T-38 Talon Pilot's Flight Operating Instructions Oct 24 2021
Northrop's T-38 Talon was the world's first supersonic trainer aircraft, and remains in service today in air forces worldwide. It entered service in 1961, and quickly set climb records, earning it the nickname 'white rocket'. Nearly 1200 Talons were produced before the last one rolled off the assembly line in 1972. Capable of a speed of Mach 1.3, and a climb rate approaching 34,000 feet per minute, the T-38's performance was sufficient to warrant service as the USAF Thunderbirds' aircraft in the mid-1970s. Its primary role however, was as a dedicated training and proficiency platform. More than

50,000 USAF, NASA and NATO pilots have flown the Talon, a record that may never be matched. Originally printed by the U.S. Air Force and Northrop, this handbook for the T-38 provides a fascinating glimpse inside the cockpit of this famous aircraft. Originally classified 'restricted', the manual was recently declassified and is here reprinted in book form.

John the Baptizer and Prophet Jul 21 2021

Using recent methodological advances in historical Jesus research, this book examines the figure of John by focusing on the two characteristic roles which he publicly performed-baptizer and prophet. The significance of these roles is studied within the context of late Second Temple Judaism in order to understand John within his social and historical context. Part I examines the traditions concerning John in Josephus's Antiquities as well as in canonical and extra canonical Gospels. Part II studies John's role as baptizer by analysing the functions of ablutions in the Old Testament and Second Temple Jewish literature, especially the Qumran literature. Part III analyses John's public role of prophet. John is seen as the leader of a prophetic movement, whose sociopolitical orientation may be compared with similar movements of the period.

Remote Sensing Handbook - Three Volume Set Jun 19 2021

A volume in the three-volume Remote Sensing Handbook series, Remote Sensing of Water Resources, Disasters, and Urban Studies documents the scientific and methodological advances that have taken place during the last 50 years.
