Zumdahl,Susan A. Zumdahl,2012 Steve and Susan Zumdahl s texts focus on helping students build critical thinking skills through the process of becoming independent problem solvers They help students learn to think like a chemists so they can apply the problem solving process to all aspects of their lives In CHEMISTRY AN ATOMS FIRST APPROACH 1e International Edition the Zumdahls use a meaningful approach that begins with the atom and proceeds through the concept of molecules structure and bonding to more complex materials and their properties Because this approach differs from what most students have experienced in high school courses it encourages them to focus on conceptual learning early in the course rather than relying on memorization and a plug and chug method of problem solving that even the best students can fall back on when confronted with familiar material The atoms first organization provides an opportunity for students to use the tools of critical thinkers to ask questions to apply rules and models and to An Introduction to Chemistry Mark Bishop,2002 This book teaches chemistry at an appropriate level of rigor while removing the confusion and insecurity that impair student success Students are frequently intimidated by prep chem Bishop s text shows them how to break the material down and master it The flexible order of topics allows unit conversions to be covered either early in the course as is traditionally done or later allowing for a much earlier than usual description of elements compounds and chemical reactions The text and superb illustrations provide a solid conceptual framework and address misconceptions The book helps students to develop strategies for working problems in a series of logical steps The Examples and Exercises give plenty of confidence building practice the end of chapter problems test the

student s mastery The system of objectives tells the students exactly what they must learn in each chapter and where to find it
