Public Technology Procurement and Innovation Charles Edquist,Leif Hommen,Lena J. Tsipouri,2000 Public Technology Procurement and Innovation studies public technology procurement as an instrument of innovation policy In the past few years public technology procurement has been a relatively neglected topic in the theoretical and research literature on the economics of innovation Similarly preoccupation with supply side measures has led policy makers to avoid making very extensive use of this important demand side instrument These trends have been especially pronounced in the European Union There as this book will argue existing legislation governing public procurement presents obstacles to the use of public technology procurement as a means of stimulating and supporting technological innovation Recently however there has been a gradual re awakening of practical interest in such measures among policy makers in the EU and elsewhere For these and other related measures this volume aims to contribute to a serious reconsideration of public technology procurement from the complementary standpoints of innovation theory and innovation policy

The SPARC Architecture Manual SPARC International,1994 SPARC Scalable Processor Architecture is the industry s only openly defined and evolved RISC architecture Version 9 is the new 64 bit incarnation of SPARC the most significant change since SPARC s introduction in 1987 Unlike other RISC Reduced Instruction Set Computer designs SPARC specifies not a hardware implementation chip but an open standard architecture belonging to the community of SPARC vendors and users The SPARC specification is defined by the SPARC Architecture Committee a technical arm of the computer maker consortium SPARC International Version 9 provides 64 bit data and addressing support for fault tolerance fast context switching support for advanced compiler optimizations efficient design for Superscalar processors and a clean structure for modern operating systems The V9 architecture supplements rather than replaces the 32 bit Version 8 architecture The non privileged features of Version 9 are upward compatible from Version 8 so 32 bit application software can execute natively without modification on Version 9 systems no special compatibility mode is required Publication of the Version 9 architecture marks a three year development effort by SPARC International member companies from a broad cross section of disciplines
