Understanding the Victorians Feb 14 2023 "Understanding the Victorians paints a vivid portrait of the era, combining broad surveys with close analysis, and introduces students to the critical debates taking place among historians today. Focusing not just on England but on the whole of Great Britain and Ireland it emphasises class, gender, and racial and imperial positioning as constitutive of human relations. This book encompasses the whole of the Victorian period giving equal prominence to social and cultural topics alongside the politics and economics. Starting with the Queen Caroline Affair in 1820 and coming right up to the start of World War I in 1914, Susie L. Steinbach uses thematic chapters to discuss and evaluate, the economy, gender, religion, the history of science and ideas, material culture and sexuality. Steinbach also provides much-needed chapters on consumption, which links consumption with production, on law, which explains the legal culture and trials of criminal and scandalous cases and on space which draws together the most current research in Victorian studies"--Provided by publisher.

Why Study Biology by the Sea? Jul 30 2021 "Since the middle of the 19th century, biologists have migrated to the seashore to study marine organisms as a way of understanding life. By the turn of the 20th century, such work was being done inside permanent seaside field stations. The Stazione Zoologica, in Naples, Italy (from 1874), and the Marine Biological Laboratory, in Woods Hole, Massachusetts (from 1888), attracted leaders in many biological fields, and helped establish biology as a modern science. Why Study Biology by the Sea? tells the story of these unique scientific institutions while attempting to answer the contemporary question, "Why study biology by the sea?" The volume examines the origins and value of these places via perspectives that range from cell biology to philosophy of science"--

Mom Talk Aug 23 2023 Mom life is hard. If you are a mom, you already

know that. If you're going to be a mom, you'll find out soon. In this book of interviews of 27 regular, every-day moms, you'll read about the trials of motherhood: if only nipples were longer! If only bodies could magically be what they were before! If only it were possible to escape sometimes! If only the rest of the world could understand just how hard it is for working moms! If only postpartum sex wasn't so painful! And you'll read about the rewards to find out just why women keep doing this motherhood thing over and over again. Hint: there's a whole lot of love involved. Mom Talk is a book of interviews with real women getting real about motherhood. Whether you're pregnant, already a mom, the partner of a mom, or even if you just know a mom. Whether your kids are 2 or 32. Whether your kids are biological, fostered, or adopted. It's advice, it's a chance to commiserate, it's a glimpse into the everyday life of the women who have the hardest job on earth - motherhood.

Biopower Dec 03 2021 Michel Foucault's notion of "biopower" has been a highly fertile concept in recent theory, influencing thinkers worldwide across a variety of disciplines and concerns. In The History of Sexuality: An Introduction, Foucault famously employed the term to describe "a power bent on generating forces, making them grow, and ordering them, rather than one dedicated to impeding them, making them submit, or

destroying them." With this volume, Vernon W. Cisney and Nicolae Morar bring together leading contemporary scholars to explore the many theoretical possibilities that the concept of biopower has enabled while at the same time pinpointing their most important shared resonances. Situating biopower as a radical alternative to traditional conceptions of power—what Foucault called "sovereign power"—the contributors examine a host of matters centered on life, the body, and the subject as a living citizen. Altogether, they pay testament to the lasting relevance of biopower in some of our most important contemporary debates on issues ranging from health care rights to immigration laws, HIV prevention discourse, genomics medicine, and many other topics.

The Unspeakable Crimes of Dr. Petiot May 27 2021 The chilling true story of a serial killer who preyed on men, women, and children desperate to escape Nazi-occupied Paris. On March 11, 1944, police were called to investigate foul-smelling smoke pouring from the chimney of an elegant private house near the Arc de Triomphe. In the basement of 21 rue Le Sueur, they made the first of many gruesome discoveries: a human hand dangling from the open door of a coal-burning stove. Proceeding to the rear of the home, detectives found rib cages, skulls, and internal organs strewn across the floor and large piles of quicklime mixed with fragments of bone and flesh. The Gestapo had two offices in the neighborhood—were Hitler's henchmen responsible for the carnage? Or was it the work of French Resistance fighters purging Paris of traitors and German spies? As the investigation unfolded, a more sinister possibility emerged. The building's owner, Dr. Marcel Petiot, was a handsome and charismatic physician whose past was littered with bizarre behavior and criminal activity. When he was finally captured eight months later, Dr. Petiot claimed he was a loyal member of the Resistance who helped kill Nazi collaborators. Prosecutors charged that he was a sadistic mass murderer who lured at least twenty-seven innocent people to their deaths with promises of escape. Estimates of the actual number of his victims ran as high as 150 men, women, and children. From the first stages of the investigation to the sensational trial in which Dr. Petiot's superior intelligence and perverse wit were on full display, author Thomas Maeder meticulously reconstructs one of the twentieth century's most fascinating and lurid murder cases. Drawing on classified police files and interviews with surviving participants, *The Unspeakable Crimes of Dr. Petiot* is a riveting true crime saga that that "reads like a shocking psychological thriller" (Newsweek).

