One Day I Shall Astonish the World Sep 06 2023 From the beloved author of *Love, Nina*, a frank, tender, and poignantly funny story about the ebb and flow of female friendship over half a lifetime. Susan and Norma have been best friends for years, at first thrust together by force of circumstance (a job at *The Pin Cushion*, a haberdashery shop in 1990s Leicestershire) and then by force of character (neither being particularly inclined to make friends with anyone else). But now, thirty years later, faced with a husband seeking immortality and Norma out of reach on a wave of professional glory, Susan begins to wonder whether she has made the right choices about life, love, work, and, most importantly, friendship. Nina Stibbe's new novel is the story of the wonderful and sometimes surprising path of friendship: from its conspiratorial beginnings, along its irritating wrong turns, to its final gratifying destination.

The Vacuum Cleaner Dec 09 2023 House cleaning has been an innate human activity forever but only since the early 19th century have mechanical devices replaced the physical labor (performed mostly by women). Mechanical carpet sweepers were replaced by manual suction cleaners, which in turn were replaced by electric vacuum cleaners in the early 20th century. Innovative inventors, who improved vacuum cleaners as electricity became commonly available, made these advances possible. Many early manufacturers failed, but some, such as Bissell, Hoover, Eureka and others, became household names as they competed for global dominance with improved features, performance and appearance. This book describes the fascinating people who made this possible, as well as the economic, cultural and technological contexts of their times. From obscure beginnings 200 years ago, vacuum cleaners have become an integral part of modern household culture.

Gone Viral Jul 12 2021 Data and marketing consultant and statistical sage to presidential candidates, governors, businesses, and the real powers-that-be, epidemiologists, Justin Hart catalogs in a terrifying-but-sprightly manner the folly and psychosis produced by the pandemic and diagnoses the societal destruction that the massive overresponse to the COVID virus has wreaked, as well as what can be done to stop the madness and bring the world back to a modicum of rationality. WORST. DISEASE. EVER. Someone broke America. In this nightmare, neighbors have turned into agoraphobes, teachers fear their students, children are muzzled, citizens are censored, dystopian fictions have become reality, and unelected officials are creating a biometric police state. Oh wait. It's not a nightmare. It's our daily lives! In truth, much of this insanity didn't start with the coronavirus pandemic (it was already latent in big government and big corporations) and it won't end there. COVID-19's greatest threat turned out to be . . . mental. All we had to fear was fear itself—and boy did some of us fear! The very idea of the virus weakened the immune system of America and revealed a decaying underbelly of confusion, panic, unease, and cowardice few of the strong ones suspected existed. What a horrible wake-up call! In a spate of anxious dread and gleeful power-grabbing, our health overlords threw away the pandemic response handbook and tried—beyond all reason—to protect, well, everyone. From massive over-testing to universal retail plexiglass to stay-at-home orders to stay-away-from-school orders to masking mandates to vaccine mandates to some of the worst restrictions on civil liberties in American history, this is an epic story that poses big questions about America's future as a free society. And the odd thing is, as Justin Hart shows, the actual disease was, as pandemics go, not that threatening; most people were at minimal risk. What is really scary is the total overreaction of half the country, many governments, that lost all sense of perspective. Hart offers a hopeful prescription on how we might face the madness down and claw our way back to sanity!

Pearl Jun 03 2023 This is a classic modern detective story. Pearl cannot accept that her deceased friend Eugene committed multiple murders back in 1956. She is merely an amateur sleuth with only a Burmese student Kyaw to help delve into the past. The odds of success are slim and at times her faith is sorely tested. Conversely Marcus, a successful stock market day trader, has a burning moral obligation to prove that Eugene was a killer. It is the unexpected that shocks. Picture the scene. A bitterly cold winter's day. A graveside. Pearl has thrown a handful of soil onto the coffin. She is weeping. Her friend had died suddenly. She wasn't even in the country, never mind his cottage near Brighton. She is still staring at the nameplate "Eugene Whitby 1927 - 2015" when a stranger hands her an envelope. The note inside remains unread for days. The chain of events unleashed by the contents of that single piece of paper will shape her life for ever.

The Great Chocoplot Mar 08 2021 It's the end of chocolate - for good! At least, that's what they're saying on TV. Is it really the chocopocalypse, or is there a chocoplot afoot?
