible for students Russell and Andrew have truly created one from scratch This textbook will assist you in increasing students economic literacy both by developing their aptitude for economic thinking and by presenting key insights about economics that every educated individual should know How Russell and Andrew have done three things in this text to accomplish that goal Applications Ahead of Theory They present all the theory that is standard in Principles books But by beginning with applications students get to learn why this theory is needed Learning through Repetition Important tools appear over and over again allowing students to learn from repetition and to see how one framework can be useful in many different contexts A Student's Table of Contents vs An Instructor's Table of Contents There is no further proof that Russell

and Andrew have created a book aimed specifically at educating students about economics than their two tables of contents
