Introducing Researching English for Specific Purposes is essential reading for anyone wanting to conduct research in ESP *Improving Learning Transfer* Cyril Kirwan,2016-05-23

In today s constantly changing business environment capable people are crucial to an organization s success and developing their capabilities through training learning and development initiatives is a major investment While measuring the return on that investment is important attempts to do so are much less valuable if they are not accompanied by a clear understanding of all of the factors than can affect the application of new skills and knowledge on the job in other words a clear understanding of what affects learning transfer So if organisations are to remain competitive and develop the highly skilled people that will contribute to their future performance improving learning transfer should be a priority Cyril Kirwan s book addresses this critical issue at a number of levels Firstly it explores what learning transfer actually is it s about application of learning back at work as well as maintenance of that learning over time Secondly it describes the main factors that affect transfer in terms of trainee characteristics training design factors and work environment characteristics It also examines how those factors exert their effect which ones are more important how they interact with one another and in doing so constructs a practical learning transfer model for practitioners The book also describes in some detail what the various factors working for or against learning transfer look like in practice Finally using case studies it points the way towards what can be done before during and after training to improve the rate of transfer This highly practical book will help trainers development specialists and line managers ensure that their training is about real outcomes and not just inputs