Mad at School Apr 18 2023 Explores the contested boundaries between disability, illness, and mental illness in higher education

Concepts of Biology Jan 28 2024 *Concepts of Biology* is designed for the single-semester introduction to biology course for non-science majors, which for many students is their only college-level science course. As such, this course represents an important opportunity for students to develop the necessary knowledge, tools, and skills to make informed decisions as they continue with their lives. Rather than being mired down with facts and vocabulary, the typical non-science major student needs information presented in a way that is easy to read and understand. Even more importantly, the content should be meaningful. Students do much better when they understand why biology is relevant to their everyday lives. For these reasons, *Concepts of Biology* is grounded on an evolutionary basis and includes exciting features that highlight careers in the biological sciences and everyday applications of the concepts at hand. We also strive to show the interconnectedness of topics within this extremely broad discipline. In order to meet the needs of today's instructors and students, we maintain the overall organization and coverage found in most syllabi for this course. A strength of *Concepts of Biology* is that instructors can customize the book, adapting it to the approach that works best in their classroom. *Concepts of Biology* also includes an innovative art program that incorporates critical thinking and clicker questions to help students understand—and apply—key concepts.

Plant-Thinking Nov 13 2022 The margins of philosophy are populated by non-human, non-animal living beings, including plants. While contemporary philosophers tend to refrain from raising ontological and ethical concerns with vegetal life, Michael Marder puts this life at the forefront of the current deconstruction of metaphysics. He identifies the existential features of plant behavior and the vegetal heritage of human thought so as to affirm the potential of vegetation to resist the logic of totalization and to exceed the narrow confines of instrumentality. Reconstructing the life of plants "after metaphysics," Marder focuses on their unique temporality, freedom, and material knowledge or wisdom. In his formulation, "plant-thinking" is the non-cognitive, non-ideational, and non-imagistic mode of thinking proper to plants, as much as the process of bringing human thought itself back to its roots and rendering it plantlike.

The Routledge International Handbook of Financialization Dec 27 2023 Financialization has become the go-to term for scholars grappling with the growth of finance. This Handbook offers the first comprehensive

survey of the scholarship on financialization, connecting finance with changes in politics, technology, culture, society and the economy. It takes stock of the diverse avenues of research that comprise financialization studies and the contributions they have made to understanding the changes in contemporary societies driven by the rise of finance. The chapters chart the field's evolution from research describing and critiquing the manifestations of financialization towards scholarship that pinpoints the driving forces, mechanisms and boundaries of financialization. Written for researchers and students not only in economics but from across the social sciences and the humanities, this book offers a decidedly global and pluri-disciplinary view on financialization for those who are looking to understand the changing face of finance and its consequences.

Inquiry Into Life Mar 30 2024 Learning is much more than reading a textbook. That's why the 10th edition of Inquiry into Life is integrated closely with an Online Learning Center where students and professors alike will benefit. The OLC provides animations, virtual labs, online quizzing, Power Point lecture outlines, and other tools that will help make teaching a little easier and learning a lot more fun. Inquiry into Life covers the whole field of basic biology, and emphasizes the application of this knowledge to human concerns. Along with this approach, concepts and principles are stressed, rather than detailed, high-level scientific data and terminology.

Loose Leaf Version for Inquiry into Life Jun 20 2023 Dr. Sylvia Mader's text, Inquiry into Life, was originally developed to reach out to science-shy students. The text now represents one of the cornerstones of introductory biology education. Inquiry into Life was founded on the belief that teaching science from a human perspective, coupled with human applications, would make the material more relevant to the student. This text, along with the Inquiry Into Life 15.1 edition, represent an ongoing project in the development of a continuously-updated textbook. As scientists and educators, the authors of this text are well aware that scientific discovery is a dynamic process. Fortunately, the advances in digital publishing are allowing authors to update content on an ongoing basis, which in turn is promoting the ability to update content on a regular basis. This text represents the prototype of those efforts

Concepts of Biology Feb 27 2024 Instructors consistently ask for a textbook that helps students understand the relationships between the main concepts of biology, so they are not learning facts about biology in isolation. Mader's Concepts of Biology was developed to fill this void. Organized around the main themes of biology, Concepts of Biology guides students to think conceptually about biology and the world around them. Just as the levels of biological organization flow from one level to the next, themes and topics in Concepts of Biology are tied to one another throughout the chapter, and between the chapters and parts. Combined with Dr. Mader's hallmark writing style, exceptional art program, and pedagogical framework, difficult concepts become easier to understand and visualize, allowing students to focus on understanding how the concepts are related.

Other People's Clothes Jan 16 2023 Two American ex-pats obsessed with the Amanda Knox trial find themselves at the nexus of murder and celebrity in glittering late-aughts Berlin in this "hugely entertaining" (The New York Times) debut with a wicked sense of humor. "Darkly funny, psychologically rich and utterly addictive... [a] harrowing tale of twisty female friendships, slippery identity and furtive secrets." —Megan Abbott, best-selling author of *The Turnout* Hoping to escape the pain of the recent murder of her best friend, art student Zoe Beech finds herself studying abroad in the bohemian capital of Europe—Berlin. Rudderless,

Zoe relies on the arrangements of fellow exchange student Hailey Mader, who idolizes Warhol and Britney Spears and wants nothing more than to be an art star. When Hailey stumbles on a posting for a high-ceilinged, prewar sublet by well-known thriller writer Beatrice Becks, the girls snap it up. They soon spend their nights twisting through Berlin's club scene and their days hungover. But are they being watched? Convinced that Beatrice intends to use their lives as inspiration for her next novel, Hailey vows to craft main-character-worthy personas. They begin hosting a decadent weekly nightclub in the apartment, finally gaining the notoriety they've been craving. Everyone wants an invitation to "Beatrice's." As the year unravels and events spiral out of control, they begin to wonder whose story they are living—and how it will end. *Other People's Clothes* brilliantly illuminates the sometimes dangerous intensity of female friendships, as well as offering an unforgettable window into millennial life and the lengths people will go to in order to eradicate emotional pain.
